Juniper draws upon decades of work in rainforest conservation. He brings readers along on his journeys from the thriving forests of Costa Rica to Indonesia where palm oil plantations have supplanted much of the former rainforest. Despite many ominous trends, Juniper sees hope for rainforests and those who rely upon them thanks to developments like new international agreements, corporate deforestation policies, and movements from local and Indigenous communities. As climate change intensifies, we have already begun to see the effects of rainforest destruction on the planet at large. *Rainforest* provides a detailed and wide-ranging look at the health and future of these vital ecosystems. Throughout this evocative book, Juniper argues that in saving rainforests, we save ourselves too. *A Cloud Forest Food Chain* Rebecca Hogue

An original and thought-provoking analysis of modern initiatives in the tropical rain forest. While issues

such as logging, eco-timber, eco-tourism have been widely analyzed from an outsider's perspective, this book considers them from the local people's viewpoint in terms of a long history of the rain forest. The authors demonstrate that the relationship of indigenous people to the tropical forest is not essentially timeless nor is it primarily spiritual or mystical. It is in fact firmly connected to modern realities while still being rooted in historical beliefs and practices. Standing at the intersection of anthropology, historical geography, and rainforest ecology, and also at the interface of the local and the global, this ethnographically grounded study dispels a number of commonly held assumptions. It reveals how processes of impact are actually two-way interactions as local communities in Melanesia incorporate industries like logging into rapidly evolving post

colonial society and economy      The Rainforests of West Africa MARTIN,2013-11-11 Nowhere else in the world did industrialized countries leave such early marks in the rainforest as in West Africa Past and present developments here are in one way or the other significant for rainforests on other continents as well West Africa is a pioneer in both a good and a bad sense This is reason enough to take a closer look at the history of moist tropical West Africa Until recently no one really seemed to be interested in the rainforests except for a few specialists The world's scientific community neglected to study the incalculable riches of tropical forests to make the public aware of them and their due importance Although interdisciplinary research has been a popular topic for some decades now it was not applied to just the most complex habitat on earth Scientists from all fields studied only that which was easiest to record seemingly blind to a myriad of details awaiting closer examination Botanists went about establishing their herbariums and paid much too little attention to the vegetation as a whole or to the significance of useful plants for local populations Zoologists too busied themselves with collecting and describing species Anthropologists on the other hand tended to overlook faunal details in their ignorance of the animal world they wrote of tigers and deer in Africa And finally foresters saw neither the forest nor the trees for the timber and even confused rainforests with monocultures of fir trees      **Let's Go Australia 9th Edition** Let's Go Inc.,2006-11-28 For over 40 000 years people have been arriving awestruck on Australia at the edge of the earth Researched and compiled entirely by students who know how to see the world on the cheap this guide contains insider tips and information for the socially conscious traveller      Changes and Disturbance in Tropical Rainforest in South-East Asia D. M. Newbery,T. H. Clutton-Brock,Ghilleen T. Prance,Royal Society (Great Britain),2000 Views on the dynamics of tropical forests are changing rapidly with the recognition that their environment is variable on the decadal to century scale Fluctuating climatic conditions partly determine tropical forest structure species composition and dynamics Tropical communities are also highly contingent in space and time with respect to site and historical factors Tropical forests have experienced to some degree this disturbance regime in the past but climatologists are now predicting increasingly frequent extreme events in the new century The combination of increasing deforestation and land use conversion by man plus an increasingly variable environment means a situation that could be very difficult to manage      The Tourist Places of the World Philippe Violier,Benjamin Taunay,2020-02-19 Formerly a largely Western practice leisure travel is today the most dynamic industry in the world in terms of growth Developments in transport and communication systems mean tourism is now an integral part of our understanding of the world and involved in the exponential increase of links between societies and different cultures The Tourist Places of the World has comprehensive data on the number of international visitors annually It also includes an original map not dictated by country but by major tourist areas and places The hierarchy of destinations drawn is highlighted by the different levels of popularity and passenger flows from the universal places where all societies meet to the still unfrequented places Beyond the recognition of global tourism the challenge is to understand how and why societies can

achieve a better life through sustainable development which encompasses social economic and environmental dimensions

**Re-thinking Travel Writing** Ben Stubbs, Lee Mylne,2024-03-30 This book stems from the question that we as co authors grappled with for the past 3 plus years while in our own periods of stasis during the pandemic What place does the travel writing genre hold in a post COVID world With the massive interruptions to travel and travel writing across 2020 2023 as the pandemic forced us indoors and into isolation it also raised many other pertinent questions about the practice of and future of travel writing Part of the prompt for this book comes from the post pandemic assumption that in an ecologically fraught less mobile and more uncertain world there may not be a place for travel writing as we know it to exist in any meaningful way We examine the problems and solutions apparent for travel writing as it engages with a period of re thinking prompted by the pandemic though necessary for a plethora of other reasons as well As academics and travel writing practitioners with decades of experience in the field we offer a unique perspective on this topic as we have the in the field experience of professional travel writers and we have the academic grounding to better understand the history theoretical concerns and contradictions of the genre to provide a more in depth perspective to our travel writing colleagues This grounding allows us to access a unique and valuable perspective for Re thinking Travel Writing The Journey of a Genre for academics aspiring travel writers and contemporary colleagues in the field
