R. Hogg, 1970 Annotation Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no

longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume

**Rational Approaches to Structure, Activity, and Ecotoxicology of Agrochemicals** Wilfried Draber, Toshio Fujita, 2024-12-11 This book presents discussions of the most important aspects in the development of agrochemicals The book covers such broad areas as structure activity and ecotoxicological analyses in comprehensive reviews for general methods and chronicles for individual examples Topics in structure activity relationships include how to combine submolecular structures of pharmacological interests and modify them according to chemorational models with computer aided procedures such as the traditional Hansch type QSAR the sequential simplex optimization and molecular modeling Topics in the ecotoxicology of organo phosphorus compounds are discussed in terms of the quantitative structure toxicity relationship QSTR Chronicles of molecular orbital methodology in predicting environmental fates of agrochemicals are also provided This volume will be invaluable for researchers in the agrochemical and pharmaceutical industries *Books in Print*, 1991 Catalog of Copyright Entries.
