Reactions Oliver Kühn, Ludger Wöste, 2007-07-05 This book summarizes several years of research carried out by a collaboration of many groups on ultrafast photochemical reactions It emphasizes the analysis and characterization of the nuclear dynamics within molecular systems in various environments induced by optical excitations and the study of the resulting molecular dynamics by further interaction with an optical field **The Politics of Affective Societies** Jonas Bens, Aletta Diefenbach, Thomas John, Antje Kahl, Hauke Lehmann, Matthias Lütthjohann, Friederike Oberkrome, Hans Roth, Gabriel Scheidecker, Gerhard Thonhauser, Nur Yasemin Ural, Dina Wahba, Robert Walter-Jochum, M. Ragip Zik, 2019-09-24 Many claim that political deliberation has become exceedingly affective and hence destabilizing The authors of this book revisit that assumption While recognizing that significant changes are occurring these authors also point out the limitations of turning to contemporary democratic theory to understand and unpack these shifts They propose instead to reframe this debate by deploying the analytic framework of affective societies which highlights how affect and emotion are present in all aspects of the social What changes over time and place are the modes and calibrations of affective and emotional registers With this line of thinking the authors are able to gesture towards a new outline of the political

character and resourcefulness with which they confronted challenges still faced by women today Meta-Analysis Ralf Schulze, Heinz Holling, Dankmar Böhning, 2002-10-01 Meta analysis is a series of systematic approaches for synthesizing quantitative research Since its introduction in the early 1980s statistical and methodological aspects of meta analysis have been substantially refined and advanced This volume brings together researchers from mathematical statistics research methodology medical and social sciences who present new developments and applications of meta analysis The unique and common problems of these different fields as well as some proposed solutions are presented The first part of the book is devoted to statistical and methodological advances with five chapters addressing important statistical issues that are currently under debate The possibilities and limits of the application of meta analysis to generalize causal relationships or to evaluate medical treatments for example are also discussed In the second part applications of meta analysis are presented ranging from quality control in the pharmaceutical industry to attitudinal research in social psychology illustrating the breadth of practical and scientific problems to which meta analysis can be applied **Empires of Ideas** William C. Kirby, 2025-05 A Marginal Revolution Best Non fiction Book A fascinating book Steven Mintz Inside Higher Ed Substantive on virtually every page the author actually understands how universities work An impressive performance Tyler Cowen Marginal Revolution With his extraordinary breadth of curiosity and equal ease in the histories and cultures of these countries only Bill Kirby could have written this book It is must reading for everyone who cares about universities a thought provoking lesson in the strange mix of durability and vulnerability that defines this key modern institution Richard Broadhead President Emeritus Duke University William Kirby s new book is unique I know of nothing else on higher education that resembles it in breadth scope and sheer comparative information and analysis Anyone interested in the nature of universities during the past two centuries will want to read this volume Neil L Rudenstine President Emeritus Harvard University Today American institutions dominate nearly every major ranking of global universities Yet in historical terms America s preeminence is relatively new and there is no reason to assume that US schools will continue to lead the world a century from now Indeed America s supremacy in higher education is under great stress particularly at its public universities while Chinese universities are on the ascent Will China threaten American primacy Empires of Ideas looks to the past two hundred years for answers examining the successes of leading universities to determine how they rose to prominence and what threats they currently face William C Kirby gives special attention to the challenges that Chinese academic leaders must confront reinvesting in undergraduate teaching developing new models of funding and navigating a political system that may undermine a true commitment to free inquiry and academic excellence From Formal Linguistic Theory to the Art of Historical Editions Natascha Pomino, Eva-Maria Remberger, Julia Zwink, 2023-03-06 Romance is a fertile ground for linguistic research Instead of limiting their studies to one specialised area some Romance scholars have managed to combine different aspects of the broad field of Romance linguistics in an impressive way This volume is dedicated to the multifaceted research interests of Guido

Mensching Part 1 focusses on different aspects of the architecture of grammar and linguistic theory covering Italian Portuguese French Sardinian and Romance The focus of Part 2 is on historical linguistics discussing Old Occitan lexicography and Romance in Hebrew scripts Part 3 is dedicated to aspects relating to plurilingualism language contact and sociolinguistics Part 4 explores research arguments that go beyond Romance philology but are nonetheless intertwined with it

Research Report Max-Planck-Institut für Bildungsforschung,2003 **Recognizing the Past in the Present** Sabine Hildebrandt,Miriam Offer,Michael A. Grodin,2020-12-11 Following decades of silence about the involvement of doctors medical researchers and other health professionals in the Holocaust and other National Socialist Nazi crimes scholars in recent years have produced a growing body of research that reveals the pervasive extent of that complicity This interdisciplinary collection of studies presents documentation of the critical role medicine played in realizing the policies of Hitler s regime It traces the history of Nazi medicine from its roots in the racial theories of the 1920s through its manifestations during the Nazi period on to legacies and continuities from the postwar years to the present **The Mollification Method and the Numerical Solution of Ill-Posed Problems** Diego A. Murio,2011-03-29 Uses a strong computational and truly interdisciplinary treatment to introduce applied inverse theory The author created the Mollification Method as a means of dealing with ill posed problems Although the presentation focuses on problems with origins in mechanical engineering many of the ideas and techniques can be easily applied to a broad range of situations

Perspectives on Henri Lefebvre Jenny Bauer,Robert Fischer,2018-12-03 The articles take a decidedly interdisciplinary look at the opus of the French philosopher sociologist and pioneer of spatial analysis Henri Lefebvre 1901 1991 His works are reflected upon from theoretical and practical perspectives by authors from various fields literature history philosophy sociology ethnology closely examining text references from Lefebvre *Algorithms for Sensor and Ad Hoc Networks* Dorothea Wagner,Roger Wattenhofer,2007-09-27 This monograph presents the outcome of a GI Dagstuhl Seminar held in Dagstuhl Castle in November 2005 It gives a first overview of algorithmic results on wireless ad hoc and sensor networks Many chapters deal with distributed algorithms Importance is attached to topics that combine both interesting aspects of wireless networks and attractive algorithmic methods Each chapter provides a survey of some part of the field while selected results are described in more detail **Functional Integration** Cécile Dewitt-Morette,Antoine Folacci,2013-11-11 The program of the Institute covered several aspects of functional integration from a robust mathematical foundation to many applications heuristic and rigorous in mathematics physics and chemistry It included analytic and numerical computational techniques One of the goals was to encourage cross fertilization between these various aspects and disciplines The first week was focused on quantum and classical systems with a finite number of degrees of freedom the second week on field theories During the first week the basic course given by P Cartier was a presentation of a recent rigorous approach to functional integration which does not resort to discretization nor to analytic continuation It provides a definition of functional integrals

simpler and more powerful than the original ones Could this approach accommodate the works presented by the other lecturers Although much remains to be done before answering Yes there seems to be no major obstacle along the road The other courses taught during the first week presented a solid introduction to functional numerical techniques A Sokal and their applications to functional integrals encountered in chemistry N Makri b integrals based on Poisson processes and their applications to wave propagation S K Foong in particular a wave restorer or wave designer algorithm yielding the initial wave profile when one can only observe its distortion through a dissipative medium c the formulation of a quantum equivalence principle H Kleinert which given the flat space theory yields a well defined quantum theory in spaces with curvature and torsion

Sinology during the Cold War Antonina Łuszczkiewicz, Michael Brose, 2022-05-18 This volume provides the first study of the history of sinology aka China studies as charted across several communist states during the Cold War The People's Republic of China was created in the first years of the Cold War with its early history and foreign policy intimately bound up in that larger geopolitical fight All the seismic changes in China's geopolitical landscape from its emergence and close relationship with the Soviet Union to the Sino Soviet split and the eventual rapprochement with the United States resulted in a great deal of interest by journalists politicians and scholars Yet although scholars across the Soviet Bloc produced an impressive body of work on a range of sinological studies with rare exceptions most of those scholars and their work remains unknown outside their own intellectual circles This book redresses this dearth of knowledge of sinological scholarship providing invaluable and unique glimpses of Soviet Bloc sinologists and their work during the Cold War including cutting edge research on lesser studied communist states such as Poland Hungary Mongolia and others International in scope this book is ideal for scholars and researchers of modern history Chinese studies sinology and the Cold War
