## **French And Other Perspectives In Praxiology:**

*French and Other Perspectives in Praxiology* Wojciech W. Gasparski, 2018-01-18 Volume 12 in this distinguished series explores current topics in praxiology as studied in France and elsewhere. As is characteristic of contemporary praxiology, contributors both investigate new topics and use new methods to re-examine older approaches. Part 1 is composed of three sections by French scholars. These deal with humans as a subject of action as well as a subject of knowledge. In respecting the particular domains of psychology and praxiology, they demonstrate how they converge to shed light on the human being as an individual or as part of a group. The first section discusses relations between individual action and collective action, while the second section is concerned with relations between the act, objects and space and explores work spaces, production spaces, office spaces and social spaces. The third section examines relations between action and cognition, a domain considered to be little understood in general. Finally, the role of mathematics in decision making is discussed as a determinate of the praxiological process. The second part is composed of contributions by scholars from Finland, Great Britain, Poland, Portugal, Spain and the United States. The topics are how praxiology helps economists understand cooperative actions and related issues of different responsibilities; how and to what extent university education creates conditions for competitive advantage in the countries of Central and Eastern Europe; and how problems of corporate governance are approached in the region; how innovation influences competence in the region of established economy in Spain; and how information systems constitute a multi-agent system. Finally, a formal analysis of praxiological dimensions in light of the fuzzy logic approach is discussed.

*Global Perspectives on Ethics of Corporate Governance* G. Rossouw, A. Sison, 2006-11-27 This volume takes a hard look at the soft practice of corporate governance. It grew out of a series of contributions from the Third ISBEE World Congress on Business Ethics that took place on July 2004 in Melbourne.

**Praxiology and the Philosophy of Technology**  
*Praxiology and the Philosophy of Technology* Wojciech W. Gasparski, Timo Airaksinen, 2008 Addresses useful questions about the philosophy and ethics of technology. This book discusses general questions about the theory of technology. It focuses on special topics like information and communication technologies and work systems as well as the foundations of problem solving and the history of innovation in the age of enlightenment.

*Praxiological Essays* Wojciech W. Gasparski, 2017-09-26 The 25th volume in the series *Praxiology: The International Annual of Practical Philosophy and Methodology* brings a praxiological perspective to current issues facing our society. In sixteen brand new essays, a team of international scholars expands praxiology beyond the borders of its historically philosophical application and uses it to address real world problems in a variety of fields. The volume outlines new approaches and reflections on traditional praxiological method and then applies these developments as tools in fields as diverse as ethics, psychology, sociology, economics, management and entrepreneurship. Grounded in the tradition of the Polish praxiologist Tadeusz Kotarbiński (1886-1981), the 25th volume entitled *Praxiological Essays: Texts and Contexts* highlights the rich mosaic of issues perceived in the practice of human action and carries a tradition of praxiological inquiry.

forward into our contemporary philosophy methodology and social sciences      **The True Value of CSR B.**

Fryzel,2014-12-22 By considering the importance of Corporate Social Responsibility CSR as a business paradigm but also as a growing scepticism about its outcomes The True Value of CSR answers questions about true value behind this concept motivations of firms embedding CSR in their core strategies and a capacity of CSR to make a real difference on the market

*Entrepreneurship* Stefan Kwiatkowski,2017-07-28 Entrepreneurship is the capability to be an entrepreneur Beyond that idea is an ideology that a person's business actions result in industrial growth or technical advances making that person a leader in the economic world The contributors to this latest volume in the Praxiology Series now available in paperback are united in claiming that resourcefulness is a characteristic of people who take effective action and that effectiveness is dependent on good ethical purposes The wide angle definition of entrepreneurship presented in this volume demands that people and organizations engage in more than simple self interest but also display awareness of the prospects for wider growth and advances resulting from their decisions In a period of financial crisis caused by irresponsible behavior by eminent would be entrepreneurs the significance of this perspective should be evident The editors claim that growth not stagnation advantage not decline are irreversible traits of business activity This is why the very concept of entrepreneurship calls for values and responsibility even more than in the past The contributors develop the idea of entrepreneurship from both theoretical approaches religious and practical or applied perspectives This inter and multidisciplinary approach offers readers a chance to rebuild trust in entrepreneurship      *Knowledge Flows, Technological Change and Regional Growth in the European Union*

Małgorzata Runiewicz-Wardyn,2013-06-14 The book provides conceptual and empirical insights into the complex relationship between knowledge flows and regional growth in the EU The author critically scrutinizes and enhances the RIS Regional Innovation System approach discussing innovation as a technological institutional and evolutionary process Moreover she advances the ongoing discourse on the role of space and technological proximity in the process of innovation and technological externalities The book closes with an investigation of the role of technological change and knowledge spillovers in the dynamic growth and catching up of EU regions      **Current Trends in Environmental Psychology, volume I, 2nd edition**
