## **Economic And Political Roots Of The New Protectionism:**

*The Economic and Political Roots of the New Protectionism* Sima Lieberman, 1988 In this volume the author presents the hypothesis that during the 19th and 20th centuries political and industrial leaders of Western industrialized economies supported free trade policies only as long as their production and sales were not threatened by significant foreign competition When their economic hegemony was challenged the same nations enacted protectionist measures By integrating the historic and political factors that affected Western commercial policy in the course of two centuries the author gives a broad perspective to the study of international trade in the 19th and 20th centuries and demonstrates the relevance of noneconomic variables in the economic history of this period *Economic Discrimination and Political Exchange* Kenneth A. Oye, 2021-03-09 Did bilateral and regional bargaining choke off international commerce and finance in the 1930s and prolong the Great Depression Is the open world economic system now being placed at risk by explicitly discriminatory practices that erode respect for the GATT the IMF and the IBRD Most political economists would answer in the affirmative warning that bilateral and regional preferences are at best inefficient and at worst catastrophic By contrast Kenneth Oye shows how economic discrimination can foster international economic openness by facilitating political exchange **Brazil in the**

**Uruguay Round of the GATT** Ricardo Wahrendorff Caldas, 2018-12-14 First published in 1998 this volume analyses Brazil's strategy in the Uruguay Round focusing on the issue of services Three different moments were chosen for analysis The first was during discussions before the launch of the Uruguay Round During this period Brazil led the Less Developed Countries LDCs in obstructing the inclusion of services on the agenda The Second was during the launch of the Uruguay Round when Brazil persisted with this policy This second period is referred to as the initial position of Brazil in the Uruguay Round The third was Montreal in 1988 when Brazil supported the principles which guided an agreement on services After this turning point Brazil's position in the Round was increasingly supportive of an agreement not only in services but in all fields

Globalization is completely revised and updated to include new material on trade monetary and environmental issues It provides a comprehensive treatment of major developments in the global economy and is suitable for adoption as a primer in undergraduate courses in international political economy The author takes a stand that is supportive of globalization in principle while acknowledging that there are many areas of inequity that disadvantage developing countries This is explored in chapters that deal with trade debt crises and the environment Students will find that the material is presented in a readable format that does not presuppose prior familiarity with economics

British Weapons Acquisition Policy and the Futility of Reform Warren A. Chin, 2019-09-17 Originally published in 2004 This incisive work reveals the causes of escalating costs and delays in British defence procurement from 1945 to the present Tackling a complex subject in a straightforward and readable manner it considers how successive British governments reacted to this problem why they adopted the reforms they did and why these reforms failed to have any meaningful effect on the operation of this process The study draws upon a number of disciplines such as economics politics and science and engineering to provide a broad synthesis that allows the reader to understand the technicalities of the process The conclusion reached is that there is no apparent solution to the problem of intergenerational costs of weapons but that a key to controlling the growing cost of projects during their development lies in the construction of a more effective research and development strategy a path followed by Margaret Thatcher's predecessors and one that is also being advocated today

Encyclopedia of Government and Politics M. E.

Hawkesworth, Maurice Kogan, 1992      *From the Ashes of History* Adam B. Lerner, 2022 In recent years calls for reparations and restorative justice alongside the rise of populist grievance politics have demonstrated the stubborn resilience of traumatic memory From the transnational Black Lives Matter movement's calls for reckoning with the legacy of slavery and racial oppression to continued efforts to secure recognition of the Armenian genocide or Imperial Japan's human rights abuses international politics is replete with examples of past violence reasserting itself in the present But how should scholars understand trauma's long term impacts Why do some traumas lie dormant for generations only to surface anew in pivotal moments And how does trauma scale from individuals to larger political groupings like nations and states shaping political identities grievances and policymaking In *From the Ashes of History* Adam B Lerner looks at collective trauma as a foundational force in international politics a shock to political cultures that can constitute new actors and shape decision making over the long term As Lerner shows uncovering collective trauma's role in international politics is vital for two key reasons First it can help explain longstanding tensions between groups an especially relevant topic as scholars examine the transnational resurgence of nationalism and populism Second it pushes the discipline of International Relations to more completely account for mass violence's true long term costs particularly as they become embedded in longstanding structural inequalities and injustices While IR scholarship has largely dismissed non systematic latent phenomena like trauma Lerner argues that collective trauma can help draw the lines between international political groups and frame the logics of international political action Drawing on three historical cases that uncover the impact of collective trauma in Indian Israeli and American foreign policymaking *From the Ashes of History* demonstrates the broad utility of collective trauma as a theoretical lens for investigating how mass violence's legacy can resurge and dissipate over time      [The Best Books for Academic Libraries: Social sciences](#) ,2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers      **Free Trade and its Reception 1815-1960** Andrew Marrison, 2002-01-08 This book examines the Corn Laws and their repeal It brings together leading international experts working in the field from Britain Europe and the United States Their contributions range widely over the history politics and economics of free trade and protectionism in the nineteenth and twentieth centuries together they provide a landmark study of a vitally important subject and one which remains at the top of today's international agenda      *A History of Economic Theory and Method* Robert B.
