Borowiecki,Charles M. Gray,James Heilbrun,2023-09-28 Spanning the economics of the fine arts performing arts and public policy this updated classic is the go to resource for navigating today s creative industries Building on real world data engaging case studies and cutting edge research it prepares students for careers in the cultural creative and public sectors By avoiding mathematical treatments and explaining theories with examples this book develops theoretical concepts from scratch making it accessible to readers with no background in economics While most of the theory remains timeless this new edition covers changes in the world s economic landscapes Updates include new sections on gender representation cultural districts and tourism digital broadcasting and streaming how technology impacts the arts and arts management and strategy The authors demonstrate data driven decision making using examples and cases from various databases Students learn to assess academic results and apply the learned material using the discussion questions and problem sets      Liberal Learning and the Art of Self-Governance Emily Chamlee-Wright,2015-11-19 Concerns over affordability and accountability have tended to direct focus away from the central aims of liberal learning such as preparing minds for free inquiry and inculcating the habits of mind practical skills and values necessary for effective participation in civil society The contributors to this volume seek to understand better what it is that can be done on a day to day basis within institutions of liberal learning that shape the habits and practices of civil society The central argument of this volume is that institutions of liberal learning are critical to a developing and flourishing civil society It is within these civil society incubators that the habits of open discourse are practiced and honed that a collaborative often contentious commitment to truth seeking serves as the rules that govern our work together that the rules of personal and widespread social cooperation are established practiced and refined Many have made this argument as it relates to community based learning and we explore that theme here as well But acquiring and practicing the habits of civil society recur within and throughout the college context in the classrooms in college governance structures in professional associations in collaborative research in the residence halls and on the playing field To put it another way when they are at their best institutions of liberal learning are contexts in which students learn how to live in a free society and learn the art of self governance      **Handbook of the Economics of Art and Culture** ,2013-09-16 This volume emphasizes the economic aspects of art and culture a relatively

new field that poses inherent problems for economics with its quantitative concepts and tools Building bridges across disciplines such as management art history art philosophy sociology and law editors Victor Ginsburgh and David Throsby assemble chapters that yield new perspectives on the supply and demand for artistic services the contribution of the arts sector to the economy and the roles that public policies play With its focus on culture rather than the arts Ginsburgh and Throsby bring new clarity and definition to this rapidly growing area Presents coherent summaries of major research in art and culture a field that is inherently difficult to characterize with finance tools and concepts Offers a rigorous description that avoids common problems associated with art and culture scholarship Makes details about the economics of art and culture accessible to scholars in fields outside economics
