Society and Economy in Modern Britain 1700-1850 Richard Brown,2002-11-01 For both contemporaries and later historians the Industrial Revolution is viewed as a turning point in modern British history There is no doubt that change occurred but what was the nature of that change and how did affect rural and urban society Beginning with an examination of the nature of history and Britain in 1700 this volume focuses on the economic and social aspects of the Industrial Revolution Unlike many previous textbooks on the same period it emphasizes British history and deals with developments in Wales Scotland and Ireland in their own right It is the emphasis on the diversity not the uniformity of experience on continuities as well as change in this crucial period of development which makes this volume distinctive In his companion title Richard Brown completes his examination of the period and looks at the changes that took place in Britain s political system and in its religious affiliations

The Ethical Economy of Conflict Prevention And Development Ralf Bredel,2007 Central to the current development debate is the importance of human welfare in the context of group conflict When considering ethnic racial and religious conflict this debate draws us toward a political economy of conflict Moreover notions of an economic paradigm have become prominent when international organizations debate conflict prevention In looking closer at the political economy of conflict this publication argues the need to assimilate into our thinking distinct social and ethical economies of conflict prevention A social economy of conflict prevention considers the interplay of economic with structural and cultural factors in conflict explaining a much neglected category of conflict i e hidden conflict The ethical economy of conflict prevention considers implicit ethical statements development practitioners use From these statements arise ethical paradoxes that influence the evolving economic paradigm in such way as to contradict one of its intrinsic desires namely to restrict conflict prevention strategies to effective technical interventions Eventually such narrow focus on technical interventions could identify this evolving paradigm as an economical paradigm In contrast a rethinking of

the ethical economy of conflict prevention provides a useful tool for international organizations when implementing a human rights based approach to development and long term conflict prevention

Can the Working Class Make a Socialist Revolution? Ernest Mandel, George Novack, 2002 *The Political Economy of the Family Farm* Sue Headlee, 1991-11-30

Agriculture played an important role in the transition to capitalism in the United States in the mid nineteenth century In her study Sue Headlee argues that the family farm system with its progressive nature and egalitarian class structure revolutionized this transition to capitalism The family farm is examined in light of its economic and political implications showing the relationship between the family farm and fledgling industrial capitalism a relationship that fostered the simultaneous industrial and agricultural revolutions and the creation of an agro industrial complex Headlee focuses on the adoption of the horse drawn mechanical reaper to harvest wheat by family farmers in the 1850s The neoclassical economic explanation with its emphasis on the farm as a profit maximizing firm is criticized for its lack of recognition of the role of the family farm s egalitarian class structure This look at the economic history of the United States has lessons for the Third World today agricultural development is vital to the transition to capitalism the agrarian class structures of Third World countries may be holding back that transition and a family farm land reform approach would lead to increases in productivity and in the material well being of society Headlee s analysis supports three important debates in political economy thus providing the historical and theoretical context for understanding the role of agriculture in the transition to capitalism in general and in the particular case of the United States Her findings conclude that agrarian class structures can explain the differential patterns of development in pre industrial Europe Further evidence is presented that the internal class structure of agrarian society is the crucial causal factor in the transition to capitalism and that market developments alone are not sufficient Lastly and most controversially Headlee acknowledges the importance of the Civil War in propelling the triumph of American capitalism allowing the Republican Party an alliance of family farmers and industrial capitalists to take control of the state from the Democratic Party of the southern plantation owners This book will be of interest to scholars in political economy economic history agrarian economics and development economics

Challenge of Class Analysis Wallace Clement, 1988-10-15 Clement uses class analysis to explore the complexities of contemporary Canadian society in this revealing study He also explores the relationship between class and gender ethnicity and region comparing illustrations from Canada with those from countries such as Sweden and the U S An extensive review of material on class in Canada is provided *The Peasant Economy and Social Change in North China* Philip

Huang,1985-06-01 The author presents a convincing new interpretation of the origins and nature of the agrarian crisis that gripped the North China Plain in the two centuries before the Revolution His extensive research included eighteenth century homicide case records a nineteenth century country government archive large quantities of 1930 s Japanese ethnographic materials and his own field studies in 1980 Through a comparison of the histories of small family farms and larger scale managerial farms the author documents and illustrates the long term trends of agricultural commercialization social stratification and mounting population pressure in the peasant economy He shows how those changes in the absence of dynamic economic growth combined over the course of several centuries to produce a majority not simply of land short peasants or of exploited tenants and agricultural laborers but of poor peasants who required both family farming and agricultural wage income to survive This interlocking of family farming with wage labor furnished a large supply of cheap labor which in turn acted as a powerful brake of capital accumulation in the economy The formation of such a poor peasantry ultimately altered both the nature of village communities and their relations with the elites and the state creating tensions that led in the end to revolution *Fundamentals of Political Economy* Xiaohu (Shawn) Wang,K K Fung,2017-10-03 This title was first published in 1977
