The nineteenth century novelist George Sand is most famous today for her tumultuous love life and trouser wearing days in Paris but she achieved major commercial and critical success in her day and has gradually made her way back into the literary canon Mainly known for her pastoral tales and allegedly simplistic idealism Sand in fact produced around ninety novels which experiment with a wide range of themes forms and aesthetic models This book offers the first study of vision in Sand's works It argues that rather than rejecting reality in favour of the ideal Sand integrates physical observation with internal forms of seeing such as the imagination and visionary insights The study maintains that Sand's understanding of vision provides the basis for her distinctive style and challenges conventional categorisations of the novel in this period

Jeanne Delbaere-Garant, 2013-05-22 Both James's life and his literary career might be figured as a double spiral rooted at the one end in the American soil and in romanticism contracting in its middle on contact with France and French naturalism and expanding again into the Anglo Saxon world and into the twentieth century The spiral which also suggests the artist's indirect approach to reality strikes me as an adequate symbol for Henry James From Bramante's ramp in the Vatican to F L Wright's in the Guggenheim Museum it has always been the favourite shape of all those who claimed greater freedom for the artist rejected the fixity of academic rules and were convinced that art like the spirit of man is capable of endless progress
