Leaping waterfalls struggling through rocky shallows only the strongest salmon survive to spawn a new generation These remarkable fish seem to be pure nature unfathomable all instinct But are they For more than a century biologists have tried to unlock the mystery of salmon we know For sociologist Rik Scarce salmon represent an opportunity to probe the relationship of science society and nature About Pacific salmon a game fish and food source that is protected and managed for economic and environmental abundance Scarce writes What other living thing receives such extensive attention from science and society is used in so many ways yet retains so much of what we would like to think is its wild character He shows how political bureaucratic and economic forces have directed salmon science for their own purposes and how control remains a central feature in salmon biology Identifying a countertrend rooted in environmental activism Scarce also argues that an ecocentric perspective is gaining ground even as pressures mount simultaneously to save endangered salmon populations and to bring every last salmon to market Thus while external forces control much of the biologists work a movement is underway to free biology from political and economic pressures In rich ethnographic detail Scarce develops this portrait of a science struggling with nature and itself The old line fisheries biologists tell how they work under immense pressure to unravel the unknowns of salmon existence to fulfill objectives of politically motivated funding agencies In contrast the new breed of conservation biology researchers struggles to maintain the genetic diversity of salmon populations while minimizing the ways humans determine the fate of the salmon **Fishy Business** provides new ways for regarding about human interactions with other species from appealing ones like wolves whales and redwood trees to less popular ones like snail darters and kangaroo rats Society struggles to decide what parts of nature matter and why Ultimately Scarce argues nature is a social product what shall we make of it **An Odyssey with Animals** Adrian R Morrison,2009-10-08

**An Odyssey with Animals** is the culmination of a veterinarian and scientist's years spent negotiating the divide between animal welfare and biomedical research Drawing on the disciplines of philosophy history ethics biology and animal behavior Morrison crafts a multi faceted argument in favor of using animals in research The result is a thought provoking intelligent and fair minded discussion of an incredibly charged subject of the past and present of animals relationships with humans and how and why

we should be able to use them as we do      **Restoration and History** Marcus Hall, 2010-02 Papers from a meeting of an interdisciplinary group of ecologists geographers anthropologists sociologists historians and philosophers held July 2006 in Zurich Switzerland      *How Canadians Communicate VI* Charlene Elliott, 2016-03-31 Food nourishes the body but our relationship with food extends far beyond our need for survival Food choices not only express our personal tastes but also communicate a range of beliefs values affiliations and aspirations sometimes to the exclusion of others In the media sphere the enormous amount of food related advice provided by government agencies advocacy groups diet books and so on compete with efforts on the part of the food industry to sell their product and to respond to a consumer driven desire for convenience As a result the topic of food has grown fraught engendering sometimes acrimonious debates about what we should eat and why By examining topics such as the values embedded in food marketing the locavore movement food tourism dinner parties food bank donations the moral panic surrounding obesity food crises and fears about food safety the contributors to this volume paint a rich and sometimes unsettling portrait of how food is represented regulated and consumed in Canada With chapters from leading scholars such as Ken Albala Harvey Levenstein Stephen Kline and Valerie Tarasuk the volume also includes contributions from food insiders bestselling cookbook author and food editor Elizabeth Baird and veteran restaurant reviewer John Gilchrist The result is a timely and thought provoking look at food as a system of communication through which Canadians articulate cultural identity personal values and social distinction Contributors include Ken Albala Elizabeth Baird Jacqueline Botterill Rebecca Carruthers Den Hoed Catherine Carstairs Nathalie Cooke Pierre Desrochers Josh Greenberg Stephen Kline Jordan Lebel Harvey Levenstein Wayne McCready Irina Mihalache Eric Pateman Rod Phillips Sheilagh Quaile Melanie Rock Paige Schell and Valerie Tarasuk      Human-Animal Studies Margo DeMello, 2012-04 An exhaustive listing of books journals articles films conferences college programs organizations and websites from the new and exciting discipline of Human Animal studies The information was gathered by leading academics in the humanities the social sciences and the natural sciences this is the only reference of its kind This project was completed in conjunction with the book *Teaching the Animal*      **A Companion to American Cultural History** Karen Halttunen, 2014-01-28 A Companion to American Cultural History offers a historiographic overview of the scholarship with special attention to the major studies and debates that have shaped the field and an assessment of where it is currently headed 30 essays explore the history of American culture at all analytic levels Written by scholarly experts well versed in the questions and controversies that have activated interest in this burgeoning field Part of the authoritative Blackwell Companions to American History series Provides both a chronological and thematic approach topics range from British America in the Eighteenth Century to the modern day globalization of American Culture thematic approaches include gender and sexuality and popular culture      *On God and Dogs* Stephen H. Webb, 1998 Many of us keep pet animals we rely on them for companionship and unconditional love For some people their closest relationships may be with their pets In the wake of

the animal rights movement some ethicists have started to re examine this relationship and to question the rights of humans to own other sentient beings in this way In this engaging and thought provoking book Stephen Webb brings a Christian perspective to bear on the subject of our responsibility to animals looked at through the lens of our relations with pets especially dogs Webb argues that the emotional bond with companion animals should play a central role in the way we think about animals in general and against the more extreme animal liberationists defends the intermingling of the human and animal worlds He tries to imagine what it would be like to treat animals as a gift from God and indeed argues that not only are animals a gift for us but they give to us we need to attend to their giving and return their gifts appropriately Throughout the book he insists that what Christians call grace is present in our relations with animals just as it is with other humans Grace is the inclusive and expansive power of God s love to create and sustain relationships of real mutuality and reciprocity and Webb unfolds the implications of the recognition that animals too participate in God s abundant grace Webb s thesis affirms and persuasively defends many of the things that pet lovers feel instinctively that their relationships with their companion animals are meaningful and important and that their pets have value and worth in themselves in the eyes of God His book will appeal to a broad audience of thoughtful Christians and animal lovers

**Mad about Wildlife** Ann

Herda-Rapp, Theresa Goedeke, 2005-05-01 This edited volume documents the presence and types of Nature discourse that emerge during conflicts between people over wildlife This collection of qualitative case studies demonstrates how social groups create opposing symbolic meanings of Nature and highlights the way in which the successful imposition of those meanings affects wildlife people generally and management professionals Together the chapters illustrate the significant untapped utility of constructionist approaches for understanding social conflict over wildlife issues and for managing natural resources in a way that acknowledges and incorporates different definitions of nature

**The Age of Deer** Erika

Howsare, 2025-01-07 A masterful hybrid of nature writing and cultural studies that investigates our connection with deer from mythology to biology from forests to cities from coexistence to control and extermination and invites readers to contemplate the paradoxes of how humans interact with and shape the natural world Deer have been an important part of the world that humans occupy for millennia They re one of the only large animals that can thrive in our presence In the 21st century our relationship is full of contradictions We hunt and protect them we cull them from suburbs while making them an icon of wilderness we see them both as victims and as pests But there is no doubt that we have a connection to deer in mythology and story in ecosystems biological and digital in cities and in forests Delving into the historical roots of these tangled attitudes and how they play out in the present Erika Howsare observes scientists capture and collar fawns hunters show off their trophies a museum interpreter teaching American history while tanning a deer hide an animal control officer collecting the carcasses of deer killed by sharpshooters and a woman bottle raising orphaned fawns in her backyard As she reports these stories Howsare s eye is always on the bigger picture Why do we look at deer in the ways we do and what do

these animals reveal about human involvement in the natural world For readers of H is for Hawk and Fox I The Age of Deer offers a unique and intimate perspective on a very human relationship **Animals and Ethics** Angus Taylor,2003-05-12 A previous edition of this book appeared under the title Magpies Monkeys and Morals The new edition has been updated throughout Substantial new material has been added to the text including discussions of virtue ethics and Rawlsian contractarianism The bibliography has been significantly enlarged and now includes more than five hundred entries BOOK JACKET **Green Issues and Debates** Howard S. Schiffman,2011-05-03 Green Issues and Debates explores the multitude of threats to sustainable life on earth and the myriad of controversies surrounding potential solutions The grayer shades of green are deeply examined including such heady questions as Is ethanol production from corn a recipe for famine Does offshore drilling pose more of a risk to the environment than the problem it solves Is clean coal a viable option or is it simply polluting the energy dilemma Are genetically modified foods helpful or harmful Well respected scholars present more than 150 articles presented in A to Z format focusing on issues brought to the forefront by the green movement with carefully balanced pro and con viewpoints A valuable tool for students of all facets of ecology the environment and sustainable development the volume fully engages the reader inspiring further debate within the classroom Vivid photographs searchable hyperlinks numerous cross references an extensive resource guide and a clear accessible writing style make the Green Society volumes ideal for the classroom as well as for research [Spectacles of Death in Ancient Rome](#) Donald G. Kyle,2012-11-12 The elaborate and inventive slaughter of humans and animals in the arena fed an insatiable desire for violent spectacle among the Roman people Donald G Kyle combines the words of ancient authors with current scholarly research and cross cultural perspectives as he explores the origins and historical development of the games who the victims were and why they were chosen how the Romans disposed of the thousands of resulting corpses the complex religious and ritual aspects of institutionalised violence the particularly savage treatment given to defiant Christians This lively and original work provides compelling sometimes controversial perspectives on the bloody entertainments of ancient Rome which continue to fascinate us to this day **Nation-States and the Global Environment** Erika Marie Bsumek,David Kinkela,Mark Atwood Lawrence,2013-05-02 Hardly a day passes without journalists policymakers academics or scientists calling attention to the worldwide scale of the environmental crisis confronting humankind While climate change has generated the greatest alarm in recent years other global problems desertification toxic pollution species extinctions drought and deforestation to name just a few loom close behind The scope of the most pressing environmental problems far exceeds the capacity of individual nation states much less smaller political entities To compound these problems economic globalization the growth of non governmental activist groups and the accelerating flow of information have fundamentally transformed the geopolitical landscape Despite the new urgency of these challenges however they are not without historical precedent As this book shows nation states have long sought agreements to manage migratory wildlife just as they have

negotiated conventions governing the exploitation of rivers and other bodies of water Similarly nation states have long attempted to control resources beyond their borders to impose their standards of proper environmental exploitation on others and to draw on expertise developed elsewhere to cope with environmental problems at home This collection examines this little understood history providing case studies and context to inform ongoing debates
