Freud, Jung, and Spiritual Psychology Rudolf Steiner, 2001-05 12 Lectures Leipzig September 2 14 1908 CW 106 Rudolf Steiner emphasizes the astonishing and special relationship between our own time and that of ancient Egypt how in the natural rhythm of the ages the so called third post Atlantian Egyptian epoch is mirrored by the fifth present epoch In this sense today it is especially relevant to look at ancient Egypt with fresh eyes The evolution of Western civilization has been profoundly influenced by Egyptian myths through the Greek mysteries Because of other influences however this heritage has degenerated thinking has mummified and and myth has all but disappeared Consequently it is important to revive the seed of goodness passed down to us from ancient Egypt Through true imagination it is our task to renew human knowledge related to the creative forces in nature which the Egyptians attempted through the Osiris Isis myth and the Greeks through the myth of Demeter This is what Rudolf Steiner attempts in this lecture cycle Steiner s subjects include experiences of Egyptian initiations esoteric anatomy and physiology the stages of evolution of the human form and much more The final lecture is on the Christ impulse as the conqueror of matter This volume is a translation from German of *gyptische Mythen und Mysterien im Verh ltnis zu den wirkenden Geisteskr ften der Gegenwart* GA 106

Jung and Kierkegaard Amy Cook, 2017-08-24 Jung and Kierkegaard identifies authenticity suffering and self deception as the three key themes that connect the work of Carl Jung and S ren Kierkegaard There is in the thinking of these pioneering psychologists of the human condition a fundamental belief in the healing potential of a religious outlook This engaging and erudite text explores the significance of the similarities of thinking between Kierkegaard and Jung bridging the gap between the former s particular brand of existential Christian psychology and the latter s own unique philosophy Given the similarity of their work and experiences that were common to both of their personal biographies particularly the relationship that each

had with his father one might expect Jung to have found in Kierkegaard a kindred spirit Yet this was not the case and Jung viewed Kierkegaard with great scorn That there exists such a strong comparison and extensive overlap in the life and thought of these towering figures of psychology and philosophy leads us to question why it is that Jung so strongly rejected Kierkegaard Such hostility is particularly fascinating given the striking similarity that Jung's own analytical psychology bears to the Christian psychology upheld by Kierkegaard Cook's thought provoking book fills a very real gap in Jungian scholarship and is the first attempt to undertake a direct comparison between Jung and Kierkegaard's models of development It is therefore essential reading for academics and postgraduate students with an interest in Jungian and Kierkegaard scholarship as well as psychology philosophy and religion more generally

No Other Light Mary Wolff-Salin, 1986 Examines the points of agreement between Christian mysticism and the theories of Freud Jung and other psychologists

Entheogens and the Development of Culture John A. Rush, 2013-07-30 *Entheogens and the Development of Culture* makes the radical proposition that mind altering substances have played a major part not only in cultural development but also in human brain development Researchers suggest that we have purposely enhanced receptor sites in the brain especially those for dopamine and serotonin through the use of plants and fungi over a long period of time The trade off for lowered functioning and potential drug abuse has been more creative thinking or a leap in consciousness Experiments in entheogen use led to the development of primitive medicine in which certain mind altering plants and fungi were imbibed to still fatigue pain or depression while others were taken to promote hunger and libido Our ancestors selected for our neural hardware and our propensity for seeking altered forms of consciousness as a survival strategy may be intimately bound to our decision making processes going back to the dawn of time Fourteen essays by a wide range of contributors including founding president of the American Anthropological Association's Anthropology of Religion section Michael Winkelman PhD Carl A P Ruck PhD Boston University professor of classics and an authority on the ecstatic rituals of the god Dionysus and world renowned botanist Dr Gaston Guzman member of the Colombian National Academy of Sciences and expert on hallucinogenic mushrooms demonstrate that altering consciousness continues to be an important part of human experience today Anthropologists cultural historians and anyone interested in the effects of mind altering substances on the human mind and soul will find this book deeply informative and inspiring

The Reappearance of Christ in the Etheric Rudolf Steiner,2003 The first chapter of the Acts of the Apostles describes Christ s Ascension And a cloud received him out of their sight As the disciples looked up two angels appeared and told them This same Jesus taken up from you into heaven shall come again in the same way as you have seen him go In 1910 Rudolf Steiner began a series of lectures announcing the advent of Christ s appearance in the sphere of the earth s etheric or life body At first he said only a few will be aware of it but in time more and more people regardless of religious affiliation will be strengthened comforted and infused by the Christ s living presence Such Damascus experiences bespeaking a new natural clairvoyance Steiner argues will become increasingly common The Christ will become a living comforter he writes However strange it may seem it is nevertheless true that often when people even in considerable numbers are sitting together not knowing what to do and waiting they will see the etheric Christ He will be there will confer with them and will cast his word in such gatherings We are now approaching these times This collection contains Steiner s lectures on this theme as well as on important related questions such spiritual science and etheric vision the etheric vision of the future the etherization of the blood the Sermon on

the Mount and the land of Shambhala the mysteries of comets and the Moon Buddhism and Pauline Christianity spirit beings and the ground of the world and the three realms between death and rebirth The Reappearance of Christ in the Etheric collects much of Rudolf Steiner's most important discussions of esoteric Christianity especially as it relates to the central place of the Christ being in world and human evolution Acts of the Heart Robert Sardello, 2011-10 Reading through this volume is to be taken on a journey It is to walk with Robert Sardello on his journey as he pushes forward toward new realities In a sense each step is not so easy The thinking often appears dense the ideas often new and therefore disconcerting But each individual piece as the whole is bathed in an aura in a way we may say it is bathed in soul in love in generosity and friendship Attending to these we find the ideas and the new possibilities begin to make sense We are moved to change our lives Christopher Bamford from his introduction In these introductions Robert Sardello introduces us to many people we may not otherwise have met and introduces us to many ways of being and thinking which we didn't know before The range of those we meet in these pages is staggering At the same time there is a sweet harmony and ever unfolding deepening of a single theme Miraculously it pervades and shapes the entire sequence of those whom he presents even though he often wrote in response to a request and not initially on his own initiative Robert writes of matters with which he has made a deep friendship and out of that friendship he has received and participated in a communion of ideas He is able to do this because he has entered the aspiration of those he is introducing at the deepest level making their insights his own and deepening them in his own way An introduction conveys a particular soul capacity For Robert Sardello soul capacities are of the essence of what he calls Spiritual Psychology Together with the worlds and beings to which they correspond it is such capacities that make us human and enable us to fulfill our human tasks Reading these introductions is an astonishing experience Within their short individual compasses they allow us to participate in Robert's own journey to catch as it were the bird in flight and fly with it That is they map his journey at least that portion of it that began to unfold as his destiny began to crystallize Robert Sardello's insights navigate many hazardous abstractions from the so called New Age through the perennial philosophies With Sophia as his muse the current from the future calls him carrying its many imaginations as energy the always immediate now and the truly new Across these authors writings his visionary perspective deepens in dialogue with the different works as authored beings For writings possess their own spirit or how otherwise do they engender a unique spirit when reborn within our own imagination Scott R Scribner from his introduction Psychoanalytic Investigations in Philosophy Dorit Lemberger, 2023-02-24 This pioneering volume explores and exemplifies the relevance of psychoanalysis to contemporary philosophical problems The novelty of the book's viewpoint is the consideration of psychoanalysis as an existentialist mode of thinking that deals with current existential problems such as loneliness uncertainty struggling with personal tragedies and rehabilitation Each chapter presents classic aspects of psychoanalytic theory based on Greek tragedies as well as their similarities with interdisciplinary aspects in other areas of study like modern literature

hermeneutics and philosophy of language To deepen each subject each chapter also applies an interdisciplinary methodology that illuminates previously hidden insights arising from the fusion of psychoanalysis and philosophy Featuring contributions from well known scholars like Professor Avi Sagi and Professor Dov Schwartz as well as more up and coming writers the book suggests possible implications of philosophical hermeneutical and literary theories to the perception of post modern issues concerning agency and the subjective emotional world Psychoanalytic Investigations in Philosophy is of great interest to scholars of psychoanalysis and hermeneutic philosophy as well as teachers and academics who want to explore new teaching methods in various disciplines and general interest readers who wish to expand their horizons around concepts that can be applied to better understand themselves and the age in which we live

Secret Brotherhoods and the Mystery of the Human Double Rudolf Steiner, 2004 7 lectures of 9 St Gallen Zurich and Dornach November 15 25 1917 CW 178 In the age of the internet and the proliferation of conspiracy theories ideas that secret groups are trying to gain control of humanity are no longer rare But this was not true in 1917 when Rudolf Steiner spoke of such matters in the extraordinary lectures contained in this book His unique contribution to this controversial topic is not based on abstract theories it arose from exact research methods that use advanced forms of perception and cognition Using the firsthand knowledge available to him Steiner takes us behind the scenes of events in outer history and contemporary culture to reveal a dark world of secret elitist brotherhoods that are attempting to control the masses through the forces of economics technology and political assassinations These hidden groups he explains seek power through the use of ritual magic and suggestion Among his many topics Steiner speaks about the geographic nature of the American continent and the forces that arise from it the nature of the double or doppelganger and the dangers of psychoanalysis the spiritual origin of electromagnetism the abuse of inoculations and vaccinations the meaning of Ireland for world development confused ideas about angels in relation to higher beings and divinity and above all the need for clear insight into world events based on spiritual knowledge Never before available in English as a complete volume the text of this book has been freshly translated for this edition READ BOBBY MATHERNE S REVIEW OF THIS BOOK Secret Brotherhoods is a translation of 7 lectures from German of Individuelle Geistwesen und ihr Wirken in der Seele des Menschen Geistige Wesen und Ihre Wirkung Band II GA 178

The Soul's Long Journey Edward Reaugh Smith, 2003-11 Here are amazing insights showing reincarnation to be deeply and powerfully revealed in the Bible s most fundamental aspects How and why have these insights escaped attention for so long At last they are uncovered here by a confluence of conventional Bible study and the epochal spiritual discoveries of Rudolf Steiner With particular emphasis on the organic provisions of the Old Testament Smith shows both what the assumptions of the Master s hearers were and how the New Testament confirms the ancient heritage Arising from the fullness of the canon is an exciting story of the long journey of humanity and every human soul each a beloved sheep whom the Creator is unwilling to lose Combining a lifetime of biblical study and teaching fifteen years investigating and contemplating Rudolf Steiner s vast works

and almost three decades of applying the analytical skill required in an intense law practice Smith has produced a potential classic the serious Bible student can ill afford to ignore

The Psychologisation of Eastern Spiritual Traditions Elliot Cohen, 2021-09-30 This essential book critically examines the various ways in which Eastern spiritual traditions have been typically stripped of their spiritual roots content and context to be more readily assimilated into secular Western frames of Psychology Beginning with the colonial histories of Empire the author draws from the 1960s Counterculture and the subsequent romanticising and idealising of the East Cohen explores how Hindu Buddhist and Daoist traditions have been gradually transformed into forms of Psychology Psychotherapy and Self Help undergoing processes of modernisation and secularisation until their respective cosmologies had been successfully reinterpreted and reimagined An important component of this psychologisation is the accompanying commodification of Eastern spiritual practices including the mass marketing of mindfulness and meditation as part of the burgeoning well being industry Also presenting emerging voices of resistance from within Eastern spiritual traditions the book ends with a chapter on Transpersonal Psychology showing a path for how to gradually move away from colonisation and towards collaboration Engaging with the mindfulness movement and other practices assimilated by Western culture this is fascinating reading for students and academics in psychology philosophy and religious studies as well as mindfulness practitioners
