Ecology Of High Altitude Infancy:

An Ecology of High-Altitude Infancy Andrea S. Wiley, 2004-03-22 Andrea Wiley investigates the ecological historical and socio cultural factors that contribute to the peculiar pattern of infant mortality in Ladakh a high altitude region in the western Himalayas of India Ladakhi newborns are extremely small at birth smaller than those in other high altitude populations smaller still than those in sea level regions Factors such as hypoxia dietary patterns the burden of women s work gender infectious diseases seasonality and use of local health resources all affect a newborn s birth weight and raise the likelihood of infant mortality An Ecology of High Altitude Infancy is unique in that it makes use of the methods of human biology but strongly emphasizes the ethnographic context that gives human biological measures their meaning It is an example of a new genre of anthropological work ethnographic human biology

High Altitude Erik R. Swenson, Peter Bärtsch, 2013-11-26 Over the last decade the science and medicine of high altitude and hypoxia adaptation has seen great advances High Altitude Human Adaptation to Hypoxia addresses the challenges in dealing with the changes in human physiology and the particular medical conditions that arise from exposure to high altitude In depth and comprehensive chapters cover both the basic science and the clinical consequences of exposure to high altitude Genetic cellular organ and whole body system responses to high altitudes are covered and chapters discuss these effects on a wide range of diseases Expert authors provide insight into the care of patients with pre existing medical conditions that fail in some cases to adapt as well as offer insights into how high altitude research can help critically ill patients High Altitude Human Adaptation to Hypoxia is an important new volume that offers a window into greater understanding and more successful treatment of hypoxic human diseases

Care and Agency Jeanine Anderson,Jessaca B. Leinaweaver,2025 This book describes the lives of children in rural communities of the Andes Mountains of Peru It foregrounds the children s own perceptions and feelings so far as they can be known by researchers using ethnographic methods It shows the great variety of Andean childhoods some happy others harsh and demanding and suggests the options children face follow the many to migrate to the city or risk their hopes on a better future in the rural setting

The Handbook of Food and Anthropology Jakob A. Klein,James L. Watson,2016-08-25 Winner of the CHOICE Outstanding Academic Title of the Year Award 2017 Interest in the anthropology of food has grown significantly in recent years This is the first handbook to provide a detailed overview of all major areas of the field 20 original essays by leading figures in the discipline examine traditional areas of research as well as cutting edge areas of inquiry Divided into three parts Food Self and Others Food Security Nutrition and Food Safety Food as Craft Industry and Ethics the book covers topics such as identity commensality locality migration ethical consumption artisanal foods and children s food Each chapter features rich ethnography alongside wider analysis of the subject Internationally renowned scholars offer insights into their core areas of specialty Examples include Michael Herzfeld on culinary stereotypes David Sutton on how to conduct an anthropology of cooking Johan Pottier on food insecurity and Melissa Caldwell on practicing food anthropology The book also features exceptional geographic and cultural diversity with chapters on South Asia South Africa the United States of America post socialist societies Maoist China and Muslim and Jewish foodways Invaluable as a reference as well as for teaching The Handbook of Food and Anthropology serves to define this increasingly

important field An essential resource for researchers and students in anthropology and food studies Medicine Between Science and Religion Vincanne Adams, Mona Schrempf, Sienna R. Craig, 2010-12-01 There is a growing interest in studies that document the relationship between science and medicine as ideas practices technologies and outcomes across cultural national geographic terrain Tibetan medicine is not only known as a scholarly medical tradition among other Asian medical systems with many centuries of technological clinical and pharmacological innovation it also survives today as a complex medical resource across many Asian nations from India and Bhutan to Mongolia Tibet TAR and China Buryatia as well as in Western Europe and the Americas The contributions to this volume explore in equal measure the impacts of western science and biomedicine on Tibetan grounds i e among Tibetans across China the Himalaya and exile communities as well as in relation to globalized Tibetan medicine and the ways that local practices change how such science gets done and how this continually hybridized medical knowledge is transmitted and put into practice As such this volume contributes to explorations into the bi directional flows of medical knowledge and practice **Menopause** Lynnette Leidy Sievert, 2006 Menopause is a biological reality for all women in their forties and fifties Yet the way we think about the cessation of menstruation is influenced by a variety of factors Cultural and technological influences combine with biology to transform this universal phenomenon into an experience that varies considerably between cultures and individuals In this concise book Lynnette Leidy Sievert draws on her own case studies from Puebla Mexico and western Massachusetts as well as on comparative data from other studies in places such as Slovenia Paraguay and Hawaii to explore the different ways that women experience menopause around the world Sievert suggests that attempts by medical professionals to define the normal occurrence of menopause including its typical onset and symptoms may not be realistic when considering how lifestyle nutrition and workload can contribute to diverging realities She explores how women feel about hysterectomies chemotherapy and other medical procedures and treatments that stop menstruation prematurely She also considers recent advances in technology including post menopausal birth which have turned what was previously an unavoidable end of fertility into something that can be postponed A unique comparative look at women s experiences this text brings new perspectives to the mainstream literature on the subject and invites readers to consider compelling questions about menopause its meanings and its future *Possessing Spirits and Healing Selves* R. Seligman, 2014-09-11 Spirit possession involves the displacement of a human s conscious self by a powerful other who temporarily occupies the human s body Here Seligman shows that spirit possession represents a site for understanding fundamental aspects of human experience especially those involved with interactions among meaning embodiment and subjectivity **Re-imagining Milk** Andrea Wiley, 2015-11-19 Milk is a fascinating food it is produced by mothers of each mammalian species for consumption by nursing infants of that species yet many humans drink the milk of another species mostly cows and they drink it throughout life Thus we might expect that this dietary practice has some effects on human biology that are different from other foods In Re

imagining Milk Wiley considers these but also puts milk drinking into a broader historical and cross cultural context In particular she asks how dietary policies promoting milk came into being in the U S how they intersect with biological variation in milk digestion how milk consumption is related to child growth and how milk is currently undergoing globalizing processes that contribute to its status as a normative food for children using India and China as examples Wiley challenges the reader to re evaluate their assumptions about cows milk as a food for humans Informed by both biological and social theory and data Re imagining Milk provides a biocultural analysis of this complex food and illustrates how a focus on a single commodity can illuminate aspects of human biology and culture Human Adaptability, Student Economy Edition Emilio Moran, 2018-10-03 This book focuses on mechanisms of human adaptability It integrates findings from ecology physiology social anthropology and geography around a set of problems or constraints posed by human habitats **The Ends of Kinship** Sienna R. Craig, 2020-10-15 What sustains and remakes family and community through migration For centuries people from Mustang Nepal have relied on agriculture pastoralism and trade as a way of life Seasonal migrations to South Asian cities for trade as well as temporary wage labor abroad have shaped their experiences for decades Yet more recently permanent migrations to New York City where many have settled are reshaping lives and social worlds Mustang has experienced one of the highest rates of depopulation in contemporary Nepal a profoundly visible depopulation that contrasts with the relative invisibility of Himalayan migrants in New York Drawing on more than two decades of fieldwork with people in and from Mustang this book combines narrative ethnography and short fiction to engage with foundational questions in cultural anthropology How do different generations abide with and understand each other How are traditions defended and transformed in the context of new mobilities Anthropologist Sienna Craig draws on khora the Tibetan Buddhist notion of cyclic existence as well as the daily act of circumambulating the sacred to think about cycles of movement and patterns of world making shedding light on how kinship remains both firm and flexible in the face of migration From a high Himalayan kingdom to the streets of Brooklyn and Queens The Ends of Kinship explores dynamics of migration and social change asking how individuals families and communities care for each other and carve out spaces of belonging It also speaks broadly to issues of immigration and diaspora belonging and identity and the nexus of environmental economic and cultural transformation Feminist Geopolitics Deborah P. Dixon, Sallie A. Marston, 2016-09-17 Building on a trans disciplinary feminist project that foregrounds the bodies of those at the sharp end of various forms of international activity such as immigration development and warfare the chapters included in this book cover a variety of sites concerns and hopes These range from the fraught geopolitics of marriage and birth in Ladakh India to the fate of detained migrant children in the U S and from the human rights abuses of women and children in Uzbekistan to the body politics of aid workers in Afghanistan The collective aim is to expose the force relations that operate through and upon those bodies such that particular subjectivities are enhanced constrained and put to work and particular corporealities are violated exploited and often

abandoned Oriented around issues of security population territory and nationalism these chapters expose the proliferating bodies of geopolitics not simply as the bearers of socially demarcated borders and boundaries but as vulnerable corporealities seeking to negotiate and transform the geopolitics they both animate and inhabit This book was originally published as a special issue of *Gender Place and Culture A Journal of Feminist Geography*

Human Growth and Development Noel Cameron, Lawrence Schell, 2021-11-18 Human Growth and Development Third Edition provides a comprehensive volume covering the biology of human growth and the genetic endocrine environmental nutritional and socio economic factors that contribute towards its full expression Human Growth and Development continues to be a valuable resource for researchers professors and graduate students across the interdisciplinary area of human development For the new edition updates are made to all fourteen of the core chapters of the book which form the essential reading for a comprehensive understanding of human growth and development Additionally new special topics are covered including the interpretation of recently found sub adult fossils that expand our understanding of the evolution of human growth and a discussion of the early pattern of growth and development as the developmental origins of risk for non communicable diseases of adulthood Human Growth and Development Third Edition includes contributions from the well known experts in the field and is the most reputable comprehensive resource available New chapters include the impact of physical activity across childhood and adolescence information on the evolution of the human growth pattern and the contribution of epigenetics to our understanding of human growth Offers the necessary tools to connect human development data with predictive medicine Provides extensive depth on content in the form of easily digestible lecture length chapters

Tibetan Transitions Geoff Childs, 2008-07-25 Tibetan Transitions uses the dual lenses of anthropology and demography to analyze population regulating mechanisms in traditional Tibetan societies and to link recent fertility transitions with family systems economic strategies gender equity and family planning ideologies

The Anthropology of Childhood David F. Lancy, 2022-03-10 How are children raised in different cultures What is the role of children in society How are families and communities structured around them Now in its third edition this deeply engaging book delves into these questions by reviewing and cataloging the findings of over 100 years of anthropological scholarship dealing with childhood and adolescence It is organized developmentally moving from infancy through to adolescence and early adulthood and enriched with anecdotes from ethnography and the daily media to paint a nuanced and credible picture of childhood in different cultures past and present This new edition has been expanded and updated with over 350 new sources and introduces a number of new topics including how children learn from the environment middle childhood and how culture is transmitted between generations It remains the essential book to read to understand what it means to be a child in our complex ever changing world

The Anthropology of Learning in Childhood David F. Lancy, John Bock, Suzanne Gaskins, 2010-01-15 The Anthropology of Learning in Childhood offers a large mural like portrait of childhood across time culture species and

environment Even a casual reading of the literature on childhood will persuade one that learning is a very important topic that commands the attention of tens of thousands of scholars and practitioners Yet anthropological research on children has exerted relatively little influence on this community This book will change that The book demonstrates that anthropologists studying childhood can offer a description and theoretically sophisticated account of children s learning and its role in their development socialization and enculturation Further it demonstrates the particular contribution that children s learning makes to the construction of society and culture as well as the role that culture acquiring children play in human evolution Chapters have been contributed in archaeology primatology biological and cultural anthropology and cross cultural psychology

Handbook of South American Archaeology Helaine Silverman, William Isbell, 2008-04-04 Perhaps the contributions of South American archaeology to the larger field of world archaeology have been inadequately recognized If so this is probably because there have been relatively few archaeologists working in South America outside of Peru and recent advances in knowledge in other parts of the continent are only beginning to enter larger archaeological discourse Many ideas of and about South American archaeology held by scholars from outside the area are going to change irrevocably with the appearance of the present volume Not only does the Handbook of South American Archaeology HSAA provide immense and broad information about ancient South America the volume also showcases the contributions made by South Americans to social theory Moreover one of the merits of this volume is that about half the authors 30 are South Americans and the bibliographies in their chapters will be especially useful guides to Spanish and Portuguese literature as well as to the latest research It is inevitable that the HSAA will be compared with the multi volume Handbook of South American Indians HSAI with its detailed descriptions of indigenous peoples of South America that was organized and edited by Julian Steward Although there are heroic archaeological essays in the HSAI by the likes of Junius Bird Gordon Willey John Rowe and John Murra Steward states frankly in his introduction to Volume Two that arch ology is included by way of background to the ethnographic chapters

Different Faces of Attachment Hiltrud Otto, Heidi Keller, 2014-07-17 Attachment between an infant and his or her parents is a major topic within developmental psychology An increasing number of psychologists evolutionary biologists and anthropologists are articulating their doubts that attachment theory in its present form is applicable worldwide without however denying that the development of attachment is a universal need This book brings together leading scholars from psychology anthropology and related fields to reformulate attachment theory in order to fit the cultural realities of our world Contributions are based on empirical research and observation in a variety of cultural contexts They are complemented by careful evaluation and deconstruction of many of the underlying premises and assumptions of attachment theory and of conventional research on the role of infant parent attachment in human development The book creates a contextual cultural understanding of attachment that will provide the basis for a groundbreaking reconceptualization of attachment theory
