International Economic Policy in the 1990s William R. Cline, 1994 These eight lectures by noted economist William Cline provide a clear and concise account of some of the most important macroeconomic issues facing the world economy Designed for the nonspecialist but a source of fresh insight for the specialist as well the lectures synthesize the major trends in international economic policy for the 1990s Major themes include domestic and international economic stagnation adjustment to external imbalances trade policy including case studies of Japan and NAFTA the debt crisis reform in former communist states the economic future of Europe and environmental policy Cline who has made important contributions to the topics addressed reviews the forces that have contributed to policy problems and then evaluates the prospects for resolution He shows how an understanding of economics can help break down many policy problems into simple fundamentals and how empirical evidence is the acid test of any policy theory Cline s coverage of many of today s hot public policy issues is unique both in its accessibility and in its broadbrush approach to a set of concerns of immediate interest to economists policymakers and others concerned with international economic policy

Economic Policies for Sustainable Development Thomas Sterner, 2012-12-06 This book focuses on describing policy instruments in different countries Its purpose is not only descriptive but also to some extent advocacy We believe that economic instruments can make an important contribution to an environmentally less disruptive path of development The design of economic instruments is however a fine art and depends among other things on their political acceptability and this acceptability is of course influenced by experience It is therefore important to provide information on the use of policy instruments in other countries Policies are currently developing quite fast and thus a book such as this one can inevitably not capture more than a snapshot view at a single

moment of time We would hope that the book encourages more experimentation with economic instruments and that countries will make a fuller use of the whole arsenal of economic policy instruments If the book does succeed in this sense then it will soon become dated as policies change but that would be a price well worth paying The book combines a dozen country monographs together with a few international surveys on particular topics gasoline pricing vehicle regulations acid rain deforestation and global warming These papers are intended to illustrate the diversity of policy options available The actual policies adopted depend on economic as well as ecological conditions The country studies cover two Western countries and then concentrate on formerly planned and developing countries They show that economic instruments are still generally thought of as new and innovative
