

A romantic couple is shown from the chest up, embracing each other on a beach. The woman, with long blonde hair and blue eyes, is leaning her head against the man's shoulder. The man has dark, wavy hair and is wearing a white shirt. They are both looking towards the camera with soft smiles. The background is a clear blue sky and a calm ocean.

Freedom Trilogy:

Freedom Trilogy Guro Bert Domingo,2001-06 *The Freedom of Peaceful Action* Stuart K. Hayashi,2014-04-23 The Freedom of Peaceful Action is the first installment of the trilogy The Nature of Liberty which makes an ethical philosophic case for individual liberty and the free market against calls for greater government regulation and control The trilogy makes a purely secular and nonreligious ethical case for the individual s rights to life liberty private property and the pursuit of happiness as championed by the U S Founding Fathers Inspired by such philosophic defenders of free enterprise as John Locke Herbert Spencer and Ayn Rand The Nature of Liberty shows that such individual rights are not imaginary or simply assertions but are institutions of great practical value making prosperity and happiness possible to the degree that society recognizes them The trilogy demonstrates the beneficence of the individual rights approach by citing important findings in the emerging science of evolutionary psychology Although the conclusions of evolutionary psychology have been long considered to be at odds with the philosophies of individual liberty and free markets The Nature of Liberty presents a reconciliation that reveals their ultimate compatibility as various important findings of evolutionary psychology being logically applied confirm much of what philosophic defenders of liberty have been saying for centuries Moreover proceeding from the viewpoint of Rand this work argues that the structure of society most conducive to practical human well being is commensurately the most moral and humane approach as well The trilogy s first installment The Freedom of Peaceful Action focuses on the secular philosophic foundation for a society based on individual rights Starting from a defense of the efficacy of observational reason against criticisms from Immanuel Kant and Karl Popper it demonstrates how a philosophic position of individual liberty and free markets is the logical result of the consistent application of human reason to observing human nature This installment demonstrates that any political system that wishes for its citizens to thrive must take human nature into account and that an accounting of human nature reveals that a system of maximum liberty and property protection is the one most conducive to peace and human well being **In Search of a Beautiful Freedom: New and Selected Essays**

The A to Z of Existentialism Stephen Michelman,2010-04-01 Existentialism is the philosophy of human existence which flourished first in Germany in the 1920s and 1930s and then in France in the decade following the end of World War II The operative meaning of existentialism here is thus broader than it was circa 1945 when the term first gained currency in France as a label for the philosophy of Jean Paul Sartre However it is considerably less broad than the view proposed by commentators in the 1950s and 1960s who in an attempt to overcome Sartre s hegemony discovered the seeds of existentialism far and wide in Shakespeare Saint Augustine and the Old Testament prophets In this dictionary existentialism is understood as a decidedly 20th century phenomenon though with roots in the 19th century Effort has been made to understand the philosophy of existentialism as all philosophies should be understood as part of an ongoing intellectual tradition an evolving history of problems concepts and arguments The A to Z of Existentialism explains the central claims of existentialist philosophy and the contexts in which it developed into one of the most influential intellectual trends of the 20th century This is done through a chronology an introductory essay a bibliography and more than 300 cross referenced dictionary entries offering clear accessible accounts of the life and thought of major existentialists like Jean Paul Sartre Martin Heidegger Martin Buber Karl Jaspers Gabriel Marcel Simone de Beauvoir Albert Camus and Maurice Merleau Ponty as well as thinkers influential to its development such as Wilhelm Dilthey Henri Bergson Edmund Husserl and Max Scheler This book affords readers an integrated critical and historically sensitive understanding of this important philosophical movement
