The Pineapple from Domestication to Commodification Victoria Avery, Melissa Calaresu, 2025-10-15 The pineapple's discovery by European colonisers in the late fifteenth century and its remarkable global trajectory from an early modern object of rarity desire and horticultural innovation to a cheap canned consumable and fair trade logo today is a story of modern globalisation The Pineapple from Domestication to Commodification is a wide ranging interdisciplinary volume intended to provoke timely debate and generate radical rethinking of an overly familiar fruit with associations from luxury to kitsch It deliberately problematizes the pineapple by investigating understudied tensions between its representational power and the historical and political contexts of its worldwide production and consumption This connects the global and local at the heart of contemporary debates about the nature and origins of our food It will have cross disciplinary appeal for scholars of politics economics history plant sciences food and material culture as well as for broader audiences interested in food gardening the environment and visual arts *De Bow's Review of the Southern and Western States* James Dunwoody Brownson De Bow, 1851

The Andean Wonder Drug Matthew James Crawford, 2016-09-07 In the eighteenth century malaria was a prevalent and deadly disease and the only effective treatment was found in the Andean forests of Spanish America a medicinal bark harvested from cinchona trees that would later give rise to the antimalarial drug quinine In 1751 the Spanish Crown asserted control over the production and distribution of this medicament by establishing a royal reserve of fever trees in Quito Through this pilot project the Crown pursued a new vision of imperialism informed by science and invigorated through commerce But ultimately this project failed much like the broader imperial reforms that it represented Drawing on extensive archival research Matthew Crawford explains why showing how indigenous healers laborers merchants colonial officials and creole elites contested European science and thwarted imperial reform by asserting their authority to speak for the natural world The Andean Wonder Drug uses the story of cinchona bark to demonstrate how the imperial politics of knowledge in the Spanish Atlantic ultimately undermined efforts to transform European science into a tool of empire [A Brief History of Slavery](#) Jeremy Black, 2011-08-18 A thought provoking and important book that raises essential

issues crucial not only for understanding our past but also the present day In this panoramic history Jeremy Black tells how slavery was first developed in the ancient world and reaches all the way to the present in the form of contemporary crimes such as trafficking and bonded labour He shows how slavery has taken many forms throughout history and across the world from the uprising of Spartacus the plantations of the West Indies and the murderous forced labour of the gulags and concentration camps Slavery helped to consolidate transoceanic empires and helped mould new world societies such as America and Brazil Black charts the long fight for abolition in the nineteenth century looking at both the campaigners as well as the harrowing accounts of the enslaved themselves Slavery is still with us today and coerced labour can be found closer to home than one might expect **Publishers' Circular and Booksellers' Record of British and Foreign Literature**, 1907
