Equality, Freedom, and Democracy Leonardo Morlino, Daniela Piana, Mario Quaranta, Francesco Raniolo, Cecilia Emma Sottilotto, Claudius Wagemann, 2020 The protracted economic crisis since 2008 terrorist attacks and mass immigration have been changing our democracies during the first decades of this century The crucial questions which emerge are how and why these phenomena had an impact on the effective implementation of the two critical democratic values freedom and equality as well as the impact of the European Union The book analyses France Germany Italy Poland Spain and the United Kingdom in the 1990 2020 period and reveals a pattern of relative decline in these values The book explores the demand for equalities and freedoms by citizens and the political commitments of party leaders as well as how and why equalities and freedoms are affected by domestic aspects and the role of external factors In doing so Equality Freedom and Democracy demonstrates three different paths for the future of democracy balanced democracy protest democracy and unaccountable democracy Book jacket

Equity and Efficiency? Lynn Davies, 1990 Inherent in the educational policies of most countries are concerns to make education both more efficient and more equitable In theory these goals are not incompatible However this book examines the reasons why in practice the harmonization of equity and efficiency has not proved feasible

Equity As a Policy Goal Stuart S. Nagel, 1983-01-01

Freedom in Economics Marc Fleurbaey, Nicolas Gravel, Jean-François Laslier, Alain Trannoy, 2002-01-22 This book presents a range of papers by philosophers and economists

who consider the definition and value of liberty freedom in rights and equality of opportunity Until recently freedom has played no explicit role in the conceptual framework of economists however freedom seems to be at the heart of economics The book provides a substantial contribution to the fruitful dialogue between the philosophy and economics in this area Each chapter is integrated being followed by comments which explore the underlying debates Contributors are French economists philosophers and political scientists as well as authors from Belgium and the Netherlands Alternatives to Freedom William L. Miller, 2014-09-19 This authoritative text concerns itself with freedom and alternatives to freedom based on original survey research of public attitudes to civil and political rights It combines and connects explicit and implicit arguments for freedom with the judgements of public opinion on two levels the general public and politicians encouraging the reader to think about issues both in terms of political theory and public opinion The issues considered all of which may be viewed as alternatives to the narrow conception of freedom as the absence of coercion are parliamentary sovereignty the national interest responsibility accountability equality the moral community Alternate chapters present powerful arguments from political figures such as Lord Armstrong Lord Jenkins and Roy Hattersley based on practical experience and then assess public opinion for each issue *Freedom from poverty as a human right: theory and politics* Pogge, Thomas, 2009-12-31

Tax Law, Religion, and Justice Allen Calhoun, 2021-03-08 This book asks why tax policy is both attracted to and repelled by the idea of justice Accepting the invitation of economist Henry Simons to acknowledge that tax justice is a theological concept the work explores theological doctrines of taxation to answer the presenting question The overall message of the book is that taxation is an instrument of justice but only when taxes take into account multiple goods in society the requirements of the government the property rights of society's members and the material needs of the poor It is argued that this answer to the presenting question is a theological and ethical answer in that it derives from the insistence of Christian thinkers that tax policy take into account material human need *necessitas* Without the *necessitas* component of the tax balance tax systems end up honoring only one of the three components of the tax equation and cease to reflect a coherent idea of justice The book will be of interest to academics and researchers working in the areas of tax law economics theology and history Laboring for Freedom Daniel Jacoby, 2015-05-20 This text examines the concept of freedom in the context of American labour history Nine essays develop themes in this history which show that liberty of contract and inalienable rights form two contradictory traditions concerning freedom *Freedom and Culture in Western Society* Hans Blokland, 2019-03-07 Critically examining conceptions of freedom of some of the leading contemporary philosophers from Isaiah Berlin to Charles Taylor Hans Blokland explores the value and significance that freedom has acquired on our political consciousness He looks specifically at positive and negative freedom freedom of the individual freedom and society emancipation and paternalism freedom and cultural politics *Real Freedom for All* Philippe Van Parijs, 1995-05-25 Capitalist societies are full of unacceptable inequalities Freedom is of paramount importance These two convictions are

widely shared across the world Yet they often seem in complete contradiction with each other Fighting inequality jeopardizes freedom taking freedom seriously boosts inequality What can be done Can the circle be squared Philippe Van Parijs offers a ground breaking solution to the dilemma Assessing and rejecting the claims of both socialism and conventional capitalism he presents a clear and compelling alternative vision of the just society a capitalist society offering a substantial unconditional basic income to all its members Moving beyond pure political theory Van Parijs shows what his ideal of free society means in the real world by drawing out its controversial policy implications Real Freedom for All will be essential reading for anyone concerned about the just society and the welfare state as we move into the twenty first century Chomsky on Democracy and Education

Marxism, Socialism, Freedom Radoslav Selucky,1979-06-17 *An Anthology Regarding Merit Goods* Wilfried Ver Eecke,2007 Merit Goods are those goods and services that the government feels that people will under consume and which therefore ought to be subsidized or provided free at the point of use The consumption of merit goods is thought to generate positive externality effects where the social benefit from consumption exceeds the private benefit Examples of merit goods are health services education public libraries and inoculations against certain diseases Van Eecke has assembled a collection of articles and papers that covers the issue of merit goods from a variety of perspectives and has provided a single source for researchers and economist interested in the issue The work begins with a thorough look at Musgrave s notion of merit goods The subsequent sections expand the definition of merit goods and provide information on the application of merit goods theory in economic philosophical social and religious terms The reference also has an extensive bibliography *Conflict and Change* George Olcott,2009-10-29 In the past decade a number of major Japanese companies have come under the control of foreign firms Using a case based approach this book looks at how take overs by foreign companies have changed HR and organisational practices traditionally associated with Japanese firms **Legal Reductionism and Freedom** Martin V.B.P.M. van Hees,2012-12-06 Martin van Hees presents a new approach to the study of law legal reductionism which combines elements of legal positivism new institutionalism and decision theory From legal positivism Van Hees derives some fundamental insights into the nature of legal systems but he also revises some of its key tenets He argues that law can be reduced to facts moreover he re-establishes the relation between law and morality by arguing that law and positive morality are inherently related He subsequently uses decision theoretic tools to develop and defend his reductionist methodology The second part of the study applies the resulting approach to an analysis of legal freedom By showing that legal reductionism allows us to analyse the value of liberal legal systems Van Hees makes a forceful case for including the study of law in moral and political philosophy The book is accessible to a wide readership including legal and moral philosophers political theorists and social scientists *Efficiency, Justice and Care* Yvonne Denier,2007-03-06 Since the 90 s issues of scarcity priority setting and rationing lie at the centre of most current debates on health care These are pressing issues one way or another

limits have to be set. As such, the question of what is involved in just health care becomes much more complex. This complexity can be represented as an inconsistent triad: a set of three propositions of which any two are compatible but which together form a contradiction. In the case of health care, the three rival values are social efficiency, justice, and decent quality care. It seems to be that we can have any two but not all three. Essentially, the central question is the following: how best to square the proverbial welfare circle? How can resources be matched to needs or needs to resources in socially acceptable and economically feasible ways? This book attempts to answer the question how health care can be incorporated into a comprehensive theory of justice while realising an acceptable balance between efficiency, justice, and care.
