The Language of Psychotherapy Rudolf Ekstein, 1989-01-01 Ekstein's book brings together papers on a number of themes which have occupied his thinking during the last 40 years In the Wiener Kreis the Vienna circle of philosophers he studied together with his professor Moritz Schlick the philosophy of science the analysis of language and the clarification of meaning Throughout his life he has always been inspired by the work of Ludwig Wittgenstein In the Vienna Psychoanalytic Institute his interest in psychotherapy and psychoanalysis was reinforced and he established for himself a bridge between the kind of thinking that looks for philosophical clarification and that which searches for psychological meaning The psychotherapeutic and psychoanalytic methods of psychological clarification depend on the language tools of the thinking process But these language tools referring now to different theories of psychoanalysis and psychotherapy in the various schools have their usefulness as well as their limitations Ekstein's chronological assessment allows us to arrive at a philosophical and psychological clarification of present psychotherapeutic and psychoanalytic schools

Transitions in Continental Philosophy Arleen B. Dallery, Stephen H. Watson, E. Marya Bower, 1994-01-01 This book challenges and renews the discussions that have historically characterized the tradition of continental thought in the areas of ethics feminism aesthetics and political theory The classical origins of this tradition

phenomenology existentialism and hermeneutics emerged according to models that were foundational and systematic in character The book shows that continental philosophy is now woven between counter discourses and concrete interventions complicated in the relationship between theory and practice that is in the transition between concept and determination idea and intuition the ontic and the ontological experience and judgment *Freud* Philip Rieff, 1979-05-15 Now a classic this book was hailed upon its original publication in 1959 as An event to be acclaimed a book of genuine brilliance on Freud s cultural importance a permanently valuable contribution to the human sciences Alastair MacIntyre Manchester Guardian This remarkably subtle and substantial book with its nicely ordered sequences of skilled dissections and refined appraisals is one of those rare products of profound analytic thought The author weighs each major article of the psychoanalytic canon in the scales of his sensitive understanding then gives a superbly balanced judgement Henry A Murray American Sociological Review Rieff s tremendous scholarship and rich reflections fill his pages with memorable treasures Robert W White Scientific American Philip Rieff s book is a brilliant and beautifully reasoned example of what Freud s influence has really been an increasing intellectual vigilance about human nature What the analyst does for the patient present the terms for his new choices as a human being Mr Rieff does in respect to the cultural significance of Freudianism His style has the same closeness the same undertone of hypertense alertness Again and again he makes brilliant points Alfred Kazin The Reporter

Reconstructing Agency in Developmental and Educational Psychology Paul Downes, 2019-09-05 This book reconstructs the foundations of developmental and educational psychology and fills an important gap in the field by arguing for a specific spatial turn so that human growth experience and development focus not only on time but space This regards space not simply as place Highlighting concrete cross cultural relational spaces of concentric and diametric spatial systems the book argues that transition between these systems offers a new paradigm for understanding agency and inclusion in developmental and educational psychology and for relating experiential dimensions to causal explanations The chapters examine key themes for developing concentric spatial systemic responses in education including school climate bullying violence early school leaving prevention and students voices Moreover the book proposes an innovative framework of agency as movement between concentric and diametric spatial relations for a reconstruction of resilience This model addresses the vital neglected issue of resistance to sheer cultural conditioning and goes beyond the foundational ideas of Bronfenbrenner s ecological systems theory as well as Vygotsky Skinner Freud Massey Bruner Gestalt and postmodern psychology to reinterpret them in dynamic spatial systemic terms Written by an internationally renowned expert this book is a valuable resource for academics researchers and postgraduate students in the areas of educational and developmental psychology as well as related areas such as personality theory health psychology social work teacher education and anthropology
