Freud On The Acropolis:

Freud On The Acropolis Susan Sugarman, 2019-03-01 In this book the author tracks the canonical instances of the generalized version of Sigmund Freud's example a visit to the Acropolis when one cares about the visit whether or not with the degree of interest and enthusiasm that Freud had **Tracing Freud on the Acropolis** Marina Maniadaki, 2023

Cultural Theory and Psychoanalytic Tradition David Fisher, 2018-02-06 The culture of psychoanalysis has many traditions and multiple schools of theory and thought This work presents informative and original investigations into three overlapping areas of psychoanalytic tradition the history of psychoanalysis psychoanalytic culture criticism and the application of psychoanalytic methods to the study of history In this carefully crafted evaluation of various authors and subjects Fisher's perceptions are informed by a deep and comprehensive knowledge of the psychoanalytic movement its interaction with the wider context of European cultural and political history and its philosophical and clinical origins In examining the history of the movement Fisher attempts to discover the fundamental inspiration of psychoanalysis by returning to the origins of the discipline Freud is the central figure here but Fisher also looks to the second generation of European analysts including such maverick figures as Lacan and Spielrein and mainstream figures as Fenichel to gain insight into the multidimensional and creative personalities who were drawn to Freud and his ideas In his discussion of psychoanalytic culture criticism Fisher analyzes symbolic meanings and psychological themes from a variety of written works In an analysis of Freud's Civilization audits Discontents the author argues that the figure of Romain Rolland is pervasive throughout the text as symbol muse stimulus and adversary Reading analytic theory and applying it to personalities and situations from the past allowed historians to address issues of their own inner world and to develop breathtaking possibilities for understanding the past Brilliantly written and historical and critical in method Cultural Theory and Psychoanalytic Tradition offers valuable insights into significant themes and ambiguities in the diverse areas of psychoanalysis Intellectual historians and psychoanalysts will find reliable introductions and springboards for *Freud on the Acropolis* Risto Fried, 2003 [The Ancient Unconscious](#) Vered Lev Kenaan, 2019-05-08 In the field of classical studies the psychoanalytic construction of the unconscious is rarely regarded as a fruitful methodological concept Commonly understood as a modern conceptual invention rather than the discovery of a psychic reality the notion of the unconscious is often criticized as an anachronistic lens one that ineluctably subjects ancient experience to modern patterns of thought The Ancient Unconscious seeks to challenge this ambivalent theoretical disposition toward the psychoanalytic concept and reclaim the value of the unconscious as a methodological tool for the study of ancient texts by transforming our understanding of what the unconscious means the way it operates and how it relates to textual hermeneutics It considers the debate over whether the ancients had an unconscious as an invitation to rethink the relationship between antiquity and modernity investigating the meaning of textuality through contact between historical moments that have no priority under

the law of chronology associations and connections between the past and its future including the present belong to the sphere of the unconscious which is primarily employed here in order to study the inherent often hidden links that bind modernity to classical antiquity and modern to ancient experiences Drawing on an incisive examination of the complicated often conflicted relationship between classical studies and psychoanalytic theory the volume aims to explain why the concept of the unconscious is in fact inseparable from and crucial for the study of the ancient text and more generally the methodology of classical philology

Warped Space Anthony Vidler, 2002-02-22 How psychological ideas of space have profoundly affected architectural and artistic expression in the twentieth century Beginning with agoraphobia and claustrophobia in the late nineteenth century followed by shell shock and panic fear after World War I phobias and anxiety came to be seen as the mental condition of modern life They became incorporated into the media and arts in particular the spatial arts of architecture urbanism and film This spatial warping is now being reshaped by digitalization and virtual reality Anthony Vidler is concerned with two forms of warped space The first a psychological space is the repository of neuroses and phobias This space is not empty but full of disturbing forms including those of architecture and the city The second kind of warping is produced when artists break the boundaries of genre to depict space in new ways Vidler traces the emergence of a psychological idea of space from Pascal and Freud to the identification of agoraphobia and claustrophobia in the nineteenth century to twentieth century theories of spatial alienation and estrangement in the writings of Georg Simmel Siegfried Kracauer and Walter Benjamin Focusing on current conditions of displacement and placelessness he examines ways in which contemporary artists and architects have produced new forms of spatial warping The discussion ranges from theorists such as Jacques Lacan and Gilles Deleuze to artists such as Vito Acconci Mike Kelley Martha Rosler and Rachel Whiteread Finally Vidler looks at the architectural experiments of Frank Gehry Coop Himmelblau Daniel Libeskind Greg Lynn Morphosis and Eric Owen Moss in the light of new digital techniques that while relying on traditional perspective have radically transformed the composition production and experience perhaps even the subject itself of architecture

History as an Art of Memory Patrick H. Hutton,1993 Hutton considers the ideas of philosophers poets and historians to seek out the roots of fact as mere recollection *Freud's Requiem* Matthew von Unwerth,2006-01-01 This absorbing thoughtful narrative explores Sigmund Freud s provocative ideas on creativity and mortality and their roots in his history while searching for broader lessons about love memory mourning and creativity Written in 1915 during winter and wartime Freud s little known essay On Transience records an afternoon conversation with a young but already famous poet and his taciturn friend about mortality eternity and the sense of life In Freud s Requiem the philosophical disagreement between Freud and his companions who may have been the poet Rainer Maria Rilke and his muse and former lover Lou Andreas Salome becomes a prism through which to consider Freud s creativity as a response to his own experiences from his passionately curious love struck teenage years to his death after a long struggle with cancer in 1939 Drawing on a variety of literary and historical sources Homer Goethe as well as Freud s own writings including his letters Freud s Requiem is both an intimate personal drama and a spirited intellectual inquiry By tracing connections among Freud s ideas his personality and the world he lived in Matthew von Unwerth examines the links that Freud made between art and memory Freud s Requiem contemplates how in mourning we tell stories about our lives that give form and meaning to the events and feelings that threaten to overwhelm us In recounting our stories especially our darkest moments we make sense of them and reclaim lost aspects of our lives just as Freud did in his account of an afternoon walk with a poet and a taciturn companion *Virginia Woolf's Bloomsbury, Volume 1* G. Potts,L. Shahriari,2015-10-14 This volume features new essays by eminent and emerging Woolf scholars focusing on the aesthetics and influences of Virginia Woolf s work Themes include eco criticism conceptions of intellectual women spaces and places and Woolf beyond Bloomsbury The volume opens

with a personal reflection by Cecil Woolf nephew of Leonard and Virginia Woolf **Romancing Antiquity** George E. McCarthy, John Paul Jones, 1997 In this unique and comprehensive book George McCarthy examines the influence of Greek philosophy literature arts and politics on the development of twentieth century German social thought McCarthy demonstrates that the classical spirit vitalized thinkers such as Weber Heidegger Freud Marcuse Arendt Gadamer and Habermas With the romancing of antiquity they transformed their understanding of the modern self political community and Enlightenment rationality By viewing contemporary social theory from the framework of the classical world McCarthy argues we are capable of thinking beyond the limits of modernity to new possibilities of human reason science beauty and social justice **Intoxication, Modernity, and Colonialism** Dušan I. Bjelić, 2017-01-25 This book depicts how Freud's cocaine and Benjamin's hashish illustrate two critiques of modernity and two messianic emancipations through the pleasures of intoxicating discourse Freud discovered the libido and unconscious in the industrial mimetic scheme of cocaine whereas Benjamin found an inspiration for his critique of phantasmagoria and its variant psychoanalysis in hashish's mimesis In addition as part of the history of colonialism both drugs generated two distinct colonial discourses and consequently two different understandings of the emancipatory powers of pleasure the unconscious and dreams After all great ideas don't liberate they intoxicate *Normalizing the Balkans* Professor Dušan I. Bjelić, 2013-01-28 *Normalizing the Balkans* argues that following the historical patterns of colonial psychoanalysis and psychiatry in British India and French Africa as well as Nazi psychoanalysis and psychiatry the psychoanalysis and psychiatry of the Balkans during the 1990s deployed the language of psychic normality to represent the space of the Other as insane geography and to justify its military or its symbolic takeover Freud's self analysis influenced by his journeys through the Balkans was a harbinger of orientalism as articulated by Said However whereas Said intended Orientalism to be a critique of the historical construction of the Orient by and in relation to the West for Freud it constituted a medical and psychic truth Freud's self orientalizing became the structural foundation of psychoanalytic language which had tragic consequences in the Balkans when a demonic conjunction developed between the ingrained self orientalizing structure of psychoanalysis and the Balkans' own propensity for self orientalizing In the 1990s in the ex Yugoslav cultural space psychoanalytic language was used by the Serb psychiatrist politicians Drs Rašević and Karadžić as conceptual justification for inter ethnic violence Kristeva's discourse on abject geography and its conceptualization of the Balkans as the Real have done violence to the region in an intellectual register on behalf of universal subjectivity Following Gramsci's and Said's discourse geography Bjelić transmutes the psychoanalytic topos of the imaginary geography of the Balkans into the geopolitics inherent in psychoanalytic language itself and takes to task the practices of normalization that underpin the Balkans' politics of madness **Normalizing the Balkans** Dušan I. Bjelić, 2016-05-23 *Normalizing the Balkans* argues that following the historical patterns of colonial psychoanalysis and psychiatry in British India and French Africa as well as Nazi psychoanalysis and psychiatry the psychoanalysis and psychiatry of the Balkans

during the 1990s deployed the language of psychic normality to represent the space of the Other as insane geography and to justify its military or its symbolic takeover Freud's self analysis influenced by his journeys through the Balkans was a harbinger of orientalism as articulated by Said However whereas Said intended Orientalism to be a critique of the historical construction of the Orient by and in relation to the West for Freud it constituted a medical and psychic truth Freud's self orientalization became the structural foundation of psychoanalytic language which had tragic consequences in the Balkans when a demonic conjunction developed between the ingrained self orientalizing structure of psychoanalysis and the Balkans own propensity for self orientalization In the 1990s in the ex Yugoslav cultural space psychoanalytic language was used by the Serb psychiatrist politicians Drs Ra kovic and Karadzic as conceptual justification for inter ethnic violence Kristeva's discourse on abject geography and Zizek's conceptualization of the Balkans as the Real have done violence to the region in an intellectual register on behalf of universal subjectivity Following Gramsci's and Said's discourse geography Bjelic transmutes the psychoanalytic topos of the imaginary geography of the Balkans into the geopolitics inherent in psychoanalytic language itself and takes to task the practices of normalization that underpin the Balkans politics of madness

in connection with the Association of Art Historians *Art and Psychoanalysis* Gabriela Goldstein, 2025-10-27 This book explores the concept of estrangement from a psychoanalytic perspective intertwining art and aesthetics to offer a paradigm of the aesthetic experience Gabriela Goldstein suggests that an unexpected encounter with a work of art may lead to a state of poetic estrangement promoting a possible reorganization of its subject's psychic economy The conceptual work is illuminated with vignettes exploring the experience of this state of estrangement reflecting on the encounter between the subject and the other Other between analyst and patient and in the framework provided by the analytical situation Finally Goldstein considers how the metapsychology of aesthetic experience and its research contribute to clinical understanding of processes of deficient symbolization Art and Psychoanalysis will be key reading for psychoanalysts artists researchers and teachers of art and psychoanalysis It will also be of great interest to art therapists students of art and the humanities as well as other readers interested in an in depth understanding of the aesthetic experience and creative processes *The Enigma of the Oceanic Feeling* William Barclay Parsons, 1999 Then reconstructing Rolland's personal mysticism the oceanic feeling through texts and letters unavailable to Freud Parsons argues that Freud misinterpreted the oceanic feeling BOOK JACKET
