An introductory chapter describes the role of biography in the study of marketing thought and introduces the eight subjects in this collection. Subsequent chapters describe the lives of Edward David Jones, Simon Litman, Henry Charles Taylor, Percival White, George Burton Hotchkiss, Theodore N. Beckman, David D. Monieson, and William R. Davidson, focusing on their intellectual and professional contributions to the marketing discipline. The biographies are based on rare archival materials, some personal interviews, and analysis of the subjects' major works. The final chapter draws lessons from the collection for marketing students and teachers. Several important discoveries are reported that suggest opportunities for further research. Religion and Economics: Normative Social Theory J.M. Dean, A. M. C. Waterman, 2012-12-06 Normative Social Theory James M. Dean and A. M. C. Waterman University of Manitoba 1 Economics and Religion Once Again This book is a sequel to *Economics and Religion: Are They Distinct?* Brennan and Waterman 1994. That volume was motivated by a frustration born of many disappointing encounters between economists and theologians in the 1980s. Can bishops, synods, and other voices of organized religion bring any interesting and disinterested contribution to the public policy debate? If so, what is the relation of their contribution to that of the purely secular knowledge economists believe they can supply? Can economists bring any interesting and disinterested contribution to the public policy debate? If so, what is the relation of their contribution to the fundamental values that inform social ethics and that are still guarded to a large extent by religious tradition? All too often the two sides talked at cross purposes. Well-intentioned economists coexisted for a few hours or days with well-intentioned theologians whose manner of conceiving social reality was radically incompatible with their own. There seemed to be no common ground. The first requisite of any genuine conversation is an agreed conceptual framework that is able to accommodate the peculiar social vision both of the economist and of the theologian and to display the logical relation between the two.

Contemporary Issues in Business Ethics Mary W. Vilcox, Thomas O. Mohan, 2007 Business ethics is a form of the art of applied ethics that examines ethical rules and principles within a commercial context, the various moral or ethical problems that can arise in a business setting, and any special duties or obligations that apply to persons who are engaged in commerce. Business ethics can be both a normative and a descriptive discipline. As a corporate practice and a career specialisation, the field is primarily normative. In academia, descriptive approaches are also taken. The range and quantity of business ethical issues reflects the degree to which business is perceived to be at odds with non-economic social values. Historically, interest in business ethics accelerated dramatically during the 1980s and 1990s, both within major corporations and within academia. For example, today most major corporate websites lay emphasis on commitment to

promoting non economic social values under a variety of headings e g ethics codes social responsibility charters In some cases corporations have redefined their core values in the light of business ethical considerations Catching business ethics in action however remains a seldom spotted nugget for in reality it depends on the characters of the characters **The Oxford Handbook of Entrepreneurship** Mark Casson,2008 Entrepreneurship is a key factor in economic growth innovation the development of firms businesses Written by leading scholars this book presents a comprehensive review of the research in entrepreneurship Marketing Performativity Katy Mason,Hans Kjellberg,Johan Hagberg,2018-10-11 Marketing Performativity Theories practices and devices addresses concerns about the theory practice gap so often discussed by marketing scholars and indeed reframes this gap by asking how is marketing theory performative How does marketing theory shape action Who uses it in practice and to what effects The individual contributions in this book look at how marketing theories are used in practice and what this means for our understanding of the practicing theorising landscape of marketing The book begins by considering what performativity is and how this concept is used in the marketing literature It then considers three themes concerning the performativity of marketing that emerge from the contributions before presenting ten empirical studies that ask how why and to what effect marketing theories are used and performed in marketing practice The book also summarises the implications of three themes and sketches research areas for further developing our understanding of the performativity of marketing This book was originally published as a special issue of the Journal of Marketing Management **Managerial Economics** Donald N. Stengel,2011-06-30 If you have good economic principles then more than likely you re making good business decisions Although economics is sometimes dismissed as a discourse of practical relevance to only a relatively small circle of academicians and policy analysts who call themselves economists sound economic reasoning benefits any manager of a business whether they are involved with production and operations marketing finance or corporate strategy This highly respected text will help you and any business manager with managerial economics which is the application of microeconomics to business decisions Inside you ll learn about the key relationships between price quantity cost revenue and profit which are detailed for an individual firm in the form of simple conceptual models The book includes key elements from the economics of consumer demand and the economics of production It also discusses economic motivations for expanding a business and contributions from economics for improved organization of large firms as well as market price quantity equilibrium competitive behavior and the role of market structure on market equilibrium and competition It concludes by considering market regulation in terms of the generic problems that create the need for regulation and possible remedies for those problems
