Does God Believe in Human Rights? Nazila Ghanea-Hercock, Alan Andrew Stephens, Raphael Walden, 2007 Where can religions find sources of legitimacy for human rights How do and how should religious leaders and communities respond to human rights as defined in modern International Law When religious precepts contradict human rights standards for example in relation to freedom of expression or in relation to punishments which should trump the other and why Can human rights and religious teachings be interpreted in a manner which brings reconciliation closer Do the modern concept and system of human rights undermine the very vision of society that religions aim to impart Is a reference to God in the discussion of human rights misplaced Do human fallibilities with respect to interpretation judicial reasoning and the understanding of human oneness and dignity provide the key to the undeniable and sometimes devastating conflicts that have arisen between and within religions and the human rights movement In this volume academics and lawyers tackle these most difficult questions head on with candour

and creativity and the collection is rendered unique by the further contributions of a remarkable range of other professionals including senior religious leaders and representatives journalists diplomats and civil servants both national and international Most notably the contributors do not shy away from the boldest question of all summed up in the book s title The thoroughly edited and revised papers which make up this collection were originally prepared for a ground breaking conference organised by the Clemens Nathan Research Centre the University of London Institute of Commonwealth Studies and Martinus Nijhoff Brill

International Protection of Human Rights: Achievements and Challenges Felipe Gómez Isa,Koen de Feyter,2006-01-01 At the beginning of the nineties there was an expectation within the human rights community that the next decade would be a period of consolidation for the international human rights regime This did not happen In fact the human rights regime underwent dramatic changes in response to new circumstances We have tried to highlight both the achievements and the challenges ahead in this Manual the result of a joint project under the auspices of HumanitarianNet a Thematic Network on Humanitarian Development Studies leaded by the University of Deusto Bilbao the Basque Country Spain and the European Inter University Centre for Human Rights and Democratisation EIUC Venice Italy

The Universal Declaration of Human Rights and the Challenge of Religion Johannes Morsink,2017-08-03 Repulsed by evil Nazi practices and desiring to create a better world after the devastation of World War II in 1948 the UN General Assembly adopted the Universal Declaration of Human Rights UDHR Because of the secular imprint of this text it has faced a series of challenges from the world s religions both when it was crafted and in subsequent political and legal struggles The book mixes philosophical legal and archival arguments to make the point that the language of human rights is a valid one to address the world s disputes It updates the rationale used by the early UN visionaries and makes it available to twenty first century believers and unbelievers alike The book shows how the debates that informed the adoption of this pivotal normative international text can be used by scholars to make broad and important policy points

Human Rights and the Separation of State and Religion Francis-Vincent Anthony,Hans-Georg Ziebertz,2023-08-05 This text highlights key aspects of the religion church state relationship debate and related hitherto marginal topics The contributions make clear that there is no clear blueprint for an optimal relationship between religion church and state Individual states and countries are analysed on the granular level for example to address mono religious against poly religious as well as secular societies Among others chapters address education migration and politics against religion as well as the effect of LGBTQ communities on religion and societies This collected volume appeals to researchers and students working in religious studies and political science

Faith in Human Rights Robert Traer,1991-01-01 In this first comprehensive study of the problem of a universal definition of human rights Robert Traer argues that contemporary theological discourse contains an affirmation of faith that unites members of world religious traditions with secular humanists in a common struggle to establish human rights as the basis for human dignity Scholars of religion law and comparative religious ethics as well as human rights advocates will find

it an invaluable guide **Reconciling Religion and Human Rights** Salama, Ibrahim,Wiener, Michael,2022-04-14 Projecting a global interdisciplinary vision this insightful book develops a peer to peer learning methodology to facilitate reconciling religion and human rights both in multilateral contexts and at the national level Written by leading human rights practitioners the book illuminates the tension zones between religion and rights exploring how the faith elements in both disciplines can create synergies for protecting equal human dignity Freedom of Religion, Secularism, and Human Rights Nehal Bhuta,2019-01-24 This interdisciplinary volume examines the relationship between secularism freedom of religion and human rights in legal theoretical historical and political perspective It brings together chapters from leading scholars of human rights law and religion political theory religious studies and history and provides insights into the state of the debate about the relationship between these concepts Comparative in orientation its chapters draw on constitutional and political discourses and experience not only from Western Europe and the United States but also from India the Arab world and Malaysia **Human Rights Ethics** Clark Butler,2008 Human Rights Ethics makes an important contribution to contemporary philosophical and political debates concerning the advancement of global justice and human rights Butler s book also lays claim to a significant place in both normative ethics and human rights studies in as much as it seeks to vindicate a universalistic rational approach to human rights ethics Butler s innovative approach is not based on murky claims to natural rights that supposedly hold wherever human beings exist nor does it succumb to the traditional problems of justification associated with utilitarianism Kantianism and other procedural approaches to human rights studies Instead Butler proposes a dialectical justification of human rights by indirect proof that claims not to be question begging Very much in the spirit of Hegel and Habermas Butler proposes to vindicate a totally rational account of human rights but one that depends concretely and historically on a dialectically constructed right to freedom of thought in its universal modes

David Little addresses human rights in relation to the historical settings in which its language was drafted and adopted. Featuring five original essays, Little articulates his view that fascist practices before and during World War II vivified the wrongfulness of deliberately inflicting severe pain, injury and destruction for self-serving purposes and that the human rights corpus developed in response was designed to outlaw all practices of arbitrary force. He contends that while there must be an accountable human rights standard, it should guarantee latitude for the expression and practice of beliefs consistent with outlawing arbitrary force. Little details the theoretical grounds of the relationship between religion and human rights and concludes with essays on US policy and the restraint of force in regard to terrorism. With a foreword by John Kelsay, this book is a capstone of the work of this influential writer on religion, philosophy and law. *The ^AOxford Handbook of the*

Fundamental Rights, Religion and Human Dignity Javier Martínez-Torrón, Li-ann Thio, 2024-12-02. This collection examines theoretical and practical issues concerning the relationship between freedom of religion or belief and other fundamental rights in the context of secular States from the perspective of human dignity. As the Universal Declaration of Human Rights made clear, human dignity constitutes the foundation of human rights, among which freedom of thought, conscience and religion occupies a prominent place. As a consequence of the inter-cultural debate that is ongoing in contemporary Western societies, which are increasingly pluralistic, the concept of human dignity faces important challenges in terms of what it requires. The five chapters included in the first part of this book discuss some of these conceptual challenges, such as the implications of common good constitutionalism for the understanding of human dignity and the role of religious freedom from the perspective of Western experiences and legal thinkers. The chapters in Part II explore particular questions involving human dignity and the relationship between freedom of religion or belief and other human rights, for example, how to build bridges between religious freedom and other fundamental freedoms when people make conflicting legitimate choices. Taken together, the book offers an insightful range of perspectives on some contemporary challenges raised by the exercise of religious freedom in societies that claim to be based on respect for human dignity and human rights. The volume will be a valuable resource for academics, researchers and policy makers working in the areas of Law and Religion, Human Rights, Law, Constitutional Law and International Relations. **Human Rights and Religion in**
