French Philosophers From Descartes To Sa:

Contemporary French Philosophy A. Phillips Griffiths, Pascal Engel, 1987 A lively and accessible guide to some of the major issues current in French philosophy today

French Philosophy, 1572-1675 Desmond M. Clarke, 2016-04-15

Desmond M Clarke presents a thematic history of French philosophy from the middle of the sixteenth century to the beginning of Louis XIV's reign. While the traditional philosophy of the schools was taught throughout this period by authors who have faded into permanent obscurity, a whole generation of writers who were not professional philosophers, some of whom never even attended a school or college, addressed issues that were prominent in French public life. Clarke explores such topics as the novel political theory espoused by monarchomachs such as Bodin and Hotman against Bodin's account of absolute sovereignty, the scepticism of Montaigne, Charron, and Sanchez, the ethical discussions of Du Vair, Gassendi, and Pascal, innovations in natural philosophy that were inspired by Mersenne and Descartes and implemented by members of the Académie royale des sciences, theories of the human mind from Jean de Silhon to Cureau de la Chambre and Descartes, and the novel arguments in support of women's education and equality that were launched by De Gournay, Du Bosc, Van Schurman, and Poulain de la Barre. The writers involved were lawyers, political leaders, theologians, and independent scholars, and they acknowledged almost unanimously the authority of the Bible as a source of knowledge that was claimed to be more reliable than the fragile powers of human understanding. Since they could not agree, however, on which books of the Bible were canonical or how that should be understood, their discussions raised questions about faith and reason that mirrored those involved in the infamous Galileo affair.

Academic Skepticism in Seventeenth-Century French Philosophy José R. Maia Neto, 2014-07-10

This book is the first systematic account of Pierre Charron's influence among the major French philosophers in the period 1601-1662. It shows that Charron's Wisdom was one of the main sources of inspiration of Pierre Gassendi's first published book, the *Exercitationes adversus aristoteleos*. It sheds new light on La Mothe Le Vayer, who is usually viewed as a major free thinker. By showing that he was a follower of Charron, La Mothe emerges neither as a skeptical apologist nor as a disguised libertine, as combatting superstition but not as irreligious. The book shows the close presence of Charron in the preambles of Descartes' philosophy and that the cogito is mainly based on the moral Academic self-assurance of Charron's wise man. This interpretation reverses the standard view of Descartes' relation to skepticism. Once this skepticism is recognized to be Charron's Academic one, it is seen not as the target but as the source of the cogito. Pascal is the last major philosopher for whom Charron's wisdom is crucially relevant. Montaigne and Descartes influenced respectively Pascal's view of the Pyrrhonian skeptic and of the skeptical main arguments. The book shows that Charron's Academic skeptical wise man is one of the main targets of his projected apology for Christianity, since he considered him as a threat and counter-example of the kind of Christian view of human beings he believed. By restoring the historical philosophical relevance of Charron in early modern philosophy and arguing for the relevance of Academic skepticism in the period, this book opens a

new research program to early modern scholars and will be valuable for those interested in the history of philosophy French literature and religion

Heidegger and French Philosophy Tom Rockmore, 2002-09-11 Martin Heidegger s impact on contemporary thought is important and controversial However in France the influence of this German philosopher is such that

contemporary French thought cannot be properly understood without reference to Heidegger and his extraordinary influence Tom Rockmore examines the reception of Heidegger's thought in France He argues that in the period after the Second World War due to the peculiar nature of the humanist French Philosophical tradition Heidegger became the master thinker of French philosophy Perhaps most importantly he contends that this reception first as philosophical anthropology and later as postmetaphysical humanism is systematically mistaken
