J. Renier,2016-04-14 This treatise of historical methodology originally published in 1950 is based upon a liberal conception of history which excludes no narrator of past events from the ranks of historians It defines history as the accurate story which preserves the memory of the past experiences of human societies The function of history determines its method and provides the answer to the question how secure is our knowledge of the past In the author's view history is empirical and its results are for ever provisional The relative merits of dogmatism and scepticism are examined and several interpretations among English historians are scrutinized **Hearings, Reports and Prints of the Joint Economic Committee** United States. Congress. Joint Economic Committee,1962 **HIV/AIDS in the Post-HAART Era** John C. Hall,Brian John Hall,Clay J. Cockerell,2011 The science of the virus and its effects and the clinical approaches to its treatment and transmission prevention are placed in the context of the history and epidemiology of the HIV AIDS pandemic Each organ system of the body is explored as to manifestations of the disease treatment now and in the future as well as what the disease has taught us about the immune response The science of epidemiology which is so important in allowing for tracking of the disease and potential limitation of transmission is another aspect of AIDS explored in detail The pandemic manifests differently in different parts of the world and the relevance of the volume is enhanced by its international group of contributors No other text provides the historical and epidemiological context of this disease along with an update of diagnosis and treatment The underlying science and epidemiology of AIDS are not neglected so the student or clinician who is treating patients with AIDS can gain a full understanding of HIV AIDS in individual patients and in their communities

Economics in Persian-Period Biblical Texts Peter Altmann, 2016-10-26 Large scale economic change such as the rise of coinage occurred during the Persian dominated centuries 6th-4th centuries BCE in the Eastern Mediterranean and ancient Near East How do the biblical texts of the time respond to such developments In this study Peter Altmann lays out foundational economic conceptions from the ancient Near East and earlier biblical traditions in order to show how Persian period biblical texts build on these traditions to address the challenges of their day Economic issues are central for how Ezra and Nehemiah approach the topics of temple building and of Judean self understanding and economics are also important for other Persian period texts Following significant interaction with the material culture and extra biblical texts the author devotes special attention to the ascendancy of economics and its theological and identity implications as structuring metaphors for divine action and human community in the Persian period

The Types of Economic Policies under Capitalism Uno Kōzō, 2017-06-01 Uno who proposes to study capitalism at three distinct levels of abstraction insists that there should be a mid range theory of its developmental stages danka ron between the pure theory of capital which must be couched in the form of Hegelian dialectic genriron and capitalist histories which must be recounted with full empirical detail In this book he illustrates how he would himself expose that mid range theory by summarising the three types of economic policy that the bourgeois state successively adopted mercantilism liberalism and imperialism He

moreover indicates that economics can relate and cross fertilise with other branches of social science such as law and politics only at this level of abstraction thus achieving an adequate theory of the bourgeois state Nowhere else is Marx's insight into the state as the epitome of bourgeois society more vividly endorsed than in this book First published in Japanese as Keizai Seisakuron by Kobundo Ltd in 1936 The current work is a translation of the enlarged and revised edition of 1971
