The UFAW Handbook on the Care and Management of Laboratory and Other Research Animals Huw Golledge, Claire Richardson, 2024-03-12. The latest edition of the seminal reference on the care and management of laboratory and research animals. The newly revised ninth edition of *The UFAW Handbook on the Care and Management of Laboratory and Other Research Animals* delivers an up-to-date and authoritative exploration on worldwide developments, current thinking and best practices in the field of laboratory animal welfare, science and technology. The gold standard in laboratory and captive animal care and management references, this latest edition continues the series' tradition of excellence by including brand new chapters on ethical review, the care of aged animals and fresh guidance on the care of mice, rats, corvids, zebrafish and decapods. The book offers introductory chapters covering a variety of areas of laboratory animal use as well as chapters on the management and care of over 30 different taxa of animals commonly utilised in scientific procedures and research around the world. It also provides a thorough introduction to the design of animal experiments, laboratory animal genetics and the phenotyping of genetically modified mice. Comprehensive explorations of animal welfare assessment and the ethical review process. Practical discussions of legislation and oversight of the conduct of research using animals from a global perspective. In-depth examinations of the planning, design and construction of efficient animal facilities, special housing arrangements and nutrition, feeding and animal welfare. *The UFAW Handbook on the Care and Management of Laboratory and Other Research Animals* Ninth Edition is essential for laboratory animal scientists, veterinarians, animal care staff, animal care regulatory authorities, legislators and professionals working in animal welfare, non-governmental organizations.

The Process of Animal Domestication Marcelo Sánchez-Villagra, 2022-01-18. The first modern scholarly synthesis of animal domestication. Across the globe and at different times in the past millennia, the evolutionary history of domesticated animals has been greatly affected by the myriad complex and diverse interactions humans have had with the animals closest to them. *The Process of Animal Domestication* presents a broad synthesis of this subject from the rich biology behind the initial stages of domestication to how the creation of breeds reflects cultural and societal transformations that have impacted the biosphere. Marcelo Sánchez-Villagra draws from a wide range of fields including evolutionary biology, zooarchaeology, ethnology, genetics, developmental biology and evolutionary morphology to

provide a fresh perspective to this classic topic Relying on various conceptual and technical tools he examines the natural history of phenotypes and their developmental origins He presents case studies involving mammals birds fish and insect species and he highlights the importance of domestication for the comprehension of evolution anatomy ontogeny and dozens of fundamental biological processes Bringing together the most current developments The Process of Animal Domestication will interest a wide range of readers from evolutionary biologists developmental biologists and geneticists to anthropologists and archaeologists **The British National Bibliography** Arthur James Wells,2004 *Ikan (pisces)* Enik
