with full US involvement increasingly dominated the skies overhead The successive occupations of Sardinia and Corsica are also covered in detail This is essentially the story of the tactical air forces up to the point when Rome was occupied just at the same time as the Normandy landings were occurring in northwest France With regards to the long range tactical role of the Allied heavy bombers only the period from May to October is examined while they remained based in North Africa with the narrative continuing in a future volume This volume also delves into the story of the soldiers air force Frequently overshadowed by more immediate newsworthy events elsewhere the soldiers struggle was often of an equally Homeric nature No future publication on the Mediterranean air war will be credible without use of this series Air Power History
