Gatekeepers of Knowledge Stephen McGinty, 1999-09-30 Publication is the coin of the realm in the academy Careers depend upon a strong publication record and journal editors occupy powerful positions in the publishing process This study examines the careers of thirty-five scholarly journal editors through in-depth interviews that cover their rise to positions of influence their views of the work of journal publishing their assessment of the electronic revolution and the role played by personal networks in the conduct of their duties Along the way some controversial issues arise including journal proliferation the padding of curriculum vitae and the state of craftsmanship in the academy today The interviews are analyzed against the backdrop of paradigms pioneered by two social scientists Kurt Lewin and Lewis Coser Their models of gatekeeping and social connections inform the analysis throughout the text This book provides a revealing look at a crucial part of academic life

Words and Distinctions for the Common Good Gabriel Abend, 2023-07-25 In this book Gabriel Abend argues that social scientists need to focus more on the words and distinctions that their empirical claims depend on He suggests two central questions researchers need to consider First how should word w be used in the social science community Which is to say how should word w be defined should it be used at all and if so on what grounds Second should distinction d be accepted in the social science community For example when a social scientist proposes a distinction between childhood adolescence adulthood and old age should they be accepted and on what grounds Which distinctions and classifications are good for the social science community Throughout the chapters Abend carefully investigates these core issues and related questions arguing along the way that there is not a definitive answer Instead the book invites the social science community to work together to collectively address these consequential concerns

Iphofen,2017-03-03 This volume addresses concerns about the impact of current systems for the management of research ethics in the social sciences Many procedures in place are seen as inappropriate as they were originally designed for use in biomedical research The content identifies areas of common ground core ethics principles and areas of particular concern

How to Do Media and Cultural Studies Jane C. Stokes,2003-02-24 Providing a student guide to the process of research and writing for media and cultural studies the author covers both quantitative and qualitative methods and includes a list of useful library resources and essential Web sites Japan in the Bluegrass Pradyumna P. Karan,2014-10-17 Fifteen years after Toyota announced it would build a manufacturing plant in the heart of the Bluegrass Kentucky crafts are being used to help sell Camrys at car dealerships in Japan and sushi and Japanese condiments are widely stocked on grocery shelves in a number of cities across Kentucky In early 2000 the state boasted more than 100 Japanese companies representing a total investment of more than seven billion dollars employing more than 33 000 Kentuckians Japan in the Bluegrass is the first book to focus on the regional and local impact of the globalization of Japanese businesses particularly Toyota in the United States Fourteen American and Japanese contributors include geographers political scientists sociologists and an economist urban planner and environmental scientist and their essays go beyond the traditional exploration of politics and economics to examine the social cultural and environmental effects of Japanese investment in Kentucky The authors examine the factors that brought these companies to this part of the United States which range from a well developed system of highways to cooperation from state and local governments to hefty incentive packages They discuss the significant influence of Toyota and its suppliers on local communities in Kentucky as well as in Toyota City Japan Essays also cover the social and cultural shifts that have resulted from Japanese investment including educational activities in public schools the relationship between business and local media and the integration of Japanese managers and their families into Kentucky communities **Return to Meaning** Mats Alvesson,Yiannis Gabriel,Roland Paulsen,2017 This book argues that

we are currently witnessing not merely a decline in the quality of social science research but the proliferation of meaningless research of no value to society and modest value to its authors apart from securing employment and promotion The explosion of published outputs at least in social science creates a noisy cluttered environment which makes meaningful research difficult as different voices compete to capture the limelight even briefly Older more significant contributions are easily neglected as the premium is to write and publish not read and learn The result is a widespread cynicism among academics on the value of academic research sometimes including their own Publishing comes to be seen as a game of hits and misses devoid of intrinsic meaning and value and of no wider social uses whatsoever Academics do research in order to get published not to say something socially meaningful This is what we view as the rise of nonsense in academic research which represents a serious social problem It undermines the very point of social science This problem is far from academic It affects many areas of social and political life entailing extensive waste of resources and inflated student fees as well as costs to tax payers Part two of the book offers a range of proposals aimed at restoring meaning at the heart of social research and drawing social science back address the major problems and issues that face our societies

The Production of Knowledge Colin Elman, John Gerring, James Mahoney, 2020-03-19 A wide ranging discussion of factors that impede the cumulation of knowledge in the social sciences including problems of transparency replication and reliability Rather than focusing on individual studies or methods this book examines how collective institutions and practices have often unintended impacts on the production of knowledge
