Fresh Air Fun Activity Free Time Series:

, The Greening of London, 1920-2000 Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities

Outdoor Learning Research Sue Waite, 2020-06-09 The term outdoor learning covers many forms of practice outside the classroom, including Forest School and outdoor play. Outdoor learning has been rapidly growing as a topic of interest for educators and parents over the last ten years, and research published in this field is also increasing. Despite the fact that we are inextricably part of the natural world, there is concern that contemporary children have become disconnected from nature and that their opportunities to access natural environments are declining. Given compelling evidence that time spent in natural places has multiple benefits for human health and wellbeing and pro-environmental behaviour, Bourn et al (2016) there is an impetus to find ways to increase children's exposure to and attachment to nature through their education. The chapters in this book were originally peer-reviewed articles published in Education 3-13 International Journal of Primary Elementary and Early Years Education. They are amongst the most popular in the journal, reflecting the demand for more evidence of outcomes and high-quality information about how best to implement outdoor learning for children in this age group. The authors report qualitative and quantitative studies and consider implications of the findings for children and their development and for the integration or not of natural environment contexts within school practices. Gathering this body of evidence together in a single volume enables important messages about outdoor learning's various purposes, processes, and outcomes to be more readily accessed by practitioners, policy makers, and researchers.
