U.S. Geological Survey Professional Paper , 1950 **Gold metallogeny and exploration** R. P. Foster, 2012-12-06 Within the last decade the high and continuing demand for gold has prompted a global gold rush on a scale never before seen not even in the heady days of Ballarat California and the Yukon Gold is being sought on every continent and with very few exceptions in every country around the world Such interest and fierce competition has demanded considerable innovation and improvement in exploration techniques paralleled by a rapid expansion of the geological database and consequent genetic modelling for the many different types of gold deposits now recognized This proliferation of data has swamped the literature and left explorationist and academic alike unable to sift more than a small proportion of the accumulating information This new book represents an attempt to address this major problem by providing succinct syntheses of all major aspects of gold metallogeny and exploration ranging from the chemical distribution of gold in the Earth's crust and the hydrothermal chemistry of gold to Archaean and Phanerozoic lode deposits epithermal environments chemical sediments and placer deposits and culminates in chapters devoted to geochemical and geophysical exploration and the economics of gold deposits Each chapter is written by geoscientists who are acknowledged internationally in their respective fields thus guaranteeing a broad yet up to date coverage In addition each chapter is accompanied by reference lists which provide readers with access to the most pertinent and useful publications *Gold Rush Saints* Kenneth N. The Army Surveys of Gold Rush California Gary Clayton Anderson, Laura Lee Anderson, 2015-04-06 As the army's topographical engineer in California from 1849 to 1851 George Horatio Derby wrote detailed reports on the region its people its resources and its geography providing critical information for an understaffed military charged with bringing order to a vast new empire along the Pacific Slope Early maps and reports by pioneers trappers and newspapermen even by such

professionals as John C Fremont and William Emory were limited in scope and often unreliable In contrast those authored by Derby and the army's other trained topographical engineers were remarkably accurate extensive and richly descriptive Long buried in the files of the National Archives they have also remained largely unknown even to historians Collected and reproduced here for the first time these journals and maps offer a new and unique perspective on California in the mid nineteenth century Derby's reports and journals appear alongside those of Robert Stockton Williamson William H Warner Edward O C Ord Nathaniel Lyon Henry Walton Wessells and Erasmus Darwin Keyes These documents offer extraordinary firsthand views of the environment natural resources geography and early settlement as well as the effects of disease on Native and white populations The writers detailed often witty insights offer new understandings of life in California during an era of momentous change Historian Gary Clayton Anderson and anthropologist Laura Lee Anderson provide historical geographic and biographical context in the book's introduction and in headnotes and annotations for each journal With these editorial enhancements the documents reveal as much of the character of their authors and their time as of the land and peoples they so carefully describe
