Electrical And Electronic Measurements A S K Bhattacharya, Electrical and Electronic Measurement and Instrumentation is one of the core subjects taught to Electrical Electronic and Instrumentation students at B Tech and other equivalent levels. The content of this book has been prepared after consulting the syllabuses of a large number of Indian universities. Although books are available on this subject, it was felt necessary to prepare the one that exactly responds to the students' learning needs and to create their interest in this subject. Thus the presentation here has been especially made simple and easy to understand.

Electronic Test Instruments Robert A. Witte, 1993. The purpose of this new work is twofold: first to enable the user to move from understanding basic electronics to understanding how electric theory relates to practical electronic measurements, and second to give the user knowledge of what instruments are available, their advantages and disadvantages, and how to choose the right class of instrument for a particular job. It provides a breadth of coverage not readily found elsewhere, including functional descriptions of voltmeters, ammeters, ohmmeters, signal sources, oscilloscopes, frequency counters, circuits for electronic measurements, frequency domain instruments, and logic analyzers. This volume will be of practical use to electrical engineers and technicians who understand basic electronics and want to learn more about electronic measurements.

Elements of Electronic Instrumentation and Measurement, 3e Carr, Book is appropriate as a primary text for courses in instrumentation and may also be used as a parallel reader in lab courses in instrumentation. Secondly, it is also appropriate for courses in which the study of electronics instruments or measurement is integral. The text provides a readable introduction to ordinary workshop and laboratory instrumentation. Material is presented through a careful blend of theory and practice to provide a practical text for students who will soon be in the real world working with electronics.
