Edge of Collapse Kyla Stone, 2020-10-31 In the dead of winter a super EMP destroys the nation s power grid No electricity No cars or phones Worst of all No heat The country is plunged into instant chaos But for twenty six year old Hannah Sheridan it s the best day of her life For the last five years she s been held captive by a sadistic psychopath until the EMP releases the lock of her prison Hannah emerges from her underground cell into a hostile winter landscape with no way to call for help no vehicle that will drive armed with nothing but the clothes on her back and her own determination to survive Liam Coleman cynical loner and former soldier is headed nowhere fast He believed he was prepared for any disaster until the EMP took everything he d ever cared about in a matter of seconds When he runs across a desperate woman who will die without his help he s forced to make a choice Two hundred frozen perilous miles stand between them and their destination in rural Michigan But the lack of power desperate people and the treacherous elements aren t the only threats Hannah s captor isn t about to let her go He will hunt her to the ends of the earth and beyond destroying anything and anyone who gets in his way For she has something he wants she s nine months pregnant with his child Edge of Collapse is a gripping post apocalyptic EMP thriller perfect for fans of Ryan Schow Grace Hamilton Harley Tate Jack Hunt and Boyd Craven

Bad Education Lee Edelman, 2022-12-05 Long awaited after No Future and making queer theory controversial again Lee Edelman s Bad Education proposes a queerness without positive identity a queerness understood as a figural name for the void itself unnamable around which the social order takes shape Like Blackness woman incest and sex queerness as Edelman explains it designates the antagonism the structuring negativity preventing that order from achieving coherence But when certain types of persons get read as literalizing queerness the negation of their negativity can seem to resolve the social antagonism and totalize community By translating the nothing of queerness into the something of the queer the order of meaning defends against the senselessness that undoes it thus mirroring Edelman argues education s response to queerness its sublimation of irony into the meaningfulness of a world Putting queerness in relation to Lacan s ab sens and in dialogue with feminist and Afropessimist thought Edelman reads works by Shakespeare Jacobs Almod var Lemmons and

Haneke among others to show why queer theory's engagement with queerness necessarily results in a bad education that is destined to teach us nothing

Back to the Stone Age Ben Pitcher, 2022-12-15 Prehistoric human life is a common reference point in contemporary culture inspiring attempts to become happier healthier or better people Exploited by capitalism overwhelmed by technology and living in the shadow of environmental catastrophe we call on the prehistoric to escape the present and to model alternative ways of living our lives In *Back to the Stone Age* Ben Pitcher explores how ideas about race are tightly woven into the powerful origin stories we use to explain who we are where we came from and what we are like Using a broad range of examples from popular culture from everyday practices like lighting fires and walking in the woods to engagements with genetic technologies and Neanderthal DNA from megaliths and museum mannequins to television shows and best selling nonfiction Pitcher demonstrates how prehistory is alive in the twenty first century and argues that popular flights back in time provide revealing insights into present day anxieties obsessions and concerns *Back to the Stone Age* shows that the human past is not set in stone By opening up the prehistoric to critical contestation Pitcher places racial justice at the centre of questions about the existence and persistence of *Homo sapiens* in the contemporary world

High Wind Life Yves Earhart, 2025-01-25 *High Wind Life* unravels the invisible yet profound role of wind as a sculptor of life exploring how organisms across Earth's most extreme landscapes evolve to thrive in relentless gusts The book's central theme wind as both a creative and destructive evolutionary force comes alive through stories of species mastering survival From albatrosses harnessing gusts to glide effortlessly across oceans to Caribbean lizards whose flattened bodies defy hurricanes the text reveals ingenious physiological and behavioral adaptations Plants too star in this drama grasses flex like suspension bridges while fungi launch spores on precision wind highways These strategies aren't just biological marvels they're urgent lessons for a climate altered world where understanding resilience could safeguard ecosystems Blending biomechanics and ecology *High Wind Life* progresses from individual adaptations to sweeping ecological networks Early chapters decode how wind shapes pollination and seed dispersal later sections link these insights to human challenges like designing wind resistant crops or architecture inspired by termite mounds The book stands out by spotlighting overlooked organisms lichens spiders microbes to challenge animal centric views of adaptation Its narrative style transforms complex concepts into relatable tales using analogies like comparing root systems to underground parachutes By framing wind as a dynamic dialogue between life and environment the book bridges science and storytelling offering a fresh lens on biodiversity's fragility and ingenuity For biologists engineers or curious readers it's a compelling call to see the air not as empty space but as a force that writes the rules of existence
