Zamir,Doron Teichman,2018 In the past few decades economic analysis of law has been challenged by a growing body of experimental and empirical studies that attest to prevalent and systematic deviations from the assumptions of economic rationality While the findings on bounded rationality and heuristics and biases were initially perceived as antithetical to standard economic and legal economic analysis over time they have been largely integrated into mainstream economic analysis including economic analysis of law Moreover the impact of behavioral insights has long since transcended purely economic analysis of law in recent years the behavioral movement has become one of the most influential developments in legal scholarship in general Behavioral Law and Economics offers a state of the art overview of the field Eyal Zamir and Doron Teichman survey the entire body of psychological research that lies at the basis of behavioral analysis of law and critically evaluate the core methodological questions of this area of research Following this the book discusses the fundamental normative questions stemming from the psychological findings on bounded rationality and explores their implications for setting the law s goals and designing the means to attain them The book then provides a systematic and critical examination of the contributions of behavioral studies to all major fields of law including property contracts consumer
