Freedom For The Seas In The 21st Century Ocean Governance And Environmental Harmony:

Freedom for the Seas in the 21st Century Jon M. Van Dyke, Durwood Zaelke, Grant Hewison, 1993 Freedom for the Seas in the 21st Century brings together leading international experts on marine policy to address current threats to the health of the seas and to offer new approaches to the challenge of protecting our marine environment The paradigm presented is one of ocean governance rather than of law or policy it challenges the prevailing concept of freedom of the seas and calls instead for a governing notion of freedom for the seas where the primary goal is the protection of ecological vitality Topics covered include strategies for controlling ocean pollution regulation of high seas fishing defects in current deep seabed mining regulatory provisions threats to the marine environment posed by military activities **Human Rights and Ocean Governance** Mara Ntona, 2023-12-12 This book argues for the utility of human rights in the practice of ocean governance Maritime spatial planning MSP has become the dominant marine management paradigm with MSP frameworks already at various stages of elaboration and implementation in more than half of all coastal states However as experience with MSP accrues a central systemic shortcoming has become apparent insofar as the normative frameworks that underpin MSP tend to be grounded in a rationalistic and economistic worldview The result is a post political neoliberal approach to the implementation of MSP which favours technocratic fixes to complex societal problems over efforts to address underlying issues of power and inequality Building upon the new field of critical MSP studies this book offers a much neglected legal contribution More specifically it analyses the extent to which law and particularly human rights law can be utilised to meaningfully challenge the unjust patterns of human ocean interaction that MSP preserves or creates and so provide a vehicle for the formulation and realisation of transformative blue futures The book looks to human rights as norms that are uniquely capable of bringing into relief the values cause and effect relationships and uncertainties that prevailing capitalist industrial framings of the ocean tend to downplay or worse disregard And so from a more pragmatic viewpoint the book argues that the policy and advocacy tools associated with human rights can be used within MSP processes to foster patterns of human ocean interaction which are more conducive to social and environmental justice This book will be of interest to legal and planning scholars geographers and others concerned with ocean governance and the blue turn in the social sciences and humanities more generally *A Dual Approach to Ocean Governance* Yoshifumi Tanaka, 2016-03-23 Taking the North East Atlantic Ocean as an example of regional practice this book addresses the dual approach to ocean governance in international law It examines the interaction between zonal and integrated management approaches and the conservation of marine living resources and marine biological diversity The study examines the limitations of the traditional zonal approach and suggests new possibilities for conformity between sovereign states international law and sustainable development **A Research Agenda for Sustainable Ocean Governance** Justin Alger, U. R. Sumaila, 2025-03-12 This prescient Research Agenda explores innovative and interdisciplinary pathways forward for ocean governance Justin Alger and U Rashid Sumaila

Listening To The Sea Robert Jay Wilder, 2010-06-15 Environmental politics and policy while gaining a significant place in the nation s consciousness constantly comes up against the United States desire for more development more profit and a collective lack of foresight Nowhere is this more evident than in the crucial biodiversity of the world s oceans which are victim to pollution overharvesting habitat destruction and simplistic and fragmented environmental policies that do not speak to underlying problems Robert Wilder describes how management of the world s oceans and their ecosystems has long faced two principal obstacles The first is the seemingly infinite capacity of human apathy something that permits us to take the sea s comfort sustenance ecological services and integrity for granted The second is the myriad lines for rigid offshore jurisdiction That people believe the diversity of life on land should be protected is reflected in well publicized efforts to save the celebrated biodiversity of rainforests Far less is known however about protecting a larger two thirds of this planet the oceans Drawing on academic literature and practical experience Wilder illustrates the nature of the questions facing decision makers and provides intelligent well crafted solutions By describing how the emerging idea of precautionary action can help build second generation policy Wilder offers means to halt problematic overfishing He integrates political science with the goals of environmental protection revealing why agencies often fail in their mission to preserve the environment and offers fresh

sensible new paths ahead Wilder shows how damage to marine ecosystems often stems from distant land based activities and details emerging ideas such as how industrial ecology can be a cost effective way to prevent pollution Through a rigorous integration of policy and science Wilder suggests a much improved second generation governance of the ocean and coasts and proposes new ideas for resolving the environmental policy stalemate found within the U S government *The Use of CITES for Commercially-exploited Fish Species* Solène Guggisberg,2015-12-11 This book examines the legality adequacy and efficacy of using the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES for commercially exploited fish species and assesses whether the existing institutional cooperation with the Food and Agriculture Organization FAO and regional fisheries management organizations RFMOs is efficient This case study also provides an interesting lens to approaching wider international law issues Indeed finding ways to achieve effective governance of transboundary or global natural resources is central to the peaceful use of oceans and land Furthermore the role of science in advising decision makers is a sensitive issue which deserves scrutiny and is similar in many regimes Finally the complex problem of fragmentation of international law is acute in various fields of environmental law as in all rapidly developing areas of international regulations *Maritime Security Cooperation in the Gulf of Guinea* Kamal-Deen Ali,2015-07-28 In Maritime Security Cooperation in the Guinea Prospects and Challenges Kamal Deen Ali provides ground breaking analyses of the maritime security situation in the Gulf of Guinea and its implications for shipping energy security sustainable fisheries as well as national and regional security The book juxtaposes the growing strategic importance of the Gulf of Guinea against the rising insecurity in the maritime domain especially from piracy Ali points out key gaps in prevailing regional and international approaches to maritime security cooperation in the Gulf of Guinea and sets out several suggestions for combating piracy as well as other maritime security threats while effectively enhancing maritime security cooperation in the region **Managing Global Issues** P.J. Simmons,Chantal de Jonge Oudraat,2012-10-01 Globalization is pushing to the fore a wide variety of global problems that demand urgent policy attention Managing Global Issues provides a comprehensive comparative assessment of international efforts to manage global problems It identifies and explains successes and failures of such efforts examines the roles of different actors and outlines lessons that may guide future action by governments international organizations nongovernmental organizations and the private sector The volume s 16 case studies examine organized crime drugs corruption human rights labor rights health trade financial markets development assistance the environment the global commons communications weapons of mass destruction conventional weapons internal conflicts and refugees Managing Global Issues is the result of an international multidisciplinary research team composed of experts in specific global issue areas The book s broad scope numerous case studies and its rigorous comparative analytical framework offers a unique and valuable contribution to the rapidly growing literature on global governance Contributors include Vinod K Aggarwal University of California Berkeley Thomas Bernauer University of Zurich William Drake Carnegie Endowment

Seapower Geoffrey Till, 2018-06-19 This is the fourth revised and updated edition of Geoffrey Till's *Seapower A Guide for the Twenty first Century* The rise of the Chinese and other Asian navies worsening quarrels over maritime jurisdiction and the United States maritime pivot towards the Asia Pacific region reminds us that the sea has always been central to human development as a source of resources and as a means of transportation information exchange and strategic dominion It has provided the basis for mankind's prosperity and security and this is even more true in the early twenty first century with the emergence of an increasingly globalised world trading system Navies have always provided a way of policing and sometimes exploiting the system In contemporary conditions navies and other forms of maritime power are having to adapt in order to exert the maximum power ashore in the company of others and to expand the range of their interests activities and responsibilities While these new tasks are developing fast traditional ones still predominate Deterrence remains the first duty of today's navies backed up by the need to fight and win if necessary How navies and their states balance these two imperatives will tell us a great deal about our future in this increasingly maritime century This book investigates the consequences of all this for the developing nature composition and functions of all the world's significant navies and provides a guide for anyone interested in the changing and crucial role of seapower in the twenty first century *Seapower* is essential reading for all students of naval power maritime security and naval history and highly recommended for students of strategic studies international security and international relations

The Security of Sea Lanes of Communication in the Indian Ocean Region Dennis Rumley, Sanjay Chaturvedi, Mat Taib Yasin, 2016-03-31 First published in 2007 this book focuses on the security of sea lanes of communication It was a joint publication between the Maritime Institute of Malaysia MIMA and the Indian Ocean Research Group IORG and is an important book for three particular reasons First it takes a step forward in identifying key policy themes that can be applied to interstate cooperation around the Indian Ocean Region IOR Second the particular theme discussed is not only central to the economic well being of Indian Ocean countries but also to many of the world's most important trading states and finally the various discussions within the book raise a host of issues to which regional as well as non regional policy makers should give serious consideration

An Introduction to Contemporary International Law Lung-chu Chen, 2015 Applies the New Haven School approach explaining discrete aspects of the global decision process and their effects on the content of international legal rules Provides an in depth treatment of the key features of the New Haven School of international law References both classic historical examples and contemporary events to illustrate international legal

processes and principles Focuses on important trends in international law including the movement from a state centered system to a people centered one Contributes to the growth of a world community of human dignity through international law Publishers website **Governing Ocean Resources** Jon M. van Dyke, Sherry P. Broder, Seokwoo Lee, Jin-Hyun Paik, 2013-05-08

This collective work of a renowned group of scholars Governing Ocean Resources New Challenges and Emerging Regimes edited by Jon M Van Dyke Sherry P Broder Seokwoo Lee and Jin Hyun Paik examines the current state of the Law of the Sea today offers a variety of new approaches to the field and serves as a tribute to the late Judge Choon ho Park whose profound depth of learning and indomitable spirit of optimism regarding the possibilities of reform and improvement comprised an immense contribution to the study of the Law of the Sea The wide range of topics covered includes Maritime Boundary Delimitations Claims to the Extended Continental Shelf the International Tribunal for the Law of the Sea Military Activities in the Exclusive Economic Zone Piracy Fishery Management and Climate Change Published under the auspices of the Law of the Sea Institute LOSI this important collection will be of considerable interest to scholars in the area of ocean law and marine resource management **The Social Construction of the Ocean** Philip E.

Steinberg, 2001-10-25 This 2001 book presents a history of the uses regulations and representation of the world ocean from approximately 1450 through the present This history is told through a territorial political economy lens borrowing from world systems theory economic geographic studies of the spatiality of capitalism political geographic work on the history of territoriality and post structural work on social conflict in the production of space Just as the modern era has been characterized by a conflicting set of dynamic and contested spatiality on land so has it been characterized by a conflicting set of spatial functions at sea Evidence is marshaled from legal texts literary and artistic creations cartographic representations advertisements commercial and military history and policy debates The book concludes by considering how lessons learned from the history of the ocean may be applied to emerging spaces such as cyberspace where there is a similarly problematic fit between social processes and the institutions of state governance
