Medicine Meets Virtual Reality 16 James D. Westwood, 2008 We humans are tribal grouping ourselves by a multitude of criteria physical intellectual political emotional etc The Internet and its auxiliary technologies have enabled a novel dimension in tribal behavior during our recent past This growing connectivity begs the question will individuals and their communities come together to solve some very urgent global problems At MMVR we explore ways to harness information technology to solve healthcare problems and in the industrialized nations we are making progress In the developing world however things are more challenging Massive urban poverty fuels violence and misery Will global networking bring a convergence of individual and tribal problem solving Recently a barrel shaped water

carrier that rolls along the ground was presented improving daily life for many people Also the One Laptop per Child project is a good example of how the industrialized nations can help the developing countries They produce durable and simple laptops which are inexpensive to produce At MMVR we focus on cutting edge medical technology which is generally pretty expensive While the benefits of innovation trickle downward from the privileged few to the broader masses we should expand this trickle into a flood Can breakthrough applications in stimulation visualization robotics and informatics engender tools as ingeniously as the water carrier or laptop With some extra creativity we can design better healthcare for the developing world too
