*Representing Schizophrenia in the Media* James Balfour, 2023-01-31 This book presents a critical analysis of ways in which schizophrenia and people with schizophrenia are represented in the press Interrogating a 15 million word corpus of news articles published by nine UK national newspapers over a 15 year period the author draws on techniques from corpus linguistics and critical discourse analysis to identify the most frequent and salient linguistic features used by journalists to influence and reflect broader public attitudes towards people with schizophrenia In doing so this book Evaluates the extent to which media representations are accurate and the extent to which they are potentially helpful or harmful towards people living with schizophrenia Employs a bottom up approach guided by linguistic patterns such as collocates and keywords identified by corpus software Contributes to the de stigmatisation of schizophrenic disorder by unveiling some of the widespread misconceptions surrounding it Applies a mixed methods approach in order to expose attitudes and beliefs found between the lines values and assumptions which are often implicit in the way language is used and therefore not visible to the naked eye The findings of this monograph will be relevant to advanced students and researchers of health communication corpus linguistics and applied linguistics and will also carry importance for journalists and mental health practitioners
