**Beware the Evil Eye Volume 1** John H. Elliott,2015-11-11 In the Sermon on the Mount Jesus of Nazareth makes reference to one of the oldest beliefs in the ancient world the malignity of an Evil Eye The Holy Scriptures in their original languages contain no less than twenty four references to the Evil Eye although this is obscured by most modern Bible translations John H Elliott s *Beware the Evil Eye* describes this belief and associated practices its history its voluminous appearances in ancient cultures and the extensive research devoted to it over the centuries in order to unravel this enigma for readers who have never heard of the Evil Eye and its presence in the Bible Aboriginal Environmental Knowledge Catherine Laudine,2016-09-17 Whilst there are popular ideas about which champion Aboriginal environmental knowledge many of these are based more on romantic notions than on any detailed understanding of what might be the content of this knowledge This book is based on a grounded and broad assessment of less well known details of Aboriginal knowledge and provides both a great deal of detail and a new assessment of rituals and practices Aboriginal environmental knowledge is examined here as an integrated source of both religious and scientific knowledge An important finding is that Aboriginal environmental knowledge also includes knowledge about education for attitudes considered appropriate for survival Though evidence for this is readily available in the literature it has not been part of current depictions of Aboriginal environmental knowledge **Spooky Action at a Distance** George Musser,2015-11-03 Long listed for the 2016 PEN E O Wilson Literary Science Writing Award Delightfully readable *Spooky Action at a Distance* is a mind bending voyage to the frontiers of modern physics that will change the way we think about reality What is space It isn t a question that most of us normally ask Space is

the venue of physics it is where things exist where they move and take shape Yet over the past few decades physicists have discovered a phenomenon that operates outside the confines of space and time nonlocality the ability of two particles to act in harmony no matter how far apart they may be It appears to be almost magical Einstein grappled with this oddity and couldn't come to terms with it describing it as spooky action at a distance More recently the mystery has deepened as other forms of nonlocality have been uncovered This strange occurrence which has direct connections to black holes particle collisions and even the workings of gravity holds the potential to undermine our most basic understandings of physical reality If space isn't what we thought it was then what is it In *Spooky Action at a Distance* George Musser sets out to answer that question offering a provocative exploration of nonlocality and a celebration of the scientists who are trying to explain it Musser guides us on an epic journey into the lives of experimental physicists observing particles acting in tandem astronomers finding galaxies that look statistically identical and cosmologists hoping to unravel the paradoxes surrounding the big bang He traces the often contentious debates over nonlocality through major discoveries and disruptions of the twentieth century and shows how scientists faced with the same undisputed experimental evidence develop wildly different explanations for that evidence Their conclusions challenge our understanding of not only space and time but also the origins of the universe and they suggest a new grand unified theory of physics An important book that provides insight into key new developments in our understanding of the nature of space time and the universe It will repay careful study John Gribbin *The Wall Street Journal* An endlessly surprising foray into the current mother of physics many knotty mysteries the solving of which may unveil the weirdness of quantum particles black holes and the essential unity of nature Kirkus Reviews starred review

*Trafficking with Demons* Martha Rampton, 2022-01-15 *Trafficking with Demons* explores how magic was perceived practiced and prohibited in western Europe during the first millennium CE Through the overlapping frameworks of religion ritual and gender Martha Rampton connects early Christian reckonings with pagan magic to later doctrines and dogmas Challenging established views on the role of women in ritual magic during this period Rampton provides a new narrative of the ways in which magic was embedded within the foundational assumptions of western European society informing how people understood the cosmos divinity and their own Christian faith As Rampton shows throughout the first Christian millennium magic was thought to play a natural role within the functioning of the universe and existed within a rational cosmos hierarchically arranged according to a great chain of being Trafficking with the demons of the lower air was the essence of magic Interactions with those demons occurred both in highly formalistic ritual settings and on a routine and casual basis Rampton tracks the competition between pagan magic and Christian belief from the first century CE when it was fiercest through the early Middle Ages as atavistic forms of magic mutated and found sanctuary in the daily habits of the converted peoples and new paganisms entered Europe with their own forms of magic By the year 1000 she concludes many forms of magic had been tamed and were by the reckoning of the elite essentially ineffective as were the women who

practiced it and the rituals that attended it      **The Oxford Handbook of Early Christian Ritual** Risto Uro, Juliette Day, Rikard Roitto, Richard E. DeMaris, 2019 The Handbook provides an indispensable account of the ritual world of early Christianity from the beginning of the movement up to the end of the sixth century
