Social Sector in a Decentralized Economy Pinaki Chakraborty,Lekha Chakraborty,Anit Mukherjee,2016-03-11 This book is an analytical examination of financing and public service delivery challenges in a decentralized framework It also provides critical insights into the effectiveness of public expenditure through benefit incidence analysis of education and healthcare services in India The benefits of decentralization always come with conflicts and trade offs By unpacking the process of decentralization the authors identify that unfunded mandates arising from the asymmetry between finances and functions at local levels are a major challenge The analysis is carried out by distilling the existing studies in this area and through an empirical investigation of public finance data at different public sector levels in India as well as in some selected developing countries Using the household survey statistics of consumption expenditure an analysis of utilization or benefit incidence of public spending on social sectors in India is achieved covering education and health sectors This title is available as Open Access on Cambridge Core **The Politics of Educational Decentralisation in Indonesia** Irsyad

Zamjani,2021-12-10 The Politics of Educational Decentralisation in Indonesia A Quest for Legitimacy is a well written analytically sharp and compelling study of educational decentralisation in Indonesia Irsyad Zamjani provides fresh insights into this important topic The author treats educational reform as a window into much deeper questions about power the government s responsibility to its citizens and social change in Indonesia His findings should interest academics as well as practitioners with an interest in educational reform Professor Christopher Bjork Vassar College New York This is a remarkable book which should appeal not only to Indonesian scholars but also to educationists and political scientists to name just a few By tracing the path of decentralisation in the Indonesian educational reform in the early 2000s Zamjani shows how the central and municipal governments struggled in different ways to retain control over education in their

domains through various mechanisms largely related to claims of legitimacy The study is grounded in new institutional theory and the interview and case study data provide a richness and depth in showing the dynamics of reform attempts Professor Lawrence J Saha Australian National University Canberra This book discusses the dynamics of educational decentralisation in post reform Indonesia Taking sociology s new institutionalism approach and drawing upon data from documents and interviews with strategic informants the book investigates how institutional legitimacy of educational decentralisation was garnered manipulated and then contested Besides analysing global institutional pressures which influenced the national adoption of decentralisation reform and the central government s attempts to restore its legitimacy the book also offers comparative case studies of education governance in two local districts to highlight how this reform is responded to at the local level

The African Journal of Finance and Management , 2003 *Eliminating Human Poverty* Santosh Mehrotra, Enrique Delamonica, 2008-02-29 This book focuses on the provision of basic social services in particular access to education health and water supplies as the central building blocks of any human development strategy The authors concentrate on how these basic social services can be financed and

delivered more effectively to achieve the internationally agreed Millennium Development Goals Their analysis which departs from the dominant macro economic paradigm deploys the results of broad ranging research they led at UNICEF and UNDP investigating the record on basic social services of some 30 developing countries In seeking to learn from these new data they develop an analytical argument around two potential synergies at the macro level between poverty reduction human development and economic growth and at the micro level between interventions to provide basic social services Policymakers they argue can integrate macro economic and social policy Fiscal monetary and other macro economic policies can be compatible with social sector requirements They make the case that policymakers have more flexibility than is usually presented by orthodox writers and international financial institutions and that if policymakers engaged in alternative macro economic and growth oriented policies this could lead to the expansion of human capabilities and the fulfillment of human rights This book explores some of these policy options The book also argues that more than just additional aid is needed Specific strategic shifts in the areas of aid policy decentralized governance health and education policy and the private public mix in service provision are a prerequisite to achieve the goals of human development The combination of governance reforms and fiscal and macro economic policies outlined in this book can eliminate human poverty in the span of a generation

must rethink the traditional utility business model How will they find sufficient revenues to cover their fixed and variable costs as volumetric consumption declines when some consumers become prosumers or go a step further and become prosumagers This work argues that new service business models and new methods for collecting sufficient revenues to maintain the network are mandatory for the survival of modern utilities Examines the future of services demanded by electricity customers as some diverge from their traditional total reliance on the network for delivery of all their service needs Reviews the emergence of new business models to meet the diverging needs of customers Explores the costs imposed by new types of customers on the delivery network and how to collect sufficient revenues from all to maintain it in ways that are efficient equitable and fair
