Elementary Instructions For Students Of Sculpture:

Elementary Instructions for Students of Sculpture Francesco Carradori, 2002 Carradori's book of instructions is vital to understanding the art and craft of sculpting as they were practiced before the twentieth century since little substantial material exists that demonstrates in an informed didactic manner the various tools and techniques used by ancient sculptors Carradori's work is the most comprehensive and instructive it includes thirteen articles that explain how to restore marble sculpture model clay work with stucco and wax cast and finish bronze and how to carve and enlarge models into marble and stone as well as seventeen tables that illustrate the arrangement methods and tools used in each of these processes The book also includes the complete Italian text Jacket *Francesco Corradori (1747-1824)* Matti Kalevi Auvinen, 2002 **Casting**

the Parthenon Sculptures from the Eighteenth Century to the Digital Age Emma M. Payne, 2021-04-08 Through the 19th century as archaeology started to emerge as a systematic discipline plaster casting became a widely adopted technique newly applied by archaeologists to document and transmit discoveries from their expeditions The Parthenon sculptures were some of the first to be cast In the late 18th century and the first years of the 19th century the French artist Fauvel and Lord Elgin's men conducted campaigns on the Athenian Acropolis Both created casts of parts of the Parthenon sculptures that they did not remove and these were sent back to France and Britain where they were esteemed and displayed alongside other original sections Henceforth casting was established as an essential archaeological tool and grew exponentially over the course of the century Such casts are now not only fascinating historical objects but may also be considered time capsules capturing the details of important ancient works when they were first moulded in centuries past This book examines the role of 19th century casts as an archaeological resource and explores how their materiality and spread impacted the reception of the Parthenon sculptures and other Greek and Roman works Investigation of their historical context is combined with analysis of new digital models of the Parthenon sculptures and their casts Sensitive 3D imaging techniques allow investigation of the surface markings of the objects in exceptionally fine detail and enable quantitative comparative studies comparing the originals and the casts The 19th century casts are found to be even more accurate but also complex than anticipated through careful study of their multiple layers we can retrieve surface information now lost from the originals through weathering and vandalism **Supports in Roman Marble Sculpture** Anna Anguissola, 2018-02-15 The first study of a crucial aspect of Roman stone sculpture exploring the functions and aesthetics of non figural supports

Exhibiting Antonio Canova Christina Ferando, 2025-10-01 *Exhibiting Antonio Canova* Display and the Transformation of Sculptural Theory argues that the display of Canova's sculptures in the late eighteenth and early nineteenth centuries acted as a catalyst for discourse across a broad range of subjects By enshrining his marble figures alongside plaster casts of ancient works bathing them in candlelight staining and waxing their surfaces and even setting them in motion on rotating bases Canova engaged viewers intellectually physically and emotionally These displays inspired discussions on topics as diverse as

originality and artistic production the association between the sculptural surface flesh and anatomy the relationship between painting and sculpture and the role of public museums Beholders discussions also shaped the legacy of important sculptural theories They helped usher in their modern definitions and created the lenses through which we experience and interpret works of art establishing modern attitudes not just towards sculpture but towards cultural patrimony in general

the Twelve Caesars from the ruthless Julius Caesar to the fly torturing Domitian Twelve Caesars asks why these murderous autocrats have loomed so large in art from antiquity and the Renaissance to today when hapless leaders are still caricatured as Neros fiddling while Rome burns Beginning with the importance of imperial portraits in Roman politics this richly illustrated book offers a tour through 2 000 years of art and cultural history presenting a fresh look at works by artists from Memling and Mantegna to the nineteenth century American sculptor Edmonia Lewis as well as by generations of weavers cabinetmakers silversmiths printers and ceramicists Rather than a story of a simple repetition of stable blandly conservative images of imperial men and women Twelve Caesars is an unexpected tale of changing identities clueless or deliberate misidentifications fakes and often ambivalent representations of authority From Beard s reconstruction of Titian s extraordinary lost Room of the Emperors to her reinterpretation of Henry VIII s famous Caesarian tapestries Twelve Caesars includes fascinating detective work and offers a gripping story of some of the most challenging and disturbing portraits of power ever created Published in association with the Center for Advanced Study in the Visual Arts National Gallery of Art Washington DC
