Lee,2012-05-21 In his pathbreaking article History and the Social Sciences The Longue Dur e Fernand Braudel raised a call for the social sciences to overcome their disciplinary isolation from one another Commemorating the fiftieth anniversary of the article s publication the contributors to this volume do not just acknowledge their debt to the past they also bear witness to how the crisis Braudel recognized a half century ago is no less of a crisis today The contributions included here from scholars in history sociology and geography reflect the spirit and practice of the intellectual agenda espoused by Braudel coming together around the concept of the longue dur e Indeed they are evidence of how the groundbreaking research originally championed by Braudel has been carried forward in world systems analysis for a more socially relevant understanding of the planet and its future possibilities The book concludes with a new translation of Braudel s original article by famed sociologist Immanuel Wallerstein **Social Movements and World-System Transformation** Jackie

Smith,MICHAEL GOODHART,Patrick Manning,John Markoff,2016-10-26 At a particularly urgent world historical moment this volume brings together some of the leading researchers of social movements and global social change and other emerging scholars and practitioners to advance new thinking about social movements and global transformation Social movements around the world today are responding to crisis by defying both political and epistemological borders offering alternatives to the global capitalist order that are imperceptible through the modernist lens Informed by a world historical perspective contributors explain today s struggles as building upon the experiences of the past while also coming together globally in ways that are inspiring innovation and consolidating new thinking about what a fundamentally different more equitable just and sustainable world order might look like This collection offers new insights into contemporary movements for global justice challenging readers to appreciate how modernist thinking both colors our own observations and complicates the work of activists seeking to resolve inequities and contradictions that are deeply embedded in Western cultural traditions and institutions Contributors consider today s movements in the longue dur e that is they ask how Occupy Wall Street the Arab Spring and other contemporary struggles for liberation reflect build upon or diverge from anti colonial and other emancipatory struggles of the past Critical to this volume is its exploration of how divisions over gender equity and diversity of national cultures and class have impacted what are increasingly intersectional global movements The contributions of feminist and indigenous movements come to the fore in this collective exploration of what the movements of yesterday and today can contribute to our ongoing effort to understand the dynamics of global transformation in order to help advance a more equitable just and ecologically sustainable world Routledge Handbook of World-Systems Analysis Salvatore

Global Inequalities in World-Systems Perspective Manuela Boatca,Andrea Komlosy,Hans-Heinrich Nolte,2017-09-22 During its 500 year history the modern world system has seen several shifts in hegemony Yet since the decline of the U S in the 1970s

no single core power has attained a hegemonic position in an increasingly polarized world As income inequalities have become more pronounced in core countries especially in the U S and the U K global inequalities emerged as a new topic of social scientific scholarship ignoring the constant move toward polarization that has been characteristic of the entire modern world system At the same time the rise of new states most notably the BRICS and the relative economic growth of particular regions especially East Asia have prompted speculations about the next hegemon that largely disregard both the longue durée of hegemonic shifts and the constraints that regional differentiations place on the concentration of capital and geopolitical power in one location Authors in this book place the issue of rising inequalities at the center of their analyses They explore the concept and reality of semiperipheries in the 21st century world system the role of the state and of transnational migration in current patterns of global stratification types of catching up development and new spatial configurations of inequality in Europe s Eastern periphery as well as the prospects for the Global Left in the new systemic order The book links novel theoretical debates on the rise of global inequalities to methodologically innovative approaches to the urgent task of addressing them
