## **Going Sane An Introduction To Feeling Therapy:**

**Going Sane** Joseph Truman Hart,Richard Corriere,Jerry Binder,1975 *Going Sane* is a report of the experience of the authors and their associates at the Center for Feeling Therapy in California The authors overall thesis about the prevailing condition of personality in societies past and present is the proposition is that the healthy state of the person is that of the child before it has learned to mask and overlay its feelings with learned patterns of meaning and thus to substitute ideas for natural feelings The authors do point out that we do not believe that feeling therapy is or ever will be for everyone to us it seems desirable that there be hundreds of different therapies

**Insane Therapy** Marybeth Ayella,2010-06-17 Group therapy goes awry in one community and shows how vulnerable we all can be to cult mentality

**Toward a Psychology of Uncertainty** Doris Brothers,2011-04-12 Since trauma is a thoroughly relational phenomenon it is highly unpredictable and cannot be made to fit within the scientific framework Freud so admired In *Toward a Psychology of Uncertainty* Trauma Centered Psychoanalysis Doris Brothers urges a return to a trauma centered psychoanalysis Making use of relational systems theory she shows that experiences of uncertainty are continually transformed by the regulatory processes of everyday life such as feeling knowing forming categories making decisions using

language creating narratives sensing time remembering forgetting and fantasizing Insofar as trauma destroys the certainties that organize psychological life it plunges our relational systems into chaos and sets the stage for the emergence of rigid life constricting relational patterns These trauma generated patterns which often involve denial of sameness and difference the creation of complexity reducing dualities and the transformation of certainty into certitude figure prominently in virtually all of the complaints for which patients seek analytic treatment Analysts she claims are no more strangers to trauma than are their patients Using in depth clinical illustrations Dr Brothers demonstrates how a mutual desire to heal and to be healed from trauma draws patients and analysts into their analytic relationships She recommends the reconceptualization of what has heretofore been considered transference and countertransference in terms of the transformation of experienced uncertainty In her view the increased ability of both analytic partners to live with uncertainty is the mark of a successful treatment Dr Brothers perspective sheds fresh light on a variety of topics of great general interest to analysts as well as many of their patients such as gender the acceptance of death faith cult like training programs and burnout Her discussions of these topics are enlivened by references to contemporary cinema and theatre

*Focus on Psychodrama* Peter Felix Kellermann, 1992 This textbook is for all students and practitioners of psychodrama and drama and professionals seeking to extend their knowledge of creative arts therapies The author provides a comprehensive overview of the theory and practice of psychodrama presenting a systematic analysis of its essential therapeutic ingredients He specifies the core issues involved discussing the interpersonal the emotional the imaginary the behavioural and the cognitive elements The book examines the professional roles assumed by psychodramatists and establishes the skills required in each role Explored is the use of the concept of acting out both in psychodrama and psychoanalysis and the author also discusses the problem of resistance and the importance of the concept and technique of closure in each psychodrama A processing checklist is added at the end of the book as a systematic aid in evaluating the professional skills of the psychodramatist The chapters are both pragmatic and solidly grounded in theory thereby providing students with an effective in depth alternative to the traditional verbal therapies

*Power Games* Richard Raubolt, 2021-04-20 [www.richardraubolt.com](http://www.richardraubolt.com) An intense account of the misuse of power in psychotherapeutic training that offers solutions to this urgent issue Over the course of his own training in psychotherapy and psychoanalysis Richard Raubolt came to see that advanced training is more often than not plagued by authoritarian practices some subtle and many pronounced It is the contention of Raubolt and his contributors that these practices instill fear and foster blind obedience to the favored proclivities of the leaders of the training institute In turn this subservience which seeps into the therapeutic relationship prevents both the training candidates and their prospective patients from developing creative authentic and meaningful experiences This is a book written from the perspective of scholars and experienced clinicians who are acutely aware both on a personal and theoretical level of the disruptive role of power games in psychoanalytic institutes The collection features a highly nuanced and comprehensively developed psychoanalytic

understanding of the use and misuse of power authority status and control operating in many traditional and nontraditional training experiences Finally new supervisory and training models based on empathy respect for subjective experiences and democratic principles are proposed as an alternative to the abusive practices so powerfully described in this book
