The Structure and Regulation of Financial Markets Peter D. Spencer,2000-10-12 Aimed at advanced undergraduate and graduate students in economics banking and finance this is a core textbook for the financial markets institutions and regulation option of courses in financial economics It integrates modern theories of asymmetric information into the analysis of financial institutions relating the theory to current developments The text begins with an analysis of adverse selection in retail financial products like life assurance before looking at open capital markets where trades and prices provide information It then progresses to the more complex areas of corporate governance and financial intermediation in which information is concealed or confidential and moral hazard and verification problems become important These chapters study the various mechanisms that the financial markets have developed to allow investors to delegate the management of their assets to others This analysis is used to show how regulation can reduce the risk of financial failure and how legal accounting and regulatory mechanisms can help shape a country s corporate and financial architecture These difficult theoretical concepts

are conveyed through the careful use of numerical illustrations and topical case studies Each chapter ends with a set of exercises to test and reinforce students comprehension of the material Worked solutions are provided for the numerical exercises *The Oxford Handbook of Corporate Governance* Mike Wright,Donald S. Siegel,Kevin Keasey,Igor Filatotchev,2013-03-28 Corporate governance remains a central area of concern to business and society and this Handbook constitutes the definitive source of academic research on this topic synthesizing international studies from economics strategy international business organizational behavior entrepreneurship business ethics accounting finance and law

Investment Banking Alan D. Morrison,William J. Wilhelm Jr.,2008-09-11 Investment Banking Institutions Politics and Law provides an economic rationale for the dominant role of investment banks in the capital markets and uses it to explain both the historical evolution of the investment banking industry and also recent changes to its organization Although investment decisions rely upon price relevant information it is impossible to establish property rights over it and hence is very hard to coordinate its exchange The authors argue that investment banks help to resolve this problem by managing information marketplaces within which extra legal institutions support the production and dissemination of information that is important to investors Reputations and relationships are more important in fulfilling this role than financial capital The authors substantiate their theory with reference to the industry s evolution during the last three centuries They show how investment banking networks were formed and identify the informal contracts that they supported This historical development points to tensions between the relational contracting of investment banks and the regulatory impulses of the State thus providing some explanation for the periodic large scale State intervention in the operation of capital markets Their theory also provides a technological explanation for the massive restructuring of the capital markets in recent decades which the authors argue can be used to think about the likely future direction of the investment banking industry Financing and Raising Capital Bloomsbury Publishing,2015-11-19 The success of your business can depend on having access to the necessary capital Financing and Raising Capital shows how all types of company can meet the challenge of obtaining funds for growth and special projects Comprehensively explaining the basics for both entrepreneurs and corporate finance professionals it provides authoritative analysis and strategies Let the experts guide you through the process of raising capital with contributions from over 30 leading practitioners and academics including Lawrence Brotzge consultant and angel investor David Wyss chief economist Standard Poor s Frank J Fabozzi professor Yale Seth Armitage professor Edinburgh and Augusto de la Torre chief economist Latin America and the Caribbean World Bank
