Splat! Ploof!** Gordana Crnkovic,2003-10-01 Observing European debates about EuroDisney McDonald's Hollywood films and television programs and other vehicles of alleged Americanization one might imagine that Europe was in serious risk of losing its distinct cultural identity in the melting pot of American pop culture The loaded charge of kitsch is a central aspect of the debate with Disney stories for example branded as simplified travesties of authentic European folk tales But the relationship between European and American popular cultures is vastly more complex Reciprocal and interactive it is a relationship in which the European American partnership for example in cinematic ventures has become quite common And again artifacts which have a certain meaning and reception in America may have a completely different meaning and reception in Europe in effect behaving as different artifacts altogether And finally as this book shows American cultural influences have penetrated not only the popular realms of European television fashions fast

food and rock music but also such domains as youth organizations literature UFO culture and religious faith
