*French Education Since Napoleon* Joseph N. Moody, 1978-07      **Mobility, Elites and Education in French Society of the Second Empire** Patrick J. Harrigan, 2006-01-01 Based on a unique historical source this book examines the social origins career expectations and first jobs of 28 000 students in the elitist French secondary schools of the 1860s Using sophisticated statistical analysis as well as conventional historical sources the work concludes that schooling reached a wider audience than has been so far believed and that substantial social mobility occurred within the school system but that family background rather than educational factors directed students career aspirations and achievements It also argues that although education expanded in urban industrialized areas mobility did not increase in these areas A final chapter reconsiders nineteenth century thought concerning education in the light of findings about the social effects of schools

*Educational Philosophy in the French Enlightenment* Natasha Gill, 2016-04-29 Though Emile is still considered the central pedagogical text of the French Enlightenment a myriad of lesser known thinkers paved the way for Rousseau s masterpiece Natasha Gill traces the arc of these thinkers as they sought to reveal the correlation between early childhood experiences and the success or failure of social and political relations and set the terms for the modern debate about the influence of nature and nurture in individual growth and collective life Gill offers a comprehensive analysis of the rich cross fertilization between educational and philosophical thought in the French Enlightenment She begins by showing how in *Some Thoughts Concerning Education* John Locke set the stage for the French debate by transposing key themes from his philosophy into an educational context Her treatment of the abb Claude Fleury the rector of the University of Paris Charles Rollin and Swiss educator Jean Pierre de Crousaz illustrates the extent to which early Enlightenment theorists reevaluated childhood and learning methods on the basis of sensationist psychology Etienne Gabriel Morelly usually studied as a marginal thinker in the history of utopian thought is here revealed as the most important precursor to Rousseau and the first theorist to claim education as the vehicle through which individual liberation social harmony and political unity could be achieved Gill concludes with an analysis of the educational philosophical dispute between Helvetius and Rousseau and traces the influence of pedagogical theory on the political debate surrounding the expulsion of the Jesuits in 1762      **State And The Rise Of National Education Systems** Andy Green, 1990-05-22 Britain was the last major European state to create a national education system and is set to be the first to dismantle it In this wide ranging comparative study Andy Green examines the reasons for the uneven development of public education in England Prussia France and the USA      *Schooling American Society* Ramon Sanchez, 1976      *Jacques Derrida and the Institution of French Philosophy* Vivienne Orchard, 2017-12-02

Jacques Derrida 1930 2004 was unquestionably one of the most celebrated and reviled French thinkers of the last thirty years Outside France his influence in comparative literature circles through deconstruction and other ideas has been so profound that his personal role as a leader of contemporary French philosophy has been almost overlooked Perhaps because

there is no equivalent in English speaking countries to the timetabling of philosophy in the French education system writers on Derrida outside France have not fully appreciated the importance of this political and cultural struggle In this ground breaking book Orchard examines a hard fought debate of great importance not only to Derrida himself but also to France s idea of what studying philosophy might mean after the student uprisings of 1968 *Education and State Formation* Andy Green,2016-07-27 Britain was the last major European state to create a national education system and is set to be the first to dismantle it In this wide ranging comparative study Andy Green examines the reasons for the uneven development of public education in England Prussia France and the USA **Educational Reform in Post-Soviet Russia** Ben Eklof,Larry Eugene Holmes,Vera Kaplan,2005 A collection of essays which examine the reform of the educational system in post Soviet Russia in historical and comparative perspective Education and State Formation A. Green,2013-10-23 Education has always been a key instrument of nation building in new states National education systems have typically been used to assimilate immigrants to promote established religious doctrines to spread the standard form of national languages and to forge national identities and national cultures They helped construct the very subjectivities of citizenship justifying the ways of the state to the people and the duties of the people to the state In this second edition of his seminal and widely acclaimed book on the origins of public education in England France Prussia and the USA Andy Green shows how education has also been used as a tool of successful state formation in the developmental states of East Asia While human capital theories have focused on how schools and colleges supply the skills for economic growth Green shows how the forming of citizens and national identities through education has often provided the necessary condition for both economic and social development **Essays in European History** Carolyn W. White,1996 This volume continues a series of essays exploring broad topics in European history Included are studies on twentieth century topics in German Italian and Moroccan history Britain is represented by essays on the medico legal theory of rabies and comparative study of the ideas of John Thelwall and Edmund Burke Roy Willis on France s overseas territories Orest Ranum on the refinement and elaboration of the printed form in the eighteenth century James Leith on the historical evolution of a children s board and two studies on education all attest to a noteworthy French orientation in this volume French Caesarism from Napoleon I to Charles de Gaulle Philip Thody,1989-07-31

*Social Equality in Education* Ann Margaret Doyle,2018-08-21 This book explores the development of education in France and England from the French Revolution to the outbreak of World War II The author uses social equality as a framework to compare and contrast the educational systems of both countries and to emphasise the distinctive ideological legacies at the heart of both systems The author analyses how the French Revolution prompted the emergence of an egalitarian ideology in education that in turn was crucial for propagating the values of equality patriotism and unity In tandem the volume discusses the equally dramatic consequences of the Industrial Revolution for English society while England led the world by 1800 in trade commerce and industry a strict form of liberalism and minimal state intervention impeded the reduction of educational

inequality This pioneering book will be of interest to students and scholars of educational equality as well as the history of education in France and England      **The Catholic Church and the French Nation 1589-1989** Norman

Ravitch, 2025-05-01 Paris is worth a mass was the realistic response of Protestant Henry IV who changed his faith to secure the throne of France to the central importance of the French Catholic Church Principle and pragmatism have since been in alteration the two prime constituents of French Catholicism In his book *The Catholic Church and the French Nation 1589-1989* originally published in 1990 Norman Ravitch interprets the interaction of the Roman Catholic Church with the national life of France over a period of 400 years This process Ravitch argues has left French Catholicism redundant more an historical monument than a living institution This book will be of interest to students and researchers of French history

The Ecole Normale Supérieure and the Third Republic Robert J. Smith, 1981-06-30 The Ecole Normale Supérieure was founded during the Revolutionary era to dominate the educational structure of France During the Third Republic the French academic elite trained at the Ecole Normale Supérieure greatly expanded its national role and enhanced its prestige and influence In this book the first full treatment of the social and political history of the Ecole Normale Supérieure in recent times Robert J Smith has examined the changing world of the normaliens under the Third Republic and their new but temporary cultural and political importance His comparative study of the social origins education political ideas and careers of the normaliens and students of other grandes écoles documents the segmented character of French elites and indicates the evolution of French society during this period      The Politics of Modernism Harvey Hill, 2002 In the nineteenth century most people assumed that the modern spirit and Catholicism the great religion of authority were irreconcilably opposed However some tried to combine the two in a reformed and modernized Catholicism These efforts and the reaction of the institutional Church against them precipitated the Modernist Crisis Alfred Loisy 1857-1940 was at the center of this dramatic conflict between advocates and opponents of modernity Loisy believed that his adoption of scientific methods to study the Bible and the history of Christianity necessarily committed him to a campaign to modernize Catholicism as a whole In this book Harvey Hill describes the emergence articulation and ultimate fate of Loisy's reform program as he interacted with allies and opponents of his modernizing agenda By tracing Loisy's early intellectual and religious development in more detail than have previous scholars Hill shows how Loisy self consciously placed his historical scholarship at the service of a positive reform agenda from the very beginning of his ecclesiastical career and that he viewed this reform agenda as an intrinsic part of his critical work Drawing on some of Loisy's unpublished writings and little known articles Hill goes on to demonstrate that Loisy's efforts to reform Catholicism presupposed a new view of the nature and limits of Church authority in relation to the secular state as well as to modern scholarship Hill uses Loisy's political views to illustrate the more general challenge to ecclesiastical authority that was again an intrinsic part of the modern scientific study of religion as Loisy understood it Hill's interpretation of Loisy and the theology and politics of the scientific study of religion will interest students of Catholic

Modernism the history of modern religion and the emergence of religious studies as an academic discipline Harvey Hill is Assistant Professor of Religion at Berry College He is the coeditor of *Personal Faith and Institutional Commitment* *Roman Catholic Modernist and Anti Modernist Autobiography* and author of numerous essays articles and reviews Praise for the book *One* is unlikely to find in any language a clearer better written introduction to the neuralgic career of Alfred Loisy than Harvey Hill's In addition to its clarity what sets it apart from the many studies of Loisy is its well argued conception of the historical integrity of Loisy's mature modernist works as growing out of ideas he formulated in the 1870's and the 1880's to which other scholars have paid scant attention Out of an artful rehearsal of the conflicts with church authorities over Loisy's historical criticism of Scripture and tradition with implications for doctrine what emerges is a clarification of the role of Loisy's political interests thus the book's title Far from taking sides in the conflict between Loisy and the church authorities Hill maintains aesthetic distance David G Schultenover *S J Catholic Historical Review* A much needed book on the role of Loisy and the scientific study of religion This is a valuable study of an important individual and time in the contemporary history of the Catholic Church It is also most relevant as it addresses an actual dilemma for many Catholic intellectuals today I highly recommend this book for anyone interested in the contemporary history of the Church and for those searching for an adequate relation of faith and reason Lucien J Richard *OMI Catholic Library World* Harvey Hill has succeeded in breaking new ground in this study in which he insightfully sets forth issues underlying Loisy's writings and tests his judgments against the secondary literature More than previous scholars Hill clarifies the extent of Loisy's political interests Hill's ability to co

**Schooling the Daughters of Marianne** Linda L. Clark, 1984-06-30 This first book length study of girls primary education in France gives a concrete picture of how Frenchwomen were and are prepared for their roles in society Until the 1960s the primary school provided the only formal education for the majority of French children Long recognized as a major inculcator of patriotic and moral values the French primary school also played the vital role of preparing girls for their expected adult lives Linda L Clark describes in detail this socialization process By analyzing a wide variety of documents from 1870 to the present textbooks curriculum materials students notebooks examination questions inspectors reports and teachers memoirs she has uncovered not only what was taught to girls but the social and political assumptions that lay behind the primary school's messages about feminine personalities and activities The book goes on to establish the relationship of feminine images to important aspects of French social economic and political life A chapter on the preparation of girls for the world of work for example reveals the discrepancy between formal teaching about femininity and women's actual participation in society [The Mobilization of Intellect](#) Martha Hanna, 1996 When President Poincaré in the early days of World War I called on the French intellectual elite to contribute to the war effort with their pens and their words the union sacrée of scholars and writers including Henri Bergson Pierre Duhem Ernest Lavisse and Emile Durkheim united French intellect against German Kultur **French Colonialism Unmasked** Ruth Ginio, 2006-12-01 Before the Vichy regime there

was ostensibly only one France and one form of colonialism for French West Africa FWA World War II and the division of France into two ideological camps each asking for legitimacy from the colonized opened for Africans numerous unprecedented options French Colonialism Unmasked analyzes three dramatic years in the history of FWA from 1940 to 1943 in which the Vichy regime tried to impose the ideology of the National Revolution in the region Ruth Ginio shows how this was a watershed period in the history of the region by providing an in depth examination of the Vichy colonial visions and practices in fwa She describes the intriguing encounters between the colonial regime and African society along with the responses of different sectors in the African population to the Vichy policy Although French Colonialism Unmasked focuses on one region within the French Empire it has relevance to French colonial history in general by providing one of the missing pieces in research on Vichy colonialism Ruth Ginio is a research fellow at the Harry S Truman Research Institute for the Advancement of Peace in the Hebrew University of Jerusalem She is the author of articles in International Journal of African Historical Studies Revue d histoire moderne et contemporaine Cahiers d etudes africaines and several other journals *The Shaping of Jewish Identity in Nineteenth-Century France* Jay R. Berkovitz, 2018-02-05 Focusing on the ideology of regeneration Jay Berkovitz traces the social economic and religious struggles of nineteenth century French Jews Nineteenth century French Jewry was a community struggling to meet the challenges of emancipation and modernity This struggle with its origins in the founding of the French nation constitutes the core of modern Jewish identity With the Revolution of 1789 came the collapse of the social political and philosophical foundations of exclusiveness forcing French society and the Jews to come to terms with the meaning of emancipation Over time the enormous challenge that emancipation posed for traditional Jewish beliefs became evident In the 1830s a more comprehensive ideology of regeneration emerged through the efforts of younger Jewish scholars and intellectuals A response to the social and religious implications of emancipation it was characterized by the demand for the elimination of rituals that violated the French conceptions of civilization and social integration a drive for greater administrative centralization and the quest for inter communal and ethnic unity In its various elements regeneration formed a distinct ideology of emancipation that was designed to mediate Jewish interaction with French society and culture Jay Berkovitz reveals the complexities inherent in the processes of emancipation and modernization focusing on the efforts of French Jewish leaders to come to terms with the social and religious implications of modernity All in all his emphasis on the intellectual history of French Jewry provides a new perspective on a significant chapter of Jewish history *Between the Devil and the Deep Blue Sea?* Zvi Jonathan Kaplan, 2009
