The Unabridged Rivers of my Mind Les Poetaster,2013-07-10 A collection of poems and monologues written between 1991 and 2013 by East Yorkshire poet and short story writer Les Poetaster **Discourse and Ideology in Medieval**

Japanese Buddhism Richard K. Payne,Taigen Dan Leighton,2006-04-18 The medieval period of Japanese religious history is commonly known as one in which there was a radical transformation of the religious culture This book suggests an alternate approach to understanding the dynamics of that transformation One main topic of analysis focuses on what Buddhism its practices and doctrines its traditions and institutions meant for medieval Japanese peoples themselves This is achieved by using the notions of discourse and ideology and juxtaposing various topics on shared linguistic practices and discursive worlds of medieval Japanese Buddhism Collating contributions from outstanding scholars in the field of Buddhist Studies the editors have created an important work that builds on preliminary work on rethinking the importance and meaning of Kamakura Buddhism published recently in English and adds greatly to the debate The Hunger Habit Judson Brewer, MD, PhD,2024-01-30 A program proven to heal our relationship with food and our bodies from New York Times bestselling author of Unwinding Anxiety Sometimes it feels as if there are as many ways to struggle with food as there are foods to eat Craving habit emotions boredom stress anxiety or just the simple fact that a box of donuts seems to be omnipresent in the break room free food can lead to feeling out of control around food While anxiety feels like something that happens to us the pull of food seems like something we should be able to handle After all we have to eat But it s not that simple The result of this constant struggle and then giving in or giving up is a toxic cocktail of shame and self judgment that makes it feel like it is impossible to change our behavior The Hunger Habit is based on Judson Brewer s deeply researched plan proven to help us understand what is going on in our brains so that we can heal the guilt and frustration we experience around eating This is not a diet book pretending not to be a diet book The step by step program focuses on training our brains to tap into awareness to change our relationship with food and eating shifting it from fighting with ourselves to befriending our minds and bodies There is no willpower calorie counting or restricted eating Setbacks are a good thing The key is to learn how to work with our brains rather than resisting our impulses and to adopt an attitude of self kindness rather than self judgment Grounded in cutting edge neuroscience and Brewer s several decades of clinical practice as a psychiatrist The Hunger Habit is both accessible and compassionate It will finally help you break out of food jail and reclaim your life Cake Boss Buddy Valastro,2020-07-28 In this heartfelt memoir master baker and star of the 1 hit TLC show Buddy Valastro tells his inspiring

Somatoform and Other Psychosomatic Disorders Christos Charis, Georgia Panayiotou, 2018-07-23

This intriguing volume presents the most contemporary views on the conceptualization and treatment of somatoform disorders and related conditions from experts in psychodynamic and cognitive behavioral approaches. It does so with respect to both perspectives without advocating for either approach. By presenting expert views from diverse perspectives, the book raises what is a central point in most of the chapters: that emotion, its processing and regulation, is a cornerstone of these disorders. The volume also highlights the role of pathogenic coping or defense mechanisms like dysfunctional avoidance from a CBT perspective and conversion from the psychodynamic perspective in the maintenance of psychosomatic symptoms. The volume's contents include detailed literature reviews on the most common and most treatment-resistant mind-body conditions including chronic pain, responses to trauma, alexithymia, and the spectrum of health anxiety disorders. Noted experts distinguish between types of medically unexplained symptoms, discuss their complex processes, and provide models for intervention where cognitive behavioral or psychodynamic approaches may be appropriate or effective. And a fascinating case study of a patient presenting multiple trauma-related disorders explores therapist resourcefulness over a course of shifting symptoms and frustrating setbacks. Among the topics covered: Maintaining mechanisms of health anxiety; current state of knowledge; Negative affect and medically unexplained symptoms; Alexithymia as a core trait in psychosomatic and other psychological disorders; Trauma and its consequences for body and mind; Embodied memories: a new pathway to the unconscious; Psychotherapy among HIV patients; a look at a psychoimmunological research study after 20 years; Health anxiety: a cognitive behavioral framework. The wealth of options discussed in *Somatoform and Psychosomatic Disorders* offers health
