Freedom Passages On Independence And The Power Of Choice:

Kant's Metaphysics of Morals Mark Timmons, 2002 Studies of Kant's moral and political philosophy have increasingly focused on his last major work in ethics *The Metaphysics of Morals*. This work is here discussed in seventeen essays by leading contemporary Kant scholars, most of them specially written for this volume. They cover a broad range of topics including Kant's views on rights, punishment, contract, practical reasoning, revolution, freedom, virtue, legislation, happiness, moral judgement, love, respect, duties to oneself and motivation. This is the only book devoted entirely to *The Metaphysics of Morals* and is not just a landmark in Kant studies but also a significant contribution to contemporary moral and political philosophy.

Kant's Conception of Freedom Henry E. Allison, 2020-01-16 Although a good deal has been written about Kant's conception of free will in recent years, there has been no serious attempt to examine in detail the development of his views on the topic. This book endeavours to remedy the situation by tracing Kant's thoughts on free will from his earliest discussions of it in the 1750s through to his last accounts in the 1790s. This developmental approach is of interest for at least two reasons. First, it shows that the path that led Kant to view freedom as a transcendental power that is both radically distinct from and compatible with the causality of nature was a winding one. Second, it indicates that despite the variety of views of free will that Kant held at various times, the concept occupied a central place in his thought because it was the point of union between his theoretical and practical philosophy.

Feeling Like it Tamar Schapiro, 2021 Feeling like doing something is not the same as deciding to do it. You may have an inclination to do it, but there is still a moment where you can decide to do it or not. This moment of decision presents a puzzle: if being inclined to do something is a form of motivation or self-movement, how can we be passive in relation to our own self-movement? Is our relationship to our inclinations like that of a rider to a horse, or is it rather like our relationship to spontaneous judgments or perceptions? Schapiro shows that familiar theories of inclination fail to provide compelling answers to these questions, as they make being inclined to perform an action either too similar or too dissimilar to the action itself. Schapiro puts forward a Kant-inspired inner animal view which holds that when you are merely inclined to act, the instinctive part of yourself is already active, while the rest of you is not. The moment of decision is your will at a crossroads.

Feeling Like It provides a concise and accessible investigation of a new problem at the intersection of ethics, philosophy of action, and philosophy of mind.

What is Orientation in Global Thinking? Katrin Flikschuh, 2017-10-05 Starting from Kant's striking question, "What is orientation in thinking?" this book argues that the main challenge facing global normative theorising lies in its failure to acknowledge its conceptual inadequacies. We do not know how to reason globally; instead, we tend to apply our domestic political experiences to the global context. Katrin Flikschuh argues that we must develop a form of global reasoning that is sensitive to the variability of contexts, rather than trying to identify a uniquely shareable set of substantive principles we need to appreciate and understand local reasons for action. Her original and incisive study shows how such reasoning can benefit from the open

ended nature of Kant's systematic but non dogmatic philosophical thinking and from reorientation from a domestic to a non domestic frame of thought It will appeal to all those interested in global moral issues as well as to Kant scholars *A Companion to Kant* Graham Bird,2009-11-09 This Companion provides an authoritative survey of the whole range of Kant's work giving readers an idea of its immense scope its extraordinary achievement and its continuing ability to generate philosophical interest Written by an international cast of scholars Covers all the major works of the critical philosophy as well as the pre critical works Subjects covered range from mathematics and philosophy of science through epistemology and metaphysics to moral and political philosophy **Moral Psychology** ,2016-08-01 In recent decades the central questions of moral psychology have attracted renewed interest Contemporary work on moral motivation and the rationality of moral action has broadened its focus to include a wide array of related issues New interpretations of historical figures have also contributed to conceptual advances in moral psychology in a way unparalleled in any other area of philosophy This volume presents original work from some of the most prominent philosophers currently working on moral psychology spanning both the historical and the contemporary problem based approaches **The Kantian Sublime and the Revelation of Freedom** Robert R. Clewis,2009-04-09 This book shows how certain crucial concepts in Kant's aesthetics and practical philosophy fit together and deepen our understanding of his thought **Scripture Therapy and Choice Theory** Bishop Les Trich',Scripture Therapy Minister RoxAnne Trich',2022-11-03 Scripture Therapy offers solutions to challenges individuals face every day It connects careful teaching of the Bible with proven strategies from Choice Theory to empower individuals to yield to God follow His calling and live a happy and meaningful life Scripture Therapy combines faith psychology and life experiences to reach those seeking more in their daily walk with God and the impact they have on reaching those seeking more in their daily walk with God and the impact they have on the world around them Finally the world is blessed with the publication of a wonderful new book combining Scripture Therapy and Glasser's concepts of Choice Theory and Reality Therapy The authors Lester and RoxAnne TrichA c have blended their skills to produce a powerful book that has the potential of helping people from all kinds of backgrounds and systems of belief I saw firsthand how the authors work with people to help empower them to literally change their lives for the better I saw the warmth and humor they use in their teaching of these ideas The TrichA c s are a dynamic duo and their book is a must read for anyone who wants to enhance their Spirituality and improve their happiness quotient on day one Scripture Therapy helps people see their real purpose in life and how they can contribute to mankind now and for generations to come The TrichA c s are Glasser trained experts at teaching Choice Theory which explains human behavior and Reality Therapy which provides a method for solving some of life's most pressing problems Combined with Scripture Therapy relationships will improve and a whole new world of people at peace with each other can become a reality Carleen Glasser *The Fiery Test of Critique* Ian Proops,2021-04-22 Kant conceived of critique as a kind of winnowing exercise with the aim of separating the wheat of good metaphysics from the

chaff of bad He used a less familiar metaphor to make this point namely that of the fiery test of critique not a medieval ordeal of trial by fire but rather a metallurgical assay or cupellation a procedure in which ore samples are tested for their precious metal content When seen in this light critique has a positive investigatory side it seeks not merely to eliminate bad dogmatic metaphysics but also to uncover what of philosophical value might be contained in traditional speculative metaphysics In this comprehensive study of the Transcendental Dialectic in Kant's Critique of Pure Reason Proops argues that Kant uncovered two nuggets of value the indirect proof of Transcendental Idealism afforded by the resolution of the Antinomies and a defence of theoretically grounded doctrinal beliefs in a wise and great originator on the one hand and in an afterlife on the other This examination of critique engages with Kant's views on a number of central problems in philosophy and meta philosophy the explanation of the enduring human impulse towards metaphysics the correct philosophical method the limits of self knowledge the possibility of human freedom the resolution of metaphysical paradox Antinomy the justification of faith the nature of scepticism and the role of as if reasoning in natural science *Kant on Freedom and Spontaneity* Kate A. Moran, 2018-09-27 Spontaneity understood as an action of the mind or will that is not determined by a prior external stimulus is a theme that resonates throughout Immanuel Kant's theoretical and practical philosophy Though spontaneity and the concomitant notion of freedom lie at the foundation of many of Kant's most pivotal theses and arguments regarding cognition judgment and moral action spontaneity and freedom themselves often remain cloaked in mystery or accessible only via transcendental argument This volume brings together a distinguished group of scholars who explore the nature of freedom and spontaneity the arguments Kant offers surrounding these concepts and their place in Kant's larger philosophical system The collection will be of interest to scholars interested in any aspect of Kant's philosophy especially those who hope to gain a deeper insight into these fundamental Kantian ideas *Metaphysics of Freedom?* Christian H. Krijnen, 2018-08-27 Freedom is one of the main issues of modern philosophy and Kant's philosophy of freedom a major source for comprehending it Whereas in contemporary debates Kant's concept of practical freedom is addressed frequently the cosmological foundation of it is much less discussed and even mostly taken for granted In *Metaphysics of Freedom* by contrast Kant's concept of cosmological freedom is scrutinized both in a historical and a systematic perspective As a result a deeper and broader understanding of Kant's conception of freedom its presuppositions and problems emerges *Rethinking Kant Volume 7* Edgar Valdez, 2024-01-05 The questions Kant poses have endured because they get at the heart of the philosophical endeavour The continued importance of these questions is what calls for rethinking Kant in light of contemporary philosophical debates The essays collected in this volume range from reconsidering some of the results of reason's critique of itself to determining the role of feeling in Kant's account of moral judgment The last section pays particular attention to Kant's relationship to various other figures in the history of philosophy Together they highlight the significance of Kant for the ever broadening landscape of philosophy in the twenty first century *The Faculties of the Human Mind and the Case of*

Moral Feeling in Kant's Philosophy Antonino Falduto, 2014-04-02 In the past few decades a remarkable change occurred in Kant scholarship the other Kant has been discovered i e the one of the doctrine of virtue and the anthropology Through the rediscovery of Kant s investigations into the empirical and sensuous aspects of knowledge our understanding of Kant s philosophy has been enriched by an important element that has allowed researchers to correct supposed deficiencies in Kant s work In addition further questions concerning the nature of Kant s philosophy itself have been formulated the more the other Kant comes to the fore the stronger the question concerning the connection between pure philosophy and empirical investigation becomes The aim of this study is to show that the psychological and anthropological interpretations of Kant s pure philosophy are not convincing and at the same time to illustrate some connections between his critical and anthropological investigations by means of an analysis of the theory of the faculties Against both a transcendental psychological and an anthropological reading the book presents Kant s theory of the faculties as a constitutive part of his critical philosophy and shows that there is a close connection between Kant s pure philosophy and his moral aesthetic

Naturalism and Realism in Kant's Ethics Frederick Rauscher, 2015-11-26 In this comprehensive assessment of Kant s metaethics Frederick Rauscher shows that Kant is a moral idealist rather than a moral realist and argues that Kant s ethics does not require metaphysical commitments that go beyond nature Rauscher frames the argument in the context of Kant s non naturalistic philosophical method and the character of practical reason as action oriented Reason operates entirely within nature and apparently non natural claims God free choice and value are shown to be heuristic and to reflect reason s ordering of nature The book shows how Kant hesitates between a

transcendental moral idealism with an empirical moral realism and a complete moral idealism Examining every aspect of Kant's ethics from the categorical imperative to freedom and value this volume argues that Kant's focus on human moral agency explains morality as a part of nature It will appeal to academic researchers and advanced students of Kant German idealism and intellectual history

Fichte and Kant on Freedom, Rights, and Law Gunnar Beck, 2008-01-01 Gunnar Beck provides the first comparative book length introduction to Fichte's and Kant's theories of freedom law and politics together with an overview of the metaphysical and epistemological edifice underpinning their thinking He offers a critical analysis of the underlying normative foundations of Kant's and Fichte's theories of rights and questions the analytical link between the idea of freedom as rational self determination or autonomy and a rights based political liberalism

Kant on Maxims and Moral Motivation Peter Herissone-Kelly, 2019-01-17 This book outlines and circumvents two serious problems that appear to attach to Kant's moral philosophy or more precisely to the model of rational agency that underlies that moral philosophy the problem of experiential incongruence and the problem of misdirected moral attention The book's central contention is that both these problems can be sidestepped In order to demonstrate this it argues for an entirely novel reading of Kant's views on action and moral motivation In addressing the two main problems in Kant's moral philosophy the book explains how the first problem arises because the central elements of Kant's theory of action seem not to square with our lived experience of agency and moral agency in particular For example the idea that moral deliberation invariably takes the form of testing personal policies against the Categorical Imperative seems at odds with the phenomenology of such reasoning as does the claim that all our actions proceed from explicitly adopted general policies or maxims It then goes on to discuss the second problem showing how it is a result of Kant's apparent claim that when an agent acts from duty her reason for doing so is that her maxim is lawlike This seems to put the moral agent's attention in the wrong place on the nature of her own maxims rather than on the world of other people and morally salient situations The book shows how its proposed novel reading of Kant's views ultimately paints an unfamiliar but appealing picture of the Kantian good willed agent as much more embedded in and engaged with the world than has traditionally been supposed
