beloved and misunderstood creature Thirty Three Ways of Looking at an Elephant is a must for any elephant lover or armchair environmentalist Animal Social Complexity Frans B. M. De Waal, Peter L Tyack, 2009-06-01 For over 25 years primatologists have speculated that intelligence at least in monkeys and apes evolved as an adaptation to the complicated social milieu of hard won friendships and bitterly contested rivalries Yet the Balkanization of animal research has prevented us from studying the same problem in other large brained long lived animals such as hyenas and elephants bats and sperm whales Social complexity turns out to be widespread indeed For example in many animal societies one individual's innovation such as tool use or a hunting technique may spread within the group thus creating a distinct culture As this collection of studies on a wide range of species shows animals develop a great variety of traditions which in turn affect fitness and survival The editors argue that future research into complex animal societies and intelligence will change the perception of animals as gene machines programmed to act in particular ways and perhaps elevate them to a status much closer to our own At a time when humans are perceived more biologically than ever before and animals as more cultural are we about to witness the dawn of a truly unified social science one with a distinctly cross specific perspective The Asian Elephant R. Martin Rowe, 2013. Through the lens of Rowe's relationships with two Kenyan conservationists, Wangari Maathai and Daphne Sheldrick, this book surveys a number of prejudices that many of us who are fortunate to be born with the privileges attached to our skin color, sex, and access to resources don't like to deal with: race, misogyny, and the legacy of empire. By examining the two women's memoirs, *Unbowed* and *Love Life*, and *Elephants*, both of which were launched following talks at the American Museum of Natural History in New York City, these metaphorical elephants in the room are combined with a study of the exploitation of actual elephants on the continent of Africa and the iterations of memory that are disclosed or hidden in the writing of memoirs and the collecting of bones for museums.
