French Capitalism In The Nineteenth Century:

French Capitalism in the Nineteenth Century Guy P. Palmade, 1972 French capitalism in the nineteenth century Guy Palmade, 1972 **Routledge Revivals: French Cities in the Nineteenth Century (1981)** John Merriman, 2018-02-01 Originally published in 1981 *French Cities in the Nineteenth Century* analyses large scale processes of social change and looks at how this affected the growth of towns and cities of nineteenth century France The book addresses how this change affected the politics of life in France during the nineteenth century as well as how the city was organised Urbanization created new uses of space and new concerns for the people that lived among them and the book looks at how social change was a collective experience for the people of France and how this transformed the societies in which they lived

Saint-Simonians in Nineteenth-Century France Pamela M. Pilbeam, 2014-01-02 Saint Simonians were a group of young engineers and doctors who proposed original solutions to the social and banking crises of the early nineteenth century Through an examination of the lives ideals and activities of these men and women the book analyses the influence of the Saint Simonians on nineteenth century French society **Typology of Industrialization Processes in the Nineteenth Century** S. Pollard, 2013-09-27 This title considers the main similarities and differences in the industrialization processes of the major economies *Typology of Industrialization Processes in the Nineteenth Century* A. Joseph Pollard, 2020-02-13 The industrial revolution in Great Britain was the first example of the transition to a modern industrial economy Certain features of this transition were later copied and modified by other countries undergoing the same process This book considers the main similarities and differences in the process of industrialization grouping the main countries **Big Business and Industrial Conflict in Nineteenth-Century France** Lenard R. Berlanstein, 2023-11-15 Founded in 1855 the Parisian Gas Company PGC quickly developed into one of France's greatest industrial enterprises an exemplar of the new industrial capitalism that was beginning to transform the French economy The PGC supplied at least half the coal gas consumed in France through the 1870s and became the city's single largest employer of clerical and factory labor Representing a new form and scale of capitalistic endeavor the firm's history illuminates the social tensions that accompanied the nation's industrialization and democratization To study the company over its fifty year life is to see industrializing France writ small Using previously untapped company archives Lenard R Berlanstein has written a rich and detailed study that skillfully bridges the divide between business social and labor history Founded in 1855 the Parisian Gas Company PGC quickly developed into one of France's greatest industrial enterprises an exemplar of the new industrial capitalism that was beginning to transform the French economy The PGC supplied at least half the coal *The Stonemasons of Creuse in Nineteenth-century Paris* Casey Harison, 2008 The stonemasons were well known for their skills and their seasonal migration from central France but especially for their role in rebellion This book places the masons story within the larger history of nineteenth century Paris The coverage spans the long nineteenth century starting before 1789 and ending near 1914 **French Cities in the**

Nineteenth Century John M. Merriman, 1982 *The Origins of the French Nationalist Movement, 1886-1914* Robert Lynn Fuller, 2014-01-10 This narrative history explores the emergence of one of the most influential Nationalist movements of modern Europe. It explains how and why the movement united the far right with the far left in a militant campaign to wrest control of France from the moderate republicans who were attempting to stabilize the country after a century of political volatility. The agitation groups, propaganda machines, street fighting gangs, and political hustlers who made up the Nationalists all campaigned for one end: to overthrow the Third Republic. The eruption of the Dreyfus Affair, 1894-1899, provided the Nationalists with a convenient target for their assaults: the Dreyfusard defenders of a wrongly convicted Jewish army captain, Alfred Dreyfus. This work, based on original archival research in France, argues that the Nationalists posed a real and dangerous threat that dissipated only when their goals were adopted by more moderate competing groups. *A Social History of France 1780-1914* Peter McPhee, 2017-03-03 This volume provides a lively and authoritative synthesis of recent work on the social history of France and is now thoroughly updated to cover the long nineteenth century from 1789-1914. Peter McPhee offers both a readable narrative and a distinctive coherent argument about this remarkable century and explores key themes such as Peasant interaction with the environment, The changing experience of work and leisure, The nature of crime and protest, Changing demographic patterns and family structures, The religious practices of workers and peasants, The ideology and internal repercussions of colonisation. At the core of this social history is the exercise and experience of social relations of power, not only because in these years there were four periods of protracted upheaval, but also because the history of the workplace, of relations between women and men, adults and children, is all about human interaction. Stimulating and enjoyable to read, this indispensable introduction to nineteenth century France will help readers to make sense of the often bewildering story of these years while giving them a better understanding of what it meant to be an inhabitant of France during that turbulent time. *The Bourgeois Revolution in France 1789-1815* Henry Heller, 2006-05-01 In the last generation, the classic Marxist interpretation of the French Revolution has been challenged by the so-called revisionist school. The Marxist view that the Revolution was a bourgeois and capitalist revolution has been questioned by Anglo-Saxon revisionists like Alfred Cobban and William Doyle, as well as a French school of criticism headed by François Furet. Today, revisionism is the dominant interpretation of the Revolution both in the academic world and among the educated public. Against this conception, this book reasserts the view that the Revolution, the capital event of the modern age, was indeed a capitalist and bourgeois revolution. Based on an analysis of the latest historical scholarship as well as on knowledge of Marxist theories of the transition from feudalism to capitalism, the work confutes the main arguments and contentions of the revisionist school while laying out a narrative of the causes and unfolding of the Revolution from the eighteenth century to the Napoleonic Age. **The French Economy in the Twentieth Century** Jean-Pierre Dormois, 2004-07 This new textbook examines the spectacular transformation that the French economy has undergone over

the past century Jean Pierre Dormois offers a general introduction to the major trends as well as recent transformations of French society and an overview of modern economic development He tackles the key themes associated with the French path of economic development Malthusianism exceptionalism and Colbertism Other chapters address standard economic issues on the role of human capital formation economic institutions and openness to the rest of the world The author examines and interprets trends and features of the period as a whole and sets them in a wider European framework This book offers students a helpful and concise summary of recent research and presents a uniquely synthetic view of the French economy in the twentieth century It will have broad appeal for students and teachers of French and of European history and economics

The Emergence of Modern Business Enterprise in France, 1800-1930 Michael Stephen Smith, 2006 In this magisterial study Michael Smith explains how France left behind small scale merchant capitalism for the large corporate enterprises that would eventually dominate its domestic economy and project French influence throughout the world Arguing against the long standing view that French economic and business development was crippled by missed opportunities and entrepreneurial failures Smith presents a story of considerable achievement French companies made major contributions to the Second Industrial Revolution of 1880 1930 especially in ferrous and non ferrous metallurgy electrochemicals industrial gases and motor vehicles Rejecting the notion that France took a separate route to economic modernity Smith argues that it tracked other industrial nations along a path dominated by large scale production and corporate enterprise Technological and organizational capabilities acquired by French companies prior to 1930 played a key role in the country's rapid economic recovery after World War II and its broader economic success in the second half of the twentieth century Smith also addresses the distinctive characteristics of French economic and business development including the pivotal role of the French state the pervasive influence of French financiers and the significance of labor conflict This superb account is an invaluable contribution to business history and the history of modern France

[Bibliography of European Economic and Social History](#) Derek Howard Aldcroft, Richard Rodger, 1993 This bibliographical guide contains 10 000 references to the economic and social history of 30 European countries during the period 1700 1939 More than 3000 periodicals have been consulted to obtain references as well as books edited collections and conference proceedings The information is listed in categories such as industry agriculture finance migration labour conditions urban communities and organizations Full publication details are included so that references may be located easily

[The Industrialisation of the Continental Powers 1780-1914](#) Clive Trebilcock, 2014-07-22 The Industrialisation of the Continental Powers is both a broad survey of the process of European industrialisation from the late eighteenth century to the First World War and also a closely argued comparative economic study of how this process was experienced by different great powers

Religion, Society and Politics in France Since 1789 Frank Tallett, Nicholas Atkin, 1991-01-01 This book has been carefully planned to give a coherent account of the impact of religion in France over the last two hundred years Most books in English dealing with the subject

are now dated and in any case concentrate on institutional questions of church state relations rather than on the wider influence of religion throughout France These essays summarise recent French research and provide a concise up to date introduction to the history of modern French Catholicism **France, 1815-1914** Roger Magraw,1986 In this lively and stimulating study Roger Magraw examines how the 19 century French bourgeoisie struggled and eventually succeeded in consolidating the gains it made in 1789 Incorporating the most recent research on religion and anticlericalism the development of the economy the role of women in society and the educational system he lucidly defends the view that the French revolution was indeed a bourgeois revolution **History and Ideology in Proust** Michael Sprinker,1998 This departure from the norm reveals a side to Proust that was capable of observing the class struggle in the Third Republic a possibility that the author discovered in his studying and interpretation of *A la recherche du temps perdu* *France 1715-1804* Gwynne Lewis,2018-12-14 Gwynne Lewis history opens with a full analysis of all the components of traditional France including political and religious structures the seigneurial system the bourgeoisie and the poor Part two examines the meaning and challenge of the Enlightenment with particular reference to women and the mass of the poor Part three concentrates upon the relationship between the shift to laissez faire economics popular revolts and government repression providing the essential background to the Revolutionary decade of the 1790s The Revolution witnessed the rise of a politicised Popular Movement that achieved briefly a measure of popular democracy War and counter revolution blocked the move towards real democracy strengthened the authority of the centralised state and enhanced the credibility of bourgeois political and economic power One of the main contentions of this work is that the failure of both monarchical and Revolutionary regimes to deal with the massive social problem of poverty played a far larger part in explaining the collapse of the Bourbons in 1789 and the failure of democracy during the 1790s than most historians have allowed Likewise the importance of religion in directing the momentous events of this period has also been under estimated
