Kumdong Bindul Nostra, 2014-01-21 The book is about good leadership for leaders to lead by actions and not by words of lies from their mouths Leaders should be doggedly determined to give the people fair leadership Nakinostran was struck and devastated by the mercilessly cruellest earthquake disaster In the aftermath of the earthquake there were spontaneous nuclear plant meltdowns across the country The survivors watched helplessly all the nuclear plants melting down like candle waxes Nakinostran was a well developed nation with greatest leaders seen by the people as only second to God because of their excellent leadership of oneness love peace and development and equality not this fake equality we only let out of our mouths The people like any other seeing the level of devastations had different personal views doubts and fears They saw these devastations as their greatest obstacle to returning to a normal life again Most of them had lost all hopes in life because of the malignant complications of the wickedest earthquake Many people said that it Nakinostran is finished But the doggedly determined young president Henry Rupchang was only angered and bitterly touched at heart by the deaths He had the courage and determination that the country will rise again He was undaunted He mustered what supports he could for the reconstructions of the country He continuously told his people that nothing is impossible under this cone shape heaven that umbrellaed our earth His commitment was undiminished and despite the devastations he unflinchingly told them the nation will rise again All the leaders in the country bust the gut to reconstruct the country and with unity they worked as a people though not without some distractions from some protesters The leaders didn't lose a second in their sleep did the president succeed as in the end it was a heartwarming people Technological Choices Pierre Lemonnier, 2013-10-15

Technological Choices applies the critical tools of archaeology to the subject of technology and its impact on humankind throughout the ages An examination of the challenges technological innovations present to various cultures Technological

Choices asserts that in any society such choices are made on the basis of cultural values and social relations rather than on the inherent benefits in technology itself. Of course this revolutionary viewpoint has critical implications for contemporary Western societies. Based on case studies covering a wide range of chronologies and geographies, *Technological Choices* moves rapidly from Neolithic Europe to the modern industrial age, stopping on the way to examine the tribes of Papua New Guinea, rural Indian and North African societies as well as several European peasant communities. The techniques studied range from the manufacture of stone implements to the development of high tech transportation devices. With its breadth of subject matter and multidisciplinary approach, *Technological Choices* offers new insight into the interrelationship between technology and society. Also unprecedented is the book's emphasis on the functional aspects of material culture. **Papers**

Liability and Economic Damages, Second Edition Scott D. Gilbert, 2020-06-25 This book covers the subject of economic damages and its role in insurance claims, lawsuits and injunctions against businesses. Businesses exist to provide goods and services to customers and in doing so they take risks. Among these risks is the chance of losing money in lawsuits filed by customers, employees and others negatively impacted by the business. Insurance provides some protection against these liabilities but lawsuits still take their toll. This book covers the subject of economic damages and its role in insurance claims, lawsuits and injunctions against businesses. This book will help the reader to identify economic damages as a component of business liability, describe the business risk posed by economic damages, explain some key determinants of economic damages and estimate economic damages and business loss in a variety of cases.
