**French Structuralism** Roland A. Champagne, 1990      *The Cambridge History of Literary Criticism: Volume 8, From Formalism to Poststructuralism* George Alexander Kennedy, Raman Selden, 1989  
Volume 8 of *The Cambridge History of Literary Criticism* deals with the most influential and hotly debated areas of literary theory those developing in Europe but having their main impact in the Anglo American world of academic literary studies whose course they have fundamentally redirected. The structuralism, poststructuralism, Russian formalism, semiotics, narratology, hermeneutics, phenomenology, reception theory and speech act theory associated with European writers including Barthes, Todorov, Derrida and Iser are here described in the context of their original development but with an eye also to their eventual influence and the volume includes a reflective chapter by Richard Rorty on deconstruction. Incorporating full bibliographies, this volume engages systematically with the history of the twentieth century's most profound and extensive set of cross cultural intellectual movements.

*The Rise of Anthropological Theory* Marvin Harris, 2001-08-14  
The best known most often cited history of anthropological theory is finally available in paperback. First published in 1968, Harris's book has been cited in over 1 000 works and is one of the key documents explaining cultural materialism, the theory associated with Harris's work. This updated edition included the complete 1968 text plus a new introduction by Maxine Margolis which discusses the impact of the book and highlights some of the major trends in anthropological theory since its original publication. RAT as it is affectionately known to three decades of graduate students comprehensively traces the history of anthropology and anthropological theory culminating in a strong argument for the use of a scientific, behaviorally based, etic approach to the understanding of human culture known as cultural materialism. Despite its popularity and influence on anthropological thinking, RAT has never been available in paperback until now. It is an essential volume for the library of all anthropologists, their graduate students and other theorists in the social sciences.

**French Nietzscheanism: A Note on the Philosophical School** Pons Malleus, 2025-08-19  
The story of French Nietzscheanism is not merely one of philosophical inheritance; it is a tale of reinvention, provocation and enduring transformation. Emerging in the intellectual crucible of twentieth century France, this movement represents one of the most creative appropriations of Friedrich Nietzsche's thought: an appropriation that did not seek to preserve his philosophy as sacred doctrine but instead treated it as a living force, a weapon of critique and a source of existential and conceptual liberation. This book explores the broad and complex terrain of

French Nietzscheanism tracing its influence across the works of Jacques Derrida Michel Foucault Gilles Deleuze and others It charts the way in which Nietzsche's ideas on power morality language subjectivity and history were reinterpreted and reassembled in response to the unique philosophical political and cultural tensions of twentieth century France Nietzsche's call for the revaluation of values his suspicion of absolute truths and his celebration of becoming over being resonated profoundly with French thinkers grappling with the legacies of Hegelianism Marxism psychoanalysis and structuralism To speak of a school of French Nietzscheanism is both necessary and misleading Necessary because there is a discernible trajectory in which Nietzsche's philosophy serves as a catalyst for a sustained critique of Western metaphysics and humanist subjectivity Misleading because the thinkers gathered under this label are marked as much by their differences as by their shared admiration for Nietzsche Each figure selected his Nietzsche Dionysian or ascetic anti-Christian or aesthetic genealogist or tragic philosopher to serve his own philosophical project Yet their divergence is precisely what makes French Nietzscheanism philosophically fertile it resists dogma encourages experimentation and invites us to rethink thought itself What unites these thinkers is less a doctrinal fidelity to Nietzsche than a methodological affinity a shared commitment to genealogy to the unmasking of hidden power structures and to the disruption of static conceptual binaries For Foucault Nietzsche provided the key to understanding how knowledge and power are historically constructed For Deleuze Nietzsche was the philosopher of difference and affirmation a figure capable of overturning the reactive forces that govern modern thought For Bataille and Blanchot Nietzsche opened the door to the experience of limit transgression and the dissolution of the subject In the aftermath of World War II as France reeled from the trauma of fascism and colonialism Nietzsche's work offered an alternative to the stifling moralism of traditional philosophy and the deterministic schemas of orthodox Marxism French Nietzscheanism became a philosophy of resistance not only political resistance but resistance to philosophical complacency linguistic conformity and the very structures of identity and reason that once underpinned Enlightenment thinking This book does not aim to provide a comprehensive history of Nietzsche reception in France nor to defend a single reading of Nietzsche's philosophy Rather it invites readers into a conversation between Nietzsche and his French interlocutors between past and present between philosophy and life In doing so it hopes to reveal how Nietzsche's thought far from being a closed system remains a provocation a challenge to reimagine the possibilities of freedom thought and becoming

*Heidegger and French Philosophy* Tom Rockmore, 2002-09-11 Martin Heidegger's impact on contemporary thought is important and controversial However in France the influence of this German philosopher is such that contemporary French thought cannot be properly understood without reference to Heidegger and his extraordinary influence Tom Rockmore examines the reception of Heidegger's thought in France He argues that in the period after the Second World War due to the peculiar nature of the humanist French Philosophical tradition Heidegger became the master thinker of French philosophy Perhaps most importantly he contends that this reception first as philosophical anthropology and later as postmetaphysical humanism is systematically mistaken
