**Blackness in Western Europe** Dienke Hondius, 2017-09-29 While the study of race relations in the United States continues to inspire and influence European thinking Europeans have yet to confront their own history To be black in Europe whether during the sixteenth century or today means sharing one crucial experience being part of a small but visible minority European slave owners company directors and investors in the distant past maintained an ocean wide gap between themselves and the enslaved in the plantation colonies of the Caribbean In the following centuries this distance persisted Even today to be black in Europe often means to be one of a few black persons in a group A racial pattern of exclusion has characterized European policy for more than four centuries Dienke Hondius identifies ideas and attitudes toward blackness the concept of race as visible difference developed in western Europe She argues that racial discourses are generally dominated by paternalism a concept usually used to explain power structures that is often applied to the nineteenth century Hondius identifies five patterns of paternalism that influenced Europe much earlier and initiated trends of imagery and perception Taking a chronological and thematic approach Hondius first focuses on southern European societies in the Early Modern period and moves to northwest European societies in the Modern period Addressing religion law and science she concludes with a synthesis of developments from the twentieth century to the present

Justice Through Diversity? Michael J. Sweeney, 2016-08-30 Arguably the most transformative force in contemporary society is the commitment to justice through diversity A prime example is the change justice through diversity has wrought on who enters teaches and administers the university It has changed the content of what is taught and the mission statements that define the purpose of higher education What is rarely defined however is justice and how it is related to diversity If justice is equality are all differences equal Are all differences in race gender sexual orientation national origin ethnicity religion and culture equal Should such differences be weighted differently and thus hierarchically On what basis are those differences to be weighted and ranked to ensure equality Justice Through Diversity brings together a Who's Who of contemporary scholars to explore these questions and others in an attempt to understand one of the central commitments in the modern world

1960s by idealistic believers in educational freedom Two of the schools have closed the other three are still open and flourishing Although the schools are different they share a belief in the individuality of each child and his/her unlimited potential Their stories are still relevant today     An Introduction to Social and Political Philosophy Richard Schmitt, 2009-06-16 Social and political philosophy unlike other fields and disciplines involves conflict disagreement deliberation and action This text takes a new approach and understands philosophy not so much as a story of great thinkers or as a collection of philosophical positions but as a series of debates and disagreements in which students must participate Adopting what may be called an active learning method Richard Schmitt who has long taught social and political philosophy in the Ivy Leagues as well as at state colleges presents a range of problems and debates which engage the core question of freedom Too often students are bewildered and then bored by highly abstract philosophical questions because they are unable to connect those abstract issues to their own life experiences     **Timely Meditations** Leslie Paul Thiele, 2014-07-14 Focusing on the concept of freedom Leslie Paul Thiele makes Heidegger's philosophical works speak directly to politics in a postmodern world Neither excusing Heidegger for his political sins nor ignoring their lesson Thiele nonetheless refrains from polemic in order creatively to engage one of the greatest philosophers of our time The product of this engagement is a vindication of a democratic and ecological politics firmly grounded in philosophic inquiry Using Heidegger's understanding of freedom as a point of departure *Timely Meditations* lays out the philosophic and political nature and potential of freedom in thought speech and deed This discursive freedom is contrasted to both modern positive and negative and postmodern Nietzschean and Foucaultian variations The result is an original and provocative study that challenges our present understanding of liberty while underlining dangerous collusion with the contemporary forces of technology *Timely Meditations* marks an increasingly rare achievement today For unlike many theorists who attempt to steer a course into the world of postmodern politics Thiele does so without forsaking philosophic foundations and without abandoning practical hopes and tasks for rhetorical diversions Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905     **The ^ANovel and the Globalization of Culture** Michael Valdez Moses, 1995-05-25 Bringing together canonical European authors with authors from the Third World this book analyzes the emergence of the modern global novel and the way it mirrors the underlying process of cultural globalization Through detailed readings of Stendhal Hardy Conrad Achebe and Vargas Llosa this study reveals how the spread of Western modernity materially and culturally has been shadowed by the destruction of traditional societies These novels focus on the individual tragedies of those who represent pre-modern ways of

life in the process offering a corrective to Hegel's abstruse philosophy of history. From rural Victorian England to the Malay Archipelago and from the Igbo heartland in Africa to the backlands of Brazil, a global narrative unfolds, one where the forces of modernization clash with the defenders of traditional society. Moses contributes to the ongoing debate on Alexandre Kojève and the end of history while, at the same time, moving beyond sterile oppositions: canonical versus non-canonical works, formal literary criticism versus political historical critique. With its new conceptualization of modernity and globalization, this book will interest the literary scholar, cultural critic, social scientist, and political theorist.

Chinese Culture, Western Culture Tai Ng, 2007-02. This book explores how complementary Chinese and Western cultures are, how they should learn from each other to establish a dynamic balance, and how institutions need constant redefinition and renewal in order to prosper. By studying the history and development of thought and philosophy in these cultures, it suggests lessons from our past that may shed light on current events and help us in handling future challenges. The book presents answers to the following important questions: Do Chinese people think differently from Westerners, and if so, how and why? What are the key differences between Chinese and Western culture, and why? How did China become the most technologically advanced and sociologically sophisticated nation in the world until the seventeenth century, and why did it ultimately decline? What are the key characteristics of political institutions in historical China and Europe, and how were they significant? In this postmodern time and era of globalization, what can we learn from Chinese culture and experiences? As China rapidly industrializes, what can it learn from the West without repeating some of the mistakes that Europeans and North Americans made in their periods of industrialization?
