Super Inequality: Theoretical Essays in Economics and Social Policy Christian Aspalter, 2023-09-16 This book bridges the disciplines of micro economics and social policy in general and in particular behavioral explanatory social policy and public choice theory plus Leibenstein's X efficiency theory Being trained as an economist and social policy scientist the author leaps out of the comfort zone of most social policy scientists and experts right into the exciting world of micro economic theory and then extending and connecting those theories to explain major social political and economic conundrums of our time In doing so the book offers a new set of theoretical and practical explanations derived from the general proposition of micro economic theory of how government officers policymakers administrators and the people themselves alike are by and large motivated in their daily as well as strategic long term decision making Using a meta analytical approach based on a number of grand theories this book also explains systemic factors behind human behavior and the thereof resulting shortcomings in lifetime outcomes health wealth and happiness of a person and at the same time societal policy making and economic outcomes on societal level and in global comparison The outcomes thereof can be measured exactly and hence validated especially through the method of empirical comparative social science economic research Here the author also but not only introduces the new method of using Aspalter's Standardized Relative Performance SRP Index in measuring exactly complex aggregate performances of multiple
