Digital Libraries Judith Andrews, 2017-05-15 *Digital Libraries Policy Planning and Practice* brings together a wealth of international experience in the planning and implementation of digital and hybrid library projects providing a stimulating and informative handbook and reference for library staff and information managers. It consists of chapters contributed by leading specialists from Europe, North America, South Africa and the Middle East who offer their insight into the decision making processes that have shaped a variety of different digitization programmes. Beginning with introductory overviews of the digital library context, the US Digital Library Program and the UK e lib and hybrid library programmes, *Digital Libraries* then divides into two main sections on policy and planning and implementation and practice. The first explores concerns such as financial and resource planning, digitized compared to born digital content and related service issues, open access to scholarly research archives, policies for and against preservation and their justification and evaluating electronic information services. The second section is based on case studies on major European and North American digital library projects including the Glasgow Digital Library, UCEEL, University of Central England, Electronic Library, the Networked Digital Library of Theses and Dissertations, discussed in the context of five international projects: the Indiana University music Variations and Variations2 Project and the beginnings of the Library of Congress digital program and its integration into core library services. The concluding chapter discusses the way forward for digital libraries in the context of experiences at Tilburg University library and possible enabling or limiting factors in the future. The result of drawing together these varied and illuminating experiences is a book that offers useful information and comparisons for all digital library project staff, institutional administrators, educators and developers of learning technology. It also provides useful pointers for researchers and project staff involved in archive and museum projects as well as introducing students to the key ingredients of successful digital libraries.

Introduction to Digital Libraries Gobinda G. Chowdhury, Sudatta Chowdhury, 2003. This book presents a holistic view of the new digital library scene; it is an essential guide to good digital practice and techniques. Back cover. *Digital Libraries* Lucy A. Tedd, J. A. Large, 2005. Digital libraries are now a reality and yet their implementation and use is still not at an optimum. This text examines the various options for setting up digital libraries from digitising information in the first place to providing the interface to access the information held by the digital global library.

Research and Advanced Technology for Digital Libraries Panos Constantopoulos, Ingeborg T. Solvberg, 2003-06-30. Digital libraries (DLs) are major advances in information technology that frequently fall short of expectations. 7-28 Covi Kling 7 argue that understanding the wider context of technology use is essential to understanding digital library use and its implementation in different social worlds. Recent health informatics research also suggests that social and organisational factors can determine the success or failure of healthcare IT developments. 8-11-12 Heathfield 11 suggests that this is due to the complex, autonomous nature of the medical discipline and the specialized clinician or software engineer approach to system development. Negative

reactions to these systems is often due to inappropriate system design and poor implementation. However, there may be other less obvious social and political repercussions of information system design and deployment. Symon et al. [26] have identified within a hospital scenario how social structures and work practices can be disrupted by technology implementation. Although these systems often deal with sensitive personal information, other system design research has found that apparently innocuous data can be perceived as a threat to social and political stability [1, 2, 3]. To understand the impact of DLs within the medical profession, an in-depth evaluation is required of the introduction and later development of these applications within their specific social and organisational settings. However, as Covi Kling [7] has highlighted, there are few high-level theories that aid designers in understanding the implications of these issues for DL design and implementation.

Digital Libraries: International Collaboration and Cross-Fertilization Zhaoneng Chen, Hsinchun Chen, Qihao Miao, Yuxi Fu, Edward Fox, Ee-peng Lim, 2004-11-29

The International Conference on Asian Digital Libraries (ICADL) is an annual international forum that provides opportunities for librarians, researchers, and experts to exchange their research results, innovative ideas, service experiences, and state-of-the-art developments in the field of digital libraries. Building on the success of the first six ICADL conferences, the 7th ICADL conference, hosted by the Shanghai Jiao Tong University and the Shanghai Library in Shanghai, China, aimed to further strengthen the academic collaboration and strategic alliance in the Asia Pacific Region in the development of digital libraries. The theme of ICADL 2004 was Digital Library International Collaboration and Cross-fertilization, with its focus on technology, services, management, and localization. The conference began with an opening ceremony, and the conference program featured 9 keynote speeches and 5 invited speeches by local and international experts. During the 3-day program, 40 research paper presentations were given in 3 parallel sessions. The conference also included 6 tutorials and an exhibition. The conference received 359 submissions, comprising 248 full papers and 111 short papers. Each paper was carefully reviewed by the Program Committee members. Finally, 44 full papers, 15 short papers, and 37 poster papers were selected. On behalf of the Organizing and Program Committees of ICADL 2004, we would like to express our appreciation to all authors and attendees for participating in the conference. We also thank the sponsors, Program Committee members, supporting organizations, and helpers for making the conference a success. Without their efforts, the conference would not have been possible.
