An American Health Dilemma W. Michael Byrd,Linda A. Clayton,2012-10-02 At times mirroring and at times shockingly disparate to the rise of traditional white American medicine the history of African American health care is a story of traditional healers root doctors granny midwives underappreciated and overworked African American physicians scrupulous and unscrupulous white doctors

and scientists governmental support and neglect epidemics and poverty Virtually every part of this story revolves around race More than 50 years after the publication of An American Dilemma Gunnar Myrdal s 1944 classic about race relations in the USA An American Health Dilemma presents a comprehensive and groundbreaking history and social analysis of race race relations and the African American medical and public health experience Beginning with the origins of western medicine and science in Egypt Greece and Rome the authors explore the relationship between race medicine and health care from the precursors of American science and medicine through the days of the slave trade with the harrowing middle passage and equally deadly breaking in period through the Civil War and the gains of reconstruction and the reversals caused by Jim Crow laws It offers an extensive examination of the history of intellectual and scientific racism that evolved to give sanction to the mistreatment medical abuse and neglect of African Americans and other non white people Also included are biographical portraits of black medical pioneers like James McCune Smith the first African American to earn a degree from a European university and anecdotal vignettes like the tragic story of the Hottentot Venus which illustrate larger themes An American Health Dilemma promises to become an irreplaceable and essential look at African American and medical history and will provide an invaluable baseline for future exploration of race and racism in the American health system Notable Black American Women Jessie Carney Smith,Shirelle Phelps,1992 Arranged alphabetically from Alice of Dunk s Ferry to Jean Childs Young this volume profiles 312 Black American women who have achieved national or international prominence

**From Mutual Aid to the Welfare State** David T. Beito,2003-06-19 During the late nineteenth and early twentieth centuries more Americans belonged to fraternal societies than to any other kind of voluntary association with the possible exception of churches Despite the stereotypical image of the lodge as the exclusive domain of white men fraternalism cut across race class and gender lines to include women African Americans and immigrants Exploring the history and impact of fraternal societies in the United States David Beito uncovers the vital importance they had in the social and fiscal lives of millions of American families Much more than a means of addressing deep seated cultural psychological and gender needs fraternal societies gave Americans a way to provide themselves with social welfare services that would otherwise have been inaccessible Beito argues In addition to creating vast social and mutual aid networks among the poor and in the working class they made affordable life and health insurance available to their members and established hospitals orphanages and homes for the elderly Fraternal societies continued their commitment to mutual aid even into the early years of the Great Depression Beito says but changing cultural attitudes and the expanding welfare state eventually propelled their decline

*Mad with Freedom* Élodie Edwards-Grossi,2022-11-02 The use of race in studies of insanity in the 1840s and 1850s gave rise to politically charged theories on the differential biology and pathologies of brains in whites and Blacks In *Mad with Freedom* lodie Edwards Grossi explores the largely unknown social history of these racialized theories on insanity in the segregated South She unites an institutional history of psychiatric spaces in the South that housed Black patients with an intellectual history of early psychiatric theories that defined the Black body as a locus for specific pathologies Edwards Grossi also reveals the subtle localized techniques of resistance later employed by Black patients to confront medical power Her work shows the continuous politicization of science and theories on insanity in the context of Reconstruction and the Jim Crow South

*Louisiana History* ,2000 **From TB to AIDS** David McBride,1991-07-03 **Rebuilding Zion** Daniel W. Stowell,2001 Both the North and the South viewed the Civil War in Christian terms Each side believed that its fight was just that God favored its cause *Rebuilding Zion* is the first study to explore simultaneously the reaction of southern white evangelicals northern white evangelicals and Christian freedpeople to Confederate defeat As white southerners struggled to assure themselves that the collapse of the Confederacy was not an indication of God s stern judgment white northerners and freedpeople were certain that it was Author Daniel W Stowell tells the story of the religious reconstruction of the South following the war a bitter contest between southern and northern evangelicals at the heart of which was the fate of the freedpeople s souls and the southern effort to maintain a sense of sectional identity Central to the southern churches vision

of the Civil War was the idea that God had not abandoned the South defeat was a Father's stern chastisement Secession and slavery had not been sinful rather it was the radicalism of the northern denominations that threatened the purity of the Gospel Northern evangelicals armed with a vastly different vision of the meaning of the war and their call to Christian duty entered the post war South intending to save white southerner and ex slave alike The freedpeople however drew their own providential meaning from the war and its outcome The goal for blacks in the postwar period was to establish churches for themselves separate from the control of their former masters Stowell plots the conflicts that resulted from these competing visions of the religious reconstruction of the South By demonstrating how the southern vision eventually came to predominate over but not eradicate the northern and freedpeople's visions for the religious life of the South he shows how the southern churches became one of the principal bulwarks of the New South a region marked by intense piety and intense racism throughout the twentieth century

**Making a Place for Ourselves** Vanessa Northington Gamble, 1995-03-23 *Making a Place for Ourselves* examines an important but not widely chronicled event at the intersection of African American history and American medical history the black hospital movement A practical response to the racial realities of American life the movement was a self help endeavor immediate improvement of separate medical institutions insured the advancement and health of African Americans until the slow process of integration could occur Recognizing that their careers depended on access to hospitals black physicians associated with the two leading black medical societies the National Medical Association NMA and the National Hospital Association NHA initiated the movement in the 1920s in order to upgrade the medical and education programs at black hospitals Vanessa Northington Gamble examines the activities of these physicians and those of black community organizations local and federal governments and major health care organizations She focuses on three case studies Cleveland Chicago and Tuskegee to demonstrate how the black hospital movement reflected the goals needs and divisions within the African American community and the state of American race relations Examining ideological tensions within the black community over the existence of black hospitals Gamble shows that black hospitals were essential for the professional lives of black physicians before the emergence of the

civil rights movement More broadly Making a Place for Ourselves clearly and powerfully documents how issues of race and racism have affected the development of the American hospital system
